To solve all these problems you maybe need an air curtain!

Dusty

Why shops down the streets need to clean the dust every day?

Why people feel hot and muggy at the lobby of hotel when door open frequently?

why need air curtain?

Smell

Why clients smell the strong soot from kitchen when setting in restaurant?

Why there're always flys here and there at the area of food in super market?

For those Café shops, convenient shops, to block the dust outside.

For Kitchen, wash room, to block the smelly problem.

For hotel, passenger station, to block the cold from losing.

For super market, bakery, to block the insects from outside.

Head Office:

For motor

We use pure cooper wire motor, with over current, over temperature, and blocked protection. We have strict control during manufacturing process, to achieve good quality.

For all metal parts

We chose the best raw material, testing with salt spray test, to remove defects, and assure best quality level.

For electric wire

We chose those with fresh smooth appearance, no defect, no scalded, with clear sign marks, and testing until without any flash over or break down, thus to protect the equipment run in safe.

Use under extreme conditions possible due to the great temperature range up to +800°C. Particularly silent flow-optimized impeller and housing geometries Compact design. high wind speeds. Temperature resistant High-quality materials.

For testing facilities

We have strict control on each steps of the manufacturing, and all inspect before packing, thus to reduce the defected rate of the products.

Our Valuable Clients

الستارة الهوائية:

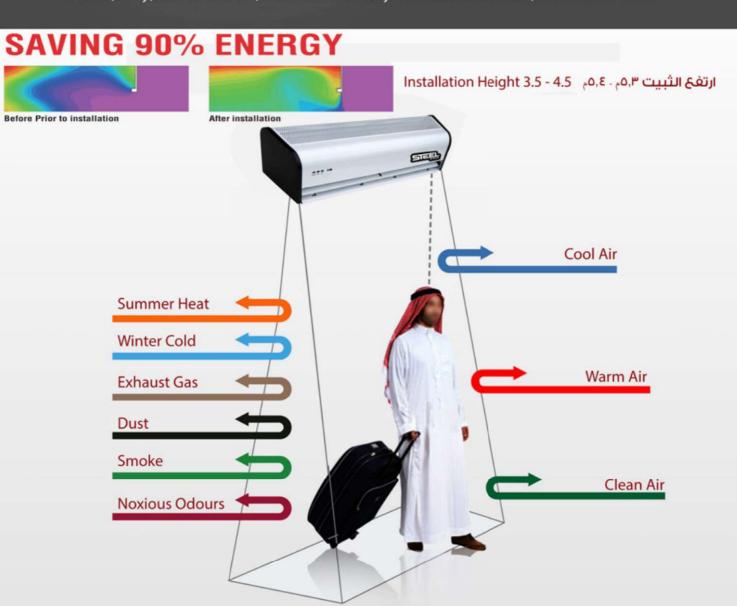

هي جهاز/ آلة تنتج الهواء مِعَ الضغط أجل توفير ستارة مِن الهواء تمتد مِن السقف (أعلى) إلى الأرضية(الأسفل) مِن أجل تقديم المميزات التالية:

- منع دخول الذباب والحشرات والتراب والغيار والروائح السيئة والهواء الساخن في الصيف من الخارج.
- مِنْ أَجِلَ تَلْبِيةَ احتِياجات العملاء فقدتُمْ تركيب مشرحات "فلاتر" داخل الستارة الهوائية مِن أَجِل تغريغَ الغبار (إن و جد(مِن الغرفة(يمكن عسيل و تنظيف الغلاتر بسهولة) . **تنقية الهواء**.

AIR CURTAIN:

A device/ machine that produces air with pressure, to provide a curtain of air from ceiling to bottom in order to avail hte following benefit:

- 1. To stop entry of flies, insects dust, storm, bad odour and warm air in summer from outside.
- To stop the cold air from going out, In order to keep the area cold if Aircondition/split is ON.Creates Conmfortable interior Condition
- 3. To satisfy customer needs FILTERS are placed inside the air curtain to vaccum the dust from the room (if any) and to filter it. (filters that are easily washed and cleaned). PURIFIES THE AIR

Create comfortable interior condition

Prevent the escape of cold (Hot) air , saving electricity

Resist dusts and insects

Resist smoke and harmful gases

Air circulation

It is used for place, super markets, shops, hotels,

restaurant, refrigerated rooms, factories, etc.

خلق حالة داخلية مريحة منـَ خروج الهواء سواء البارد او الحار يوفر الطاقة يمنـَ تراكـم الغبار والحشرات يمنـَ ظهورالخان والغازات الضارة انتشار الهواء يستخدم في السوبر ماركت , المحلات التجارية, الفنادق , المطاعم , تبريد الغرف والمصانـَالخ
