

I'm making this available for two reasons. First, it's fun to share things with others, and I hope you'll enjoy the silly little thing. Secondly, I'm hoping for some feedback to help me better understand the process of creating e-comics.

Amazon's Kindle Voyage has a cool 'Panel View' feature that shows a page, then zooms in a frame at a time so you can actually read the tiny text and see the artwork. Different readers handle files differently, and I'm not sure what features are supported, or how worthwhile it is to even try and read comics on various devices.

Here's what you can do: Email jeff@jeffwerx.com Put the word 'comic' in the title. Tell me what device you read the file on, and how it looked. Was it easy to read? Were there any cool features or quirks? Would you buy this kind of comic? Thanks for your help!

Our greatest Sages ponder over ancient scrolls to learn the location of the cave at 'The River's Root' and -

OK, 'Got it.

Sir Druid, Do you know where the Cave is hidden?

I have a guess. Always look behind the Waterfall!
