

The DCT16 Pressure Regulated Solenoid Control Valve is a sophisticated component designed to precisely manage fluid pressure and flow in various systems. Engineered for high performance and reliability, this valve is suitable for a wide range of industrial, commercial, and municipal applications where pressure regulation and efficient fluid control are essential.

Scope of Application

- Water Distribution Systems
- Industrial Processes
- Oil and Gas Industry
- HVAC Systems
- Fire Protection Systems
- Agriculture
- Pharmaceutical and Food & Beverage Industries
- Mining
- Energy and Utilities

Optional

- Globe Type

Material Specifications

NU	PART NAME	MATERIAL
	Body	EN GJS 500 - Ductile Iron
	Cover	EN GJS 500 - Ductile Iron
	Standard	Diaphragm Coated Straight Type
