SA TRANSGLOBAL Sdn Bhd Healthcare Division

SA Transglobal (healthcare division) aims to offer **cost-efficient** supplies of medical instrumentations and consumables to our Clients. Our services primarily includes:

- Sourcing Services of medical supplies
- Storage and Transportation
- Services and Maintenance of medical instruments
- Project Management Consultancy Services

BUSINESS

FORMATION & SET UP

Incorporated in 2021, (formerly known as *SPEZ Marine Sdn Bhd*) the Company intended to commence its marine services in Oil and Gas industry.

In 2023, the Company was acquired by Synergetic Alliance Group, hence change of business name and re-alignment of its Business Strategic Planning.

Marketing Strategy and Business Planning

We deployed right teams and tools to develop a solid and water-tight business planning and strategies.

We constantly observe the changes in technologies and market dynamics to ensure we are always at the peak of our service level.

Business Alliances & Relationship

We collaborate and form working alliances with other services providers to ensure sufficient working resources at all-time, including but not limited to logistic and warehousing of medical instrumentations and consumables.

We maintained good relationship with our sub-contractors as well as Clients, to ensure smooth execution of work at site.

Financial Resources and Capitalisation

We always make ready sufficient working capital required for any project secured in order to ensure smooth-running of the project.

Our source of funding includes internal-Group funding, as well as third (3rd) parties financing.

HALIM Malek

Chief Executive Officer

Vast experience in Business and Financial Management. Fellow of ACCA and acting as Technical Advisory Partner to NWA CorporateHouse. Possess extensive Project Financial and Operational field-experiences in Engineering Services including offshore construction, transportation and installation.

“Our **MISSION** is to simplify logistics challenges and deliver value-driven, sustainable, and reliable services worldwide.”

“Our **VISION** is to become trusted service providers and segment-leader in our operating segment through innovation, excellence, and customer-centric solutions.”

A STATEMENT FROM THE LEADER

WHO ARE WE?

SA Transglobal has undergone massive business restructuring and transformation exercise in recent years, resulted to more industrial-driven and focus in our service provisions, especially in our service offerings.

The Company has established 5 key business operating segments under the Healthcare Division:

1. Sourcing Services
2. Storage and warehousing
3. Supplies and Leasing Services
4. Maintenance and Services
5. Project Management Consultancy

We have charted a clear 5-year road map towards achieving our Vision and Mission setforth, hence key milestones of the business processes.

Key milestone

- Develop key management personnel
- Upskill project executers and manpower
- Acquisition of business licensing in medical
- Business alliance and consortium
- Business principals and business (financial) recapitalisation

MEET OUR KEY MEMBERS OF OPERATION TEAM

In SA Transglobal, we believed in the principles of Human Capital Development, hence getting a **Right-Person for a Right-Position** is very critical to ensure timely and quality delivery of projects and assignments.

We invested in Continuous Personal Development (CPD) for our key members in order to ensure the Company is always getting the best information, technology and knowledge available in the market. **Our key-management contributed to more than 50-years cumulative working experience.**

MALIA Ismail
Project Cost Controller

Vast experience in Business Management. Former Accountant in PLCs, with extensive Project Financial and Operational field-experiences in Project Engineering Services.

FADLY Mohamed
Operation Director

More than 20 years with vast experiences involving supervisory role in general management, process efficiency optimisation, quality control, trouble shooting and team coordination.

UMAR Agil
SVP, Business Development

More than 20 years with vast entrepreneurship and field work experience in ICT and Medical Supplies and Services

VIJA R. Joseph
Administrator

Graduate Psychologist with experiences in People, Crisis and Customer Management. Assisting the Operation Director and Project Cost Controller in day-to-day operation.

PROJECT TEAM FIELD EXPERIENCES

Our key members of Project Team has successfully completed and delivered the following projects in their proven and verifiable work-track records.

Our Project Team cumulative work experiences of more than 50-years has contributed a lot to our success this far, including but not limited to procuring the right material specification and deployment of right team for specific task and work assignment.

This has led to optimise work-efficiency on site, hence significant reduction of risk and errors.

General Insurances

- Project All Risk
- Building Fire and Burglary
- Marine Assets Hull and Machineries
- Workmen Compensation
- Claim and Adjusting Services (Advisory)

Supplies of Medical Instrumentations and Consumbles

- General Consumables
- Storage and warehousing Services
- Logistic Services
- Inventory management

OUR SERVICES...

LET US
PROVIDE
YOU WITH
TIMELY AND
QUALITY
SERVICE
DELIVERIES

“Innovation distinguishes between a leader and a follower. Do not follow where the path may lead.

Freight Forwarding Services

We offer reliable and flexible freight solutions across air, ocean and land, providing global connectivity and efficient goods transportation.

Our international freight activity is supported by our collaborating partner – BLUEWATER LOGISTIC.

Warehousing and Distribution

Our warehousing (bonded and unbonded) and distribution solutions ensure your inventory and project assets are stored safely and delivered efficiently, tailored to your business needs.

Medical Instrumentation Supplies and after-sales services and maintenance

We are an appointed distributor for numerous medical devices and instrumentations. We also provide periodic maintenance and after-sales support services.

Medical Consumable Supplies and Consultancy Services

Our Healthcare Division aims to provide cost-efficient and timely supplies and other related services in medical industries. We deliver quality products and services to our clients, including government and private agencies.

We believed that continuous development and upskilling of our workforces as one of the key contributor to our success. We never settled for good, hence keep looking for new **INNOVATIONS**, challenges and opportunities for growth.

5

BUSINESS PARTNERS

Up to 3rd Quarter, 2025 (key Partners only)

DIAGNOTRADE SYSTEMS SDN BHD

Manufacturing, supplies and services of medical consumable items. The Company also provide services medical-related services including, logistic, periodic maintenance services and repair / parts replacement for medical laboratory.

MEDISAFE TECHNOLOGIES SDN BHD

The Company specialties include medical supplies for laboratories, surgery, orthopedic, dental, pediatrics, obstetrics and gynecology, ophthalmology, rehabilitation & emergency department.

AL HIJRA HEALTHCARE SDN BHD

The Company offers comprehensive range of equipment and accessories to meet all dialysis needs under the **THRIVE** brand. The products include reverse osmosis water purification systems, chemical disinfectants, hemodialysis machines, automatic dialyzer reproprocessors, related disposable products, and solutions to drive business growth.

QUARTET ENGINEERING SDN BHD

Support services in Project Management, Tender & Proposal and Bidding Exercise.

INTER SIGNALS SDN BHD

Support services in ICT and Medical Supplies services. The Company also provide services in Product Consultation, Tender & Proposal and Procurement Services.

Medical Consumables

Pihak Berkuasa Peranti Perubatan
Kementerian Kesihatan Malaysia

PRODUCT CATEGORY: A-CLASS

ISOLATION GOWN

Description:

Medical Isolation Gown is worn as part of personal protective equipment (PPE) for droplet and contact precautions

COVERALL

Description:

PPE Coveralls are waterproof or splash proof against harmful liquid chemicals commonly used in many industries

CPE GOWN

Description:

Disposable CPE Gown provides wide range of protection against non-hazardous dry dust, limited liquid splash and great for dirty and grimy environment

SHOE COVER

Description:

Shoe Covers are disposable plastic covers that go over the shoe. The cover protects the shoe from any liquid or solid materials and stops any germs or debris on the shoe from contaminating an area

BOOT COVER

Description:

Disposable Boot Cover is a non-woven, fluid repellent and breathable fabric used to protect healthcare professionals and patients from the spread of infection

HEAD COVER

Description:

Head Cover protect the hair and scalp from possible contamination when sprays or airborne exposure is anticipated.

PRODUCT CATEGORY: A-CLASS

CREPE BANDAGE

Description:

Crepe bandages are ideal to support the healing of sprains and strains, as they provide good compression to injured areas

COTTON WOOL (BALLS)

Description:

Made from 100 per cent premium cotton they are perfect for applying facial toner, removing nail polish, applying makeup and general cleansing

PRE-CUT GAMGEE

Description:

Pre-Cut Gamgee has a thick layer of absorbent cotton wool between two layers of absorbent gauze.

TRIANGULAR BANDAGE

Description:

A Triangular Bandage is a large triangle of cloth, also referred to as a cravat, used in first aid.

STERILIZATION CREPE PAPER

Description:

Sterilization Crepe Paper for draping in cart, operating room and aseptic area, CSSD

ORTHOPAEDIC BANDAGE

Description:

Orthopedic Bandage is soft, smooth and comfortable to the body's shape. It is tearable and featherable, has low moisture retention and is porous enough to allow air circulation and to reduce skin irritation

PRODUCT CATEGORY: A-CLASS

SUCTION LINER

Description:

Suction Liner was used as a storage of fluids or debris from human body during surgery or other medical procedures by using a complete set of suction liner system

COMBINED DRESSING ROLL

Description:

Combined Dressing Roll consist of a highly absorbent inner, enclosed in a soft and comfortable non-woven fabric

PRE-CUT GAUZE WITH X-RAY LINE

Description:

Pre-Cut Gauze X-Ray Line is an open-weave, thin, translucent cloth. This product is a dressing made entirely of soft, well-absorbent cotton gauze that has no odor and no negative effects on the body

GAUZE ABSORBENT

Description:

Gauze Absorbent is cotton or a mixture of cotton and not more than 53% by weight of rayon and is in the form of a plain-woven cloth conforming to the standards set forth herein

ALCOHOL PADS

Description:

Alcohol Prep Pad, also known as Alcohol Swab, is a gauze pad that has been saturated with alcohol

PLASTER OF PARIS BANDAGE

Description:

Plaster of Paris Bandage is an impregnated gauze cloth containing plaster of crystal powder. The plaster bandages are mainly used to protect and immobilize a broken limb

PRODUCT CATEGORY: A-CLASS

PRE-CUT GAUZE PLAIN

Description:

Pre-Cut Gauze Plain is a thin translucent fabric with a loose open weave. This product is a pure cotton gauze dressing, soft, well water -absorption, odorless and no side effect to body

COMBI STOPPER

Description:

Combi-Stoppers are pressure resistant up to 2 bar. The device can be used for all patients for which infusion therapy is prescribed

ORTHOPEDIC STOCKINETTE

Description:

Orthopedic Stockinette is made from the finest long-staple cotton yarn, woven on state of art circular looms. It is available as nonabsorbent greige, absorbent beige & ultra white

SUTURE INSERTION SET

Description:

Suture Insertion Set hold body tissues – caused by trauma, injury or surgical operation – together, most doctors would consider the use of surgical sutures

STERILE LUBRICATING GEL

Description:

Sterile lubricating gel is a water-soluble, non-greasy, and transparent gel used to facilitate medical procedures by reducing friction and promoting smooth insertion of devices like catheters, speculums, and thermometer

DISPOSABLE PRESSURE TRANSDUSER

Description:

Disposable pressure transducer is a medical device used for invasive blood pressure monitoring, designed for single use and providing accurate, real-time readings of arterial and venous pressures

PRODUCT CATEGORY: B-CLASS

ENDOTRACHEAL TUBE

Description:

Endotracheal Tube is a tube constructed of polyvinyl chloride that is placed between the vocal cords through the trachea

LATEX FOLEY CATHETER

Description:

The 2-way Siliconized Latex Foley Catheters prolonged durability and flexibility. It contribute to increased patient comfort

IV INFUSION SET

Description:

IV Infusion Sets are used for the infusion of medicines over a long period in a controlled way. IV sets are used to connect the medication to the needle inserted into the patient

CATHETER MOUNT

Description:

Catheter Mount is used as an intermediary connection between the patient and the breathing system. These tubes are made of a special flexible co-polymer

HEAT AND MOISTURE EXCHANGER

Description:

Heat and Moisture Exchangers Filter (HMEF) are devices used in mechanically ventilated patients intended to help prevent complications due to "drying of the respiratory mucosa, such as mucus plugging and endotracheal tube (ETT) occlusion

SUCTION CATHETER

Description:

Suction Catheters are suitable for removal of secretion from mouth, trachea. and bronchial tubes.

PRODUCT CATEGORY: B-CLASS

DISPOSABLE SCALP VEIN SET

Description:

Scalp Vein Set is a device primarily used for venipuncture. It consists of a hypodermic needle, two bilateral flexible wings

NASAL OXYGEN CANULA

Description:

Nasal Oxygen Cannula is a device that gives you additional oxygen (supplemental oxygen or oxygen therapy) through your nose

SUCTION CONNECTING TUBE

Description:

Suction Tubes mainly serves as the conduit from suction instruments and sources evacuate fluid and debris into the suction waste collection canister and source

DISPOSABLE FEEDING TUBE

Description:

Feeding Tubes are medical devices used to deliver nutrition directly to the stomach or small intestine when a person is unable to consume food or liquids by mouth

DISPOSABLE FEEDING TUBE

Description:

Feeding Tubes are medical devices used to deliver nutrition directly to the stomach or small intestine when a person is unable to consume food or liquids by mouth

EXTENSION TUBE

Description:

The Extension Tube delivers medication to the patient by connecting to the other devices such as syringe pump

PRODUCT CATEGORY: B-CLASS

DISPOSABLE BLOOD GIVING SET

Description:

Blood-Giving Set is used for the transfusion of blood and blood products contained in glass bottles

YANKAUER SUCTION SET

Description:

The Yankauer Suction Set is typically a firm plastic suction tip with a large opening surrounded by a bulbous head and is designed to allow effective suction without damaging surrounding tissue

RYLES TUBE

Description:

Ryles Tube is designed to provide access to nasogastric tract for introduction of nutrition and aspiration of intestinal secretion

AEROSOL MASK WITH CONNECTING TUBE

Description:

Aerosol Mask with Connecting Tube is used and designed specifically for aerosol therapy

DISPOSABLE AV FISTULA NEEDLE

Description:

AVF Fistula Needle has beveled cutting edge and polished to offer sharp tip. The rounded trailing edge provides optimal conditions for the cutting and stretching of the tissue that helps the surgeon during procedure

BREATHING SYSTEM FILTER

Description:

The Breathing System Filter contains a sheet of resin-bonded ceramic fibers. The fibers are packed densely and hence the sheet has a high resistance to gas flow per unit area

PRODUCT CATEGORY: B-CLASS

VACUUM BLOOD COLLECTION TUBE

Description:

Vacuum Blood Collection Tube is a sterile glass or plastic test tube with a colored rubber stopper creating a vacuum seal inside of the tube

DISPOSABLE SAFETY BLOOD LANCET

Description:

Disposable Safety Blood Lancet, often known as a lancet, is a tiny medical tool used to draw blood from capillaries. A blood lancet has a double-edged needle or blade, resembling a tiny scalpel

PRODUCT CATEGORY: C-CLASS

HEMODIALYSIS CATHETER KIT

Description:

Hemodialysis Catheter Kit is a catheter, used for exchanging blood between a hemodialysis machine and a patient

Dialysis System

TW-T2008-B

The comfortable treatment solution

Thrive for Human Care.

CE
2460

Thrive^{HD}

Device's Characteristics

02

Effective protection of degassing system for bicarbonate, making dialysis safer and more comfortable

03

Automatic feedback regulation of liquid concentration to correct the error of concentrate preparation

04

Double conductivity and temperature safety monitoring

With double conductivity and temperature safety monitoring, separately conductivity 1 and conductivity 2; separately temperature 1 and temperature 2 to double protect, which ensure the dialysis safety.

05

With level detector and air detector for double air monitoring, improve the safety of extracorporeal circulation, effectively prevent air from entering the human body

TW-T2008-B Dialysis system

Thrive for Human Care.

Thrive^{HD}

Disinfection and Clean

1
Intelligent automatic disinfection and cleaning procedure It can effectively prevent the deposition of calcium and protein in the pipeline of the machine, unnecessary to use sodium hypochlorite to remove protein which avoids the injury to medical personnel during the use of sodium hypochlorite.

2
Non-interrupt and non-changeable disinfection mode guarantee the disinfection safety

Technical information

General information

Technical data:

Model	:W-T2008-B
Size(H*W*L)	:142cm x 49cm x 51cm
Floor area	:65*45cm ²
Weight	:appox. 80KG
Input power	:1500W
Circuit voltage	:100—240Vac
Standby battery	:30 minutes
Water inlet pressure	:0.1Mpa~0.6Mpa, 15P.S.I~60P.S.I
Water inlet temperature	:5°C~30°C
Working environment	:10°C~30°C at relative humidity ≤ 70%
Storage environment	:5°C~40°C, at relative humidity ≤ 80%

Disinfection/Sanitize:

1. Hot disinfection:
Time: 30 minutes; Temperature: about 80°C, at flow rate 500ml/min;
2. Chemical disinfection:
Time: 30minutes, Temperature: about 36°C~50°C, at flow rate 500ml/min;
3. Chemical disinfection with heat:
Time: 45minutes, Temperature: about 36°C~80°C, at flow rate 50ml/min;
4. Rinse:
Time: 10minutes, Temperature: about 37°C, at flow rate 800ml/min;

- LCD touch screen | Balance chamber + UF pump
- UF control system with sealed double volume balancing chamber
- 8 kinds of UF profiling to meet different clinical application requirements
- Standby battery - The standby battery can supply power for 30 minutes

☐ On-line BPM

☐ Intelligent Alarm System

☐ 15-inch Big Touch Screen

☐ One-key Priming+ Function

Can set priming time, priming dehydration volume which effective use of diffusion and convection mechanism to improve the priming effect of bloodlines and dialyzers, to improve the dialysis adequacy

☐ Timer Function

Set the time for sound and light reminder function, which facilitates the clinical operation of medical staff in the treatment process.

☐ Back-up Battery

Able to carry out comprehensive safety monitoring continuously even the external power is off, will not lose the treatment data. Can provide the machine blood circulation system.

☐ Can connect with CCDS

☐ Bi-cart Function

☐ Dialysate Filter

Ultra-pure dialysis, ensures the safety of treatment

☐ One-key Drainage Function

Convenient and practical one key drainage function, auto remove the waste liquid in the bloodline and dialyzer after dialysis treatment.

☐ Standby Function

After the dialysis preparation is completed, can select with one-key standby mode while waiting for the patient to arrive. The machine will pause the absorption of dialysate, greatly avoiding the waste of dialysate.

☐ Store and check the record of operation, alarm and disinfection

☐ Internet Port*

AUTOMATIC DIALYZER REPROCESSOR

THRIVE TO THE FUTURE

Reprocessing Systems. Sterilants. Disinfectants.

*ThriveADR®
Reprocessing System*

Effective

- When Reprocessing single or double dialyzers at one time.

Cost-effective

- With ThriveCS of disinfectant.

Accuracy & safety

- Automatic disinfectant dilution.

Anti-cross infection control

- Extra blood port header to prevent infection among patients.

Record function

- Print reprocessing data, such as name, type of test, TCV, Pressure & Volume result

Double printing

- Built-in printer or optional external printer

ThriveADR® Reprocessing System

The *Upgraded* ThriveADR Reprocessing System is the engine for the most complete reprocessing solution for your center/hospital. Other components of this system include:

- ThriveCS® Cold Sterilant (Disinfectant)
- ThriveTS® Residual Test Strips
- Others Accessories ThriveADR

About Al Hijra Healthcare Sdn Bhd

Al Hijra Healthcare Sdn Bhd (AHHSB) is Malaysia's premier provider of comprehensive dialysis system equipment and healthcare equipment solutions. With our expertise, we are rapidly emerging as industry leaders. Products and Services We offer a comprehensive range of equipment and accessories to meet all dialysis needs under the Thrive brand. Our products include reverse osmosis water purification systems, chemical disinfectants, hemodialysis machines, automatic dialyzer reprocessors, related disposable products, and solutions to drive business growth.

RO MEDICAL

REVERSE OSMOSIS SYSTEM
FOR DIALYSIS APPLICATIONS

Thrive to the Future of Healthcare

Thrive_{RO}

RO medical

REVERSE OSMOSIS SYSTEM FOR DIALYSIS APPLICATIONS

INTENDED USE

The DWS RO Single pass RO Water System intended to be used for supplying reverse osmosis water to hemodialysis machine used in hemodialysis treatment. The system that used to prepare a dialysate concentration complied with AAMI grade water. The system is designed to meet all current standards for dialysis quality water.

ADVANTAGES

- High quality water product
- High operational reliability
- Cost-saving and economical RO water purification
- Touch Screen controlled panel
- Pex pipe treatment area
- Expandable modular unit with up to 6 membranes
- Simple installation and easy servicing
- Effective bacterial prevention
- Supply more high-quality RO water

FEATURES

- **Operation**
 - By LCD Touch Screen control & display
 - Operation and service menu
 - Continuous pressure monitoring
 - Operating hours displayed
 - Clear text display
 - Individual bypass system on Pretreatment
- **Monitoring**
 - Permeate conductivity
 - Reject flow
 - Permeate flow
 - Pretreatment Pressure
 - Pump pressure
- **Audio and visual alarms**
 - Permeate conductivity
 - Excess pressure
 - Low inlet pressure, automatic shut down when water flow is interrupted
- **Process engineering**
 - Permeate backflow
 - Water saving technology
 - Low energy thin film polyamide membranes
 - Automatic backwash cycle
 - Interval auto flush
- **Design**
 - Stainless steel frame
 - Pex piping
 - Stainless steel pressure pump
- **Technical Specifications**
 - Feed water: city water < TDS 10
 - System recovery: 50 - 75%
 - RO membrane: Thin-film polyamide
 - Salt rejection: ionic 99.5%

SPECIFICATIONS

Model	DWS RO 10	DWS RO 15	DWS RO 20	DWS RO 25	DWS RO 30
