# Apple device management
focused on small and medium business

Jamf Now offers simple, easy device management and the ability to grow alongside you with added features in the Jamf Fundamentals Plan.

Setup

Setting up Apple devices manually is time-consuming. Get users up and running with a fully configured Jamf Now Blueprint and device in minutes. Efficiency at its best.

Manage

Device management is an ongoing task. Make it as turnkey as possible by leveraging Jamf Now to deploy and update apps, get a 360-degree view of your inventory, and customize a user-experience to fit your team's needs.

Secure

Ensure sensitive company information remains secure, remotely enforce passcodes, encrypt and even lock or wipe devices. Or, add Malware prevention with the Jamf Fundamentals Plan.

jamf

Jamf Now Features

Jamf Now is the easiest way to manage Apple devices for small and medium-sized businesses including this easy to use functionality:

Automatic Setup

Automate device enrollment to eliminate tedious manual setups and configure Wi-Fi settings and company email accounts.

Device Inventory

Keep track of device settings with current details and status reports.

Device Security

If a device is lost or stolen, it can be remotely locked or wiped completely.

App Distribution

Distribute free apps or ones purchased through Volume Purchasing.

OS Updates

Manage operating system updates to update a single device or all devices.

Single App Mode

Lock your supervised iOS or iPadOS device to a single app to focus the device for a specific need.

Jamf Fundamentals Features

The Jamf Fundamentals plan provides enhanced management, core identity elements and cutting-edge security — all within Jamf Now's intuitive platform including:

Password Sync

Keep Mac passwords in sync with cloud credentials and enforce password policies from identity providers Microsoft Azure AD and Okta.

Self Service

This on-demand Mac App catalog provides organization-approved Mac App Store and third-party apps.

Custom Apps & Profiles

Jamf Now gives you even more flexibility with the ability to deploy custom applications and profiles.

Malware Prevention

Prevent malicious software, malware and other threats from running on your Mac devices with a "check box and deploy" workflow.
