- BizSAFE

*Controlled Ambient (+15°C to +25°C), Refrigerated (+2°C to +8°C) and Frozen (-25°C to -15°C)

Pharmaceutical Logistics

We maintain the highest standards for pharmaceutical therapeutic products for patient safety.

Temperature Controlled Packaging

We provide diverse packaging solutions to maintain optimal transport temperatures and protect product integrity.

Life Science Transportation

We manage biological products for R&D, central labs and biopsy samples, ensuring sample integrity is maintained throughout.

Next-Flight-Out (NFO)

Our 24/7 Next-Flight-Out service delivers urgent shipments to keep production moving and prevent line-down situations.

International Relocation of Lab Samples and Equipment

We handle international lab relocations with full logistics support incl. shipping, customs, packaging and consultation.

Direct-to-Patient

Decentralized Trials delivery ensures timely, secure medication resupply, enhancing patient retention and their convenience to treatment access.

Radiopharma Logistics

Our teams are dedicated to expediting and keeping radiopharma shipments well within the half-life of the medical isotopes.

Live Animal Transportation

We transport animals stress-free, anywhere.
