Product Name: Elastic Crack Waterproof Sealant

Purpose: Waterproof sealing for a variety of construction materials.

Application Areas:

- Waterproofing for concrete cracks
- Waterproof sealing for window frames
- Sealing glass joints against water infiltration
- Waterproofing profile joints

Key Features:

- Environmentally friendly (0 formaldehyde, 0 VOCs, no harsh odors)
- Strong adhesion (>2.5 MPa bond strength)
- High elasticity (>250% elongation)
- Superior performance (mold-resistant, no peeling)
- Rapid curing (<8 hours)

Core Benefits:

- Adheres to damp surfaces, cures even in submerged conditions

Composition: Modified epoxy resin

Compliance Standard: JC/T 881-2017

Packaging Size: 400ml/piece

Application Instructions:

1. Ensure the surface is free from standing water, oil, dust, and loose particles.
2. Use a dual-cartridge caulk gun for application, discarding the first 20cm of material to ensure a proper mix.
3. After applying the sealant, use a finishing tool to compress and smooth the material (seam finishing tools are recommended).
4. If the temperature is below 15°C (59°F), preheat the sealant using a heating pack for optimal application.
