## WHO ARE WE?

We are a Polish artisanal workshop guided by a vision of global responsibility, infused with a spirit of individual design. We combine quality, aesthetics, and respect. We consciously select the finest materials from environmentally responsible sources to ensure full awareness of what we create.

With over 20 years of experience, we invite you to design your dream case and we will craft it for you with care and precision.

## OUR MISSION

To keep evolving – among other things, through creating the highest-quality items. Our products speak to those who appreciate the thoughtful blend of functionality, sustainability, elegance, and longevity.

Our work is rooted in mutual respect, honesty, and trust.

By investing in our products, you are guaranteed long-lasting usability. That's why we offer you the opportunity to design your own unique model. A true workshop focuses on excellence – not mass production

## OUR PRODUCTS

We handcraft using the best materials currently available including Italian leather from Mastrotto, YKK zippers, triple-twist threads, heavy-duty snaps and hardware.

We believe that every detail in the creative process matters – like a single note in a complete musical composition. With us, you can design something that is not only functional but also beautiful – either on your own or with our support.

Each case is handcrafted by a Master Artisan, ensuring the highest level of craftsmanship. The process of pattern-making, cutting, riveting, sewing, and more takes between 8 and 24 hours and involves two dedicated creators.

We are constantly searching for new materials – if you know of any innovative, natural-origin fabrics, feel free to contact us directly.

## WHY NATURAL LEATHER IS ECOLOGICAL ?

### **Natural Origin**

Natural leather comes from meat industry waste, so it's not produced solely for leather goods. It repurposes materials that would otherwise be discarded. In contrast, “eco” leather is synthetic and made from petroleum, requiring significant energy and often emitting harmful substances.

### **Durability**

Natural leather can last for decades when properly cared for, gaining character over time. Synthetic leather tends to peel and crack after a few years, leading to more frequent replacement.

### **Biodegradability**

Vegetable-tanned natural leather is biodegradable and breaks down naturally. Synthetic leather decomposes very slowly and can remain in the environment for hundreds of years.

### **Lower Long-Term Resource Consumption**

Although natural leather is more expensive upfront, its long lifespan reduces the need for frequent replacements, saving resources in the long run.

### **Recycling**

Natural leather can be recycled and reused in other products.

Synthetic leather, due to its chemical composition, is harder to recycle

# LEATHER

Gruppo Mastrotto leather – elegance backed by responsibility.

Our leather comes from Gruppo Mastrotto – one of Italy's most renowned tanneries, where tradition meets innovation.

It's more than just premium material:

it's a commitment to quality, sustainability, and ethical sourcing.

Certified for environmental standards and traceability, their leather is a by-product of the food industry and processed using renewable energy and cutting-edge, low-impact technologies.

No shortcuts, no compromises – just soft, durable, beautifully finished leather that respects both nature and craftsmanship.

In Stencel cases, this material takes center stage – protecting instruments with integrity and style.

## ZIPPERS

YKK® zippers – luxury that works silently  
In Stencel cases, every detail matters.

That's why we use only original YKK® zippers – recognized worldwide as a symbol of Japanese precision, exceptional durability, and refined craftsmanship. These are the same solutions used for years by the most prestigious brands. Their operation is smooth, quiet, and flawless – exactly what you expect from premium-class products.

The zipper is often the first point of contact with the product. In Stencel cases, this detail speaks for the whole – subtly yet decisively highlighting the quality and class.

## THREADS

Ariadna threads – strength woven into every line

Every stitch in our cases is a conscious choice – precise, bold, and durable.

We choose Ariadna threads – a leading Polish sewing thread

manufacturer – because they combine strength with resistance

and give the finish a form that catches the eye and stands the test of time.

Models like Tytan, Artyn, or Texar are robust fibers capable

of withstanding even the most demanding conditions.

In the hands of a craftsman, they become more than just material – they are a key structural element that binds and reinforces the entire case.

A close-up photograph of a dark brown leather strap with a textured surface. Two large, shiny silver metal hooks are attached to the strap. One hook is at the top, and another is further down. The strap is attached to a light-colored, textured surface, possibly a leather case. The background is dark.

## HEAVY-DUTY HOOKS AND FITTINGS

DOMICZ fittings and snaps – Polish strength in every detail for over 47 years. Reliable fittings, snaps, and carabiners that meet the highest durability standards. DOMICZ is a family-run brand with tradition, and their components are a solid foundation of our cases – tough, long-lasting, and designed for intensive use.

## CODURA 900

Codura 900 – reliable protection from a Polish-made fabric

A high-quality, water-resistant technical textile made in Poland.

Codura 900 stands out with exceptional resistance to abrasion, tearing, and moisture.

It forms a durable base for our cases - dependable in everyday use  
and under extreme conditions.

## LIGHT MODEL

The Light model is a case shaped to match the contours of the instrument. Protection is provided by 3 cm thick polyurethane foam or rigid closed-cell foam. The area around the bell is additionally reinforced for extra safety. The case features backpack straps, a shoulder strap, and an external pocket or a detachable iPad pouch. This is the lightest version in our range and also includes a mouthpiece case.

## CLASSIC MODEL

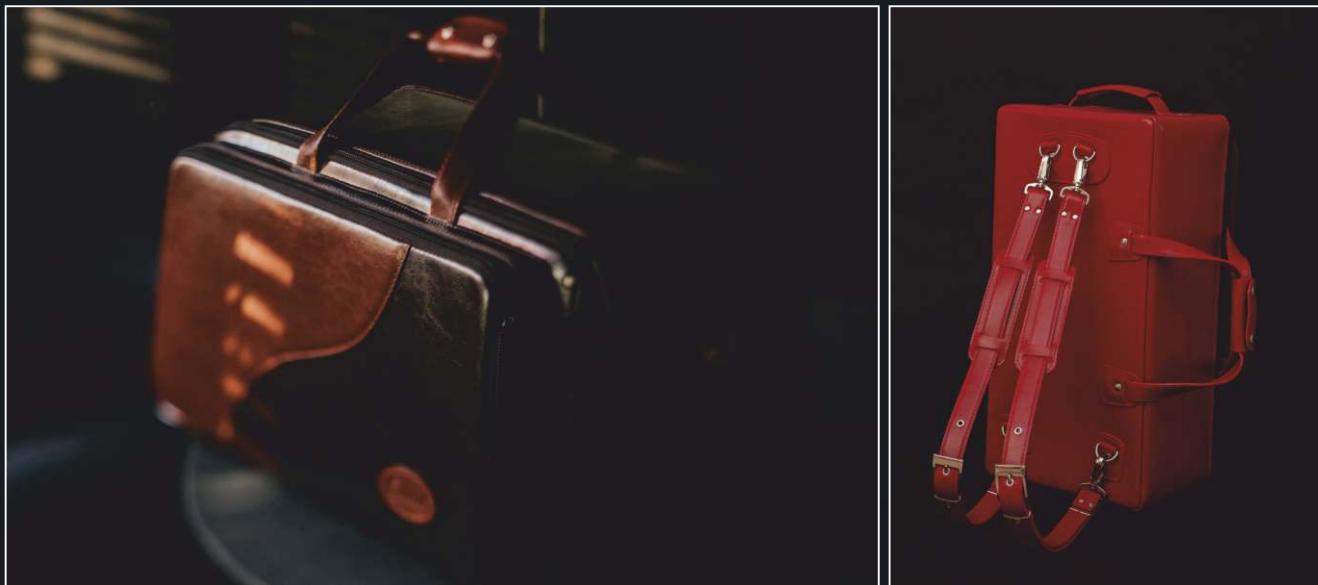

The Classic model features a timeless look inspired by cases from the 1970s. These bags are fully reinforced and padded with soft polyurethane foam. Standard equipment includes backpack straps, an optional shoulder strap, an external pocket, a mouthpiece case, and an optional accessories pouch.

## CASE MODEL

The Case model is the most rigid option in our collection, designed in the form of a suitcase. It is made of plywood or polycarbonate and padded inside with polyurethane foam.

Each case features a large external pocket that comfortably fits a laptop or iPad. It comes with backpack straps and a shoulder strap, as well as a mouthpiece case (the version with wheels does not include backpack straps).
