

Improving digital and soft skills

Enhancing Digital and Soft Skills for Aging Workforce

The EDSAW Project is an innovative initiative focused on bridging the digital gap in Central Europe by enhancing digital and soft skills among the older workforce. With the help of an advanced e-learning platform, the project provides courses that blend academic excellence with practical applicability, enabling individuals to grow both personally and professionally. To ensure lasting results and make a significant impact across the EU, the project activities encompass a comprehensive needs assessment, the establishment of local learning centers, and an effective dissemination strategy.

Project outcomes

Digital Training

Soft Skills Development

Workshops & Events

Courses

A DIGITALLY INCLUSIVE FUTURE FOR EVERY ADULT

Our vision is to create a future where every aging adults are empowered with the digital and soft skills necessary to excel in an increasingly digital world. We aspire to build a community where older individuals are not only participants but also innovators and leaders in their professional and social spheres. Our e-learning platform facilitates dismantling the digital divide, fostering lifelong learning, and ensuring that our aging population remains vibrant and integral to the digital economy.
