

The **North & South West Orange Plan** is a united proposal from both Horizon West residents and the historic northern communities and municipalities to ensure fair, focused representation through a purposeful horizontal district split, where Horizon West can be the focus of a Southern district and the more historical communities can focus on their needs. By recognizing the distinct needs, growth patterns, and identities of each region, this plan strengthens both communities and protects municipal interests while allowing for more effective governance.

HISTORICAL REGION VOICES:

We would like to have a district separate from Horizon West. While they are our neighbors and we value them and care for them as such, their community is fundamentally different in terms of needs. Our historic communities in the north of District 1 have distinct issues, and yet we too are suffering from infrastructure neglect. Municipalities are too often overlooked in county-level decision-making, and we need a municipal-strong district to ensure their voices and interests are protected. As the focus shifts to managing Horizon West's explosive growth, our communities are being forced to lose attention. Roads are deteriorating, traffic is worsening, and there's a lack of coordination with local governments. The result is a regional imbalance where historic communities are left behind, and unchecked growth to the south only makes things worse. We need a district dedicated to our community, not one overwhelmed by Horizon's leapfrog-development demands.

HORIZON WEST VOICES:

We must remain **WHOLE** and be separated from the City of Winter Garden and the historic communities to the north. Horizon West is the fastest-growing area in all of Orange County, yet our infrastructure has not kept pace with that growth. What was promised to us in planning and development has not materialized. Roads are failing, schools are overcrowded, and essential services lag far behind. As an unincorporated area, we have no city government to fight for us, we rely solely on county representation. That's why we need a commissioner focused entirely on our needs, not split between competing regions with different priorities such as the northern municipalities and older communities. Our master-planned community is growing exponentially and projected to nearly double in population, we must preserve space for that future and separate from our northern neighbors lest our district become the most overpopulated once again in just a few short years.
