

LINEX

The **Linex-Cable Guardrail** system offers a comprehensive range of stainless-steel cable railing solutions.

This innovative, low-maintenance system is designed to provide unobstructed views, making it suitable for both indoor and outdoor applications in commercial or residential settings.

The system utilizes a collection of fittings and components, enabling the assembly of turnkey stainless steel railing solutions at an affordable cost.

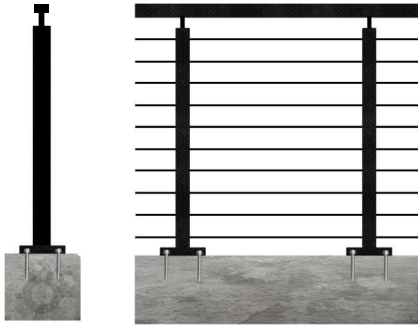

The system is ideal for a wide variety of applications, offering a complete selection of deck railing systems and components to meet diverse project needs.

LINEX

CABLE GUARDRAIL

DESCRIPTION

- Linex Series includes 36 & 42-inch cable rail post, crafted from durable stainless steel with a powder-coated finish for long-lasting performance.
- Its adjustable cast bracket, with a range of 0-300 degrees, is designed to suit both interior and exterior cable railing systems.
- Pre-drilled holes spaced at a standard 3-inch interval ensure compatibility with most state building codes, making it a versatile choice for your stair railing needs.
