SOFT BLISTER PACKING MACHINE

APPLICATIONS

- Dental products (tooth whitening strips, orthodontic wax, etc.)
- Diagnostic test strips
- Bandages and wound dressings
- Contraceptives
- Allergy shots and injections
- Veterinary medicines
- Herbal supplements and vitamins
- Hearing aid batteries
- Insulin pens and syringes
- Sterile wipes and swabs.
- Tablets and capsules
- Transdermal patches
- Inhalers
- Eye drops
- Topical creams and ointments
- Surgical gown
- Surgical drapes
- Surgical kit
- Medical devices (syringes, needles, catheters, etc.)

FEATURES

- The machine is an automatic thermoform fill seal machine for soft films.
- Uses vacuum thermoforming and thermo sealing technology to create secure blisters.
- Customizable and has a multi-lane output model for increased productivity.
- Features an HMI screen and PLC system for easy operation.
- Utilizes infrared heating technology for efficient blister formation and sealing.
- Easy to use, maintain, and provides hygienic packaging.
- Offers excellent price-quality performance.

SPECIFICATIONS

Machine model	BPM - S
Application	For soft blister packing
Top Material	Soft blister rolls / 3-layer film with PP or PA, LD, and other polymers
Reel weight	40 KG
Bottom Material	Poly-coated paper, Grid lacquer, Aluminum Foils etc
Power Requirements	10 to 15kWH based on the size of the die, the volume of production, etc
Instrument Air	10 bar, 50 CFM (Demand varies according to the customization)
Labor Requirements	1 operator and 4 persons for loading. It may vary according to the number of loading tracks and operator skill.
Speed	Up to 10 cycles per minute
Weight	1200 KG (Approx.)
Dimensions (LxWxH)	6 m x 415mm x 1.8 m (Approx.)
Die Size	600mm x 400mm
