I am..

a recent graduate from Master of science in Product Design program, my journey began amidst blueprints and concrete, where I spent valuable years shaping spaces as an architect.

I believe, the essence lies in understanding how people interact with their environment—be it a building or a product. Whether crafting a space or a product, the goal remains the same: to create spaces and experiences that resonate with individuals on a profound level.

With my background in architecture, I bring a unique perspective to product design, blending **form**, **function**, and **user experience** seamlessly. Let's collaborate to build products that inspire and make a difference in people's lives.

I'm most proud of..

Iterative Design	Rapid Prototyping
User Research	2D & 3D Fabrication
Human Centered approach	UX
Sketching	Collaboration	AI tools
Problem-solving	Storyboarding

I'm proficient in..

Graphic

Figma   Photoshop   Illustrator

In design   Adobe XD

3D / 2D

Rhino   Sketchup   Autocad

Sketch   Keyshot   V-Ray

Enscape   Blender

I also have experience with..

Revit   Web-flow   Arduino

Fusion   Unreal engine

Education & Experience
