

## 4) Universe Immersion Pack — ₹25,000

### Ideal For

Institutional events, up to 100 participants

### Vibe

Full-scale celestial carnival

### What's Included

#### Flagship Storytelling Experience (60 min):

A full cosmic narrative crafted like a live documentary—peppered with humour, human emotion, and big-picture thinking.

### Telescope Experience

**Premium telescope (200mm or higher)** — deep-sky treats, planets, and rare sky objects (depending on night)

#### Stargazing Duration:

2 hours with structured audience rotation

#### Big Extras:

- Two assistants for faster viewing lines
- Live laser constellation walkthrough
- "Ask Me Anything" zone
- Insta-worthy astrophotography through the telescope (mobile)

### Outcome

Great for school/college assemblies, hobby clubs, and enrichment programs.

### Highlight

- All Stargazing events are subjected to the sky conditions.
- Online Certification if complementary for all participants.
- Online Certification if complementary for all participants.
- Customised Packages also available. Contact for queries.

# The Cosmic Experience Suite

## For Educational Institutions

Designed & hosted by Sandeep Poddar, our Founder & Convener.

"Because the night sky hits different when science meets storytelling"

Let's Explore

## 1) Cosmic Starter Pack — ₹7,500

### Ideal For

Small groups (10–15 students)

### Vibe

Cozy, intimate, “huddle-around-the-scope” energy

### What's Included

#### Storytelling Session (30 min):

A compact, engaging cosmic narrative—Big Bang to Black Holes—served with humour, deep curiosity, and Gen-Z friendly analogies.

### Telescope Experience

#### Entry-level telescope (70–90mm refractor)

— perfect for the Moon, bright planets, star clusters.

#### Stargazing Duration:

~45 minutes of guided sky exploration

#### Interaction:

Q&A with students, cosmic trivia, “**Myth vs Science**” mini segment

### Outcome

Perfect for small clubs or classrooms wanting a taste of the universe without needing huge space.

## 2) Interstellar Explorer Pack — ₹10,000

### Ideal For

Mid-size groups (15–30 students)

### Vibe

Crowd energy + deeper cosmic immersion

### What's Included

#### Storytelling Session (40 min):

A more layered cosmic journey—origins of stars, galaxies, and life’s improbable lottery.

### Telescope Experience

#### Mid-level telescope (100mm Newtonian) —

sharper views of planets & deep-sky objects

#### Stargazing Duration:

~60 minutes of guided night sky viewing

#### Add-ons:

- Laser-pointer sky tour
- Quick demo on how telescopes work

### Outcome

Great for school assemblies, hobby clubs, and enrichment programs.

## 3) Galactic Voyager Pack — ₹15,000

### Ideal For

Larger audiences (30–50 students)

### Vibe

Festival-of-astronomy energy

### What's Included

#### Signature Storytelling Session (45–60 min):

A moving storytelling session blending human evolution, cosmic timelines, and scientific wonder. Perfect for inspiring future science communicators.

### Telescope Experience

#### Advanced telescope (130–150mm reflector)

— breathtaking lunar details, nebulae, star clusters

#### Stargazing Duration:

~75–90 minutes with rotational groups

#### Extras:

- Myth-busting session (Ancient sky stories vs modern astrophysics)
- Laser-pointer sky tour
- Space quiz / interactive challenges

### Outcome

Ideal for larger departments, science fairs, or school/college events wanting a structured, high-engagement show.
