

Chamber India at the India Energy Week

Bengaluru, India – February 6th, 2023: The Chamber of Commerce, Sustainable Development, and Foreign Relations (Chamber India) is pleased to announce its participation in the India Energy Week, held from February 6th to 8th in Bengaluru, India.

Chamber India's participation was led by Mr. Abhinav Balyan, President and CEO of Chamber India. On the sidelines of India Energy Week, Mr. Balyan met with Ambassadors and High Commissioners from various nations, delegates from various international organizations and senior business leaders. These meetings provided a valuable opportunity to discuss the latest developments in the energy sector and explore ways to promote sustainability and drive economic growth.

As the first major event under India's G20 Presidency, India Energy Week follows the Honourable Prime Minister Shri Narendra Modi's pledge at COP26 to cut India's emissions to net-zero by 2070. Held under the patronage of the Ministry of Petroleum & Natural Gas, Government of India, India Energy Week is the only and all-encompassing international energy event supported at the highest level of Indian government, with participation from all the Public Sector Undertakings (PSUs).

India is projected to witness the largest increase in energy demand of any country over the next two decades, as its economy continues to grow and create opportunities for its people, and the global energy value chain. As a rapidly developing country, and soon to be the world's most populous nation, India's energy transition will play a pivotal role in global energy markets. The inaugural India Energy Week comes at a critical time, with the challenges of energy security and environmental sustainability impacting long-term energy transition and paths towards decarbonisation.
