ABOUT US

THE PIONEERS OF SAFETY WARNING TAPES & ELECTRICAL SOLUTIONS

Roha Plastic Industry & Fabrication Co. holds a legacy of excellence in the manufacturing and distribution of premium quality Telecom & Electrical OSP Solutions. With a vision of enhancing the safety and efficiency of underground infrastructure installation and other engineering and construction works, Roha Plastic Industry & Fabrication Co. is in the continuous process of bringing innovation in the sector. We are a one-stop shop for all underground utility supplies and telecom & electrical OSP solutions such as cable laying products, telecom products, fiber optic products, electrical products, manhole covers, detectable warning tapes, and PVC pipes along with ropes and solar products. We manufacture products to bring the maximum durability and resilience while maintaining high performance and safety. We also provide technical support and guidance to make the best use of our tools and equipment and maintenance services. Our long array of products and equipment cater to multiple underground infrastructure applications and we customize the products based on your unique requirement.

We meet industrial and international standards for all our products and we have gained awards and accreditations for the quali-

ty of our products and dedication of our services. For over the past three decades we have been providing the top-quality products to leading telecom, construction, utility and other companies and government entities. By building strong partnerships with major companies.

Explore our wide range of products and check how they are going to enhance your underground infrastructure operations more efficiently.
