

BEHIND THE LENS

Life's an adventure, and mine has been defined by movement—from my British and Kiwi roots to living, working, and studying across multiple countries which has helped shape my approach to **storytelling**. I thrive on trying new things, initiating new chapters, and embracing whatever life presents. It is this spirit that I take into every film that I make.

My approach is to create a film that truly reflects the essence of your wedding day — the **love, energy, and celebration** that make it unique. I believe traditional wedding films feel outdated, so I bring a fresh, modern, and vibrant perspective while ensuring every meaningful moment is beautifully captured. Working discreetly and authentically, I blend seamlessly into your day, allowing events to unfold naturally. The result is a **cinematic and timeless** film that combines stunning visuals with genuine emotion — a story to be cherished and shared for generations.

Filmmaking isn't just work — it's a **passion**. I hold myself to high standards because I understand the trust it takes to capture something as meaningful as a wedding day. In the end, it's not just about the technical side — it's about **emotion**. Years from now, you won't just want to remember the day; you'll want to feel it again. That's the magic I aim to create with every film.

"GENUINELY MAKES ME WANT
TO HIRE OUT AN EVERYMAN AND
SINK SOME BOTTLES OF VINO
WATCHING THE FULL THING"

"THOUGHT THE TRAILER WAS
BRILLIANT AND NOW THIS... LIKE
NO OFFENCE TO OTHERS BUT
I'VE NOT SEEN ONE THAT GOOD"

ITS ALL IN THE DETAIL

Cinema Cameras & VHS Camcorders: I use Sony's Cinema Line cameras paired with a carefully selected range of lenses to capture stunning **4K footage** and give your wedding film a truly **cinematic** look. To add a **nostalgic**, personal touch, I also bring vintage **VHS camcorders**, which I can hand out to guests (with permission) to capture fun, unique moments throughout the day — especially perfect for the dance at the end of the night.

Music Licensing: Music brings your wedding film to life, setting the **perfect mood** and **energy**. I use the award-winning **MusicBed**, a top source of **premium** royalty-free tracks, and can adjust each song to match the tone and pace of your film. For your wedding trailer, I'm happy to take **song requests**, making it easy to share a personal, social media ready highlight of your day.

Colour Grading: Every shot I capture is **intentional**, with careful attention to light, movement, and **composition**. Each clip is individually colour graded and enhanced with a cinematic base look, resulting in a polished, **movie-like** wedding film with rich tones and a stunning finish.

Aerial Drone Footage: Ariel Done Footage is the perfect start to any wedding film, setting the scene and **atmosphere from above**. These shots add cinematic scale and drama, giving your film a stunning, movie-like opening.

PACKAGE

SIGNATURE

ADD ONS

SIGNATURE
