

Introduction to ESG Services

At **Garden Fleet**, we redefine Environmental, Social, and Governance (ESG) excellence by integrating regenerative finance with hands-on sustainability action that delivers **quantifiable, real-world impact**. Unlike traditional ESG compliance investments that rely on theoretical offsets, our solutions create **tangible environmental change**—measured in **tons of plastic waste removed from the ocean** and **acres of reforested coastlines**.

Partner with Garden Fleet to transform your ESG commitments into measurable, real-world impact.

Our Approach: ESG Alignment with Ocean Cleaning & Mangrove Restoration

Our services focus on **practical execution rather than theoretical consultation**, ensuring compliance efforts translate directly into action. We help clients align their ESG goals with **ocean cleanup and mangrove reforestation initiatives**, creating measurable environmental benefits. Our approach includes:

Environmental Impact Services

With over **80% of marine plastic pollution originating from coastlines**, Garden Fleet delivers market-leading environmental restoration solutions:

- | | |
|---|---|
| 1 Ocean Guardian
Coastal Cleanup & Plastic Waste Recovery – Deploying fleet-based cleanup operations to remove hazardous plastic waste from beaches and oceans, ensuring a cleaner, safer marine environment. | 2 Mangrove Guardian
Reforestation & Coastal Resilience – Strengthening coastal defenses against erosion while enhancing carbon sequestration through scientifically backed mangrove planting initiatives. |
|---|---|

Each completed service is backed by a **certificate proof of work**, detailing the exact tonnage of plastic waste removed through the **Ocean Guardian** program and the number of trees planted for carbon sequestration and erosion control under the **Mangrove Guardian** initiative.

Providing Social Impact

Sustainability is as much about people as it is about the planet. Our social impact strategies drive measurable change in communities where we operate.

Job Creation & Workforce Development

Empowering local populations with employment in environmental conservation and waste recovery sectors, in partnership with **Order Efficiency** to provide structured workforce development and training programs.

Community-Led Stewardship

Partnering with local organizations to foster environmental awareness, sustainable livelihoods, and inclusive social responsibility by embedding inclusive policies into ESG frameworks.

ESG Impact Delivered: Stronger community engagement, improved social license to operate, and positive contributions to corporate social responsibility (CSR) reporting.

Transforming Waste into Goods

To advance sustainability and circular economy principles, Garden Fleet has partnered with **CubeSpawn**, a modular, decentralized manufacturing platform to repurpose recovered plastic waste into building materials. By integrating **waste-to-resource conversion**, we aim to ensure that collected ocean plastic is transformed into usable materials.

Trash Collection

Waste is removed from the ocean and coastlines through the **Ocean Guardian** program.

Recycling

Recycled materials are made available at-cost for sustainable infrastructure, ensuring waste finds a productive second life.

Sorting & Processing

Plastic waste is categorized and prepared for repurposing, ensuring efficient material conversion.

CubeSpawn Integration

Sorted plastic is processed through **CubeSpawn's** modular manufacturing system, transforming it into building materials.

Strengthening ESG Governance

Transparency, accountability, and compliance define successful ESG governance. Garden Fleet helps businesses establish robust governance frameworks that instill investor confidence and regulatory alignment:

Regulatory Compliance & Reporting Advisory

Ensuring adherence to SEC-mandated sustainability disclosures and international ESG frameworks (GRI, SASB, TCFD). To meet global sustainability expectations, enhance corporate transparency and investor confidence.

ESG Integration in Strategy & Risk Management

Ensuring **Absolute Transparency** through stakeholder engagement. Garden Fleet documents each cleanup and reforestation effort with photos and videos, inviting stakeholders to audit, review, and validate the progress of every initiative, reinforcing accountability and trust.

Blockchain Governance Integration with CELO

Utilizing decentralized impact tracking to enhance transparency, eliminate greenwashing, and ensure ESG compliance. Garden Fleet leverages the **Celo blockchain**, a mobile-first, proof-of-stake platform with **Byzantine Fault Tolerant (BFT) consensus**, to securely track ESG impact. This integration ensures **on-chain governance**, allowing verifiable, immutable records of plastic waste recovery and mangrove restoration, strengthening regulatory compliance and investor confidence.

Garden Fleet operates in Narra, Palawan, pioneering ocean cleanup and coastal restoration efforts. With a vision for expansion

Partner with Garden Fleet

Unlock the full potential of your ESG commitments with **Garden Fleet**. Let's collaborate to drive sustainability, profitability, and long-term environmental resilience.
