G-Shaped Kitchen

A G-shaped kitchen layout works well for kitchens that are between 3.00 to 5.50 meters or 10 to 18 feet wide. Great for big families, it offers plenty of counter space to provide separate areas to accommodate the food prep needs of multiple age groups

Island shaped Kitchen

A versatile addition to the kitchen if space permits, a kitchen island is a freestanding cabinet which can either match your existing kitchen design or complement it. Place kitchen stools around it, for extra seating, include integral storage drawers or cabinets, or even use it to house your cooking appliances.

L-Shaped Kitchen

An L-shaped kitchen is perfect for small areas since it provides plenty of flexibility while maximising room space. It also offers a natural and ergonomic way to separate kitchen tasks. One side can be dedicated to food preparation and cooking, while the other is reserved for clean-up.

Parallel Kitchen

A long, narrow kitchen layout with services on one or both sides, and an aisle running down the center, a parallel kitchen is great for keeping essential kitchen services in a tight cluster and using the classic kitchen movement triangle efficiently.

Straight Kitchen

A kitchen that is built into one linear wall, such a kitchen while it's limited in its options, allows you to prepare, cook and clean-up in a single workspace, which is very convenient.

The Twin Hinged Door Wardrobe Neve in Matt Lacquer with a Recessed Handle in Mostarda Matt Lacquer features interior fittings in a Grey Wood Finish.

The Twin wardrobe stands out with its linear symmetry and color contrast. It features horizontal recessed handles that form a design motif on the door fronts' surface.

FINO KRAFT

Matt Matters

With 6 Doors and recessed designer handles all finished with Matt PU this openable wardrobe is truly a celebration of the Matt finish.

FINO KRAFT
