Eligibility Criteria

You must satisfy the below mentioned eligibility criteria for PMP Certification.

Criteria 1:

➤ If you have a 4 year bachelor's degree or its equivalent, you need:

➤ At least three years (36 months) of distinct, non-overlapping professional project management experience.

➤ Completion of 35 hours of project management coursework

➤ At least 4,500 hours spent overseeing and leading projects.

Criteria 2:

➤ If you have a secondary education degree (high school diploma, associate's degree, etc.), you need:

➤ To meet our requirements, applicants must have a minimum of 60 months of unique and non-overlapping project management experience.

➤ Acquiring 35 hours of project management education has been accomplished.

➤ A minimum of 7,500 hours of experience in leading and directing projects. Ensure your project management experience.

Who can attend the course?

Project Managers	Program Managers
Portfolio Managers	Business Analysts
Consultants	Engineers
IT Professionals	Team Leads
Project Coordinators	Project Analysts
Assistant Project Manager	QA Managers
Associate Project Manager	PMO office Representatives
Project Executives	Onsite/ Off-site Coordinators

Course Modules

Module 0: Introduction	• Overview of the course structure, learning objectives, and PMI's expectations. • Explain what PMP® certification is, eligibility criteria, the exam structure, and the PMI Talent Triangle® (Ways of Working, Power Skills, Business Acumen). • Introduction to key themes: Predictive, Agile, and Hybrid project environments.
Module 1: Business Environment	• Understand how external factors impact projects. • Explore organizational systems, governance, and compliance factors. • Topics include strategic alignment of projects, project benefits management, and environmental influences like laws, regulations, and culture.

Module 3: Start a Project	• Initiate and define a new project or a new phase of a project. • Key focuses: • Identifying and engaging stakeholders. • Developing a project charter. • Building the project team and creating a shared understanding of the project goals.
Module 4: Plan the Project	• Detailed planning of scope, schedule, cost, quality, resources, communications, risk, procurement, and stakeholder engagement. • Learn how to define project objectives, manage changes, and establish baselines. • Covers both predictive and adaptive (Agile) planning approaches.

Module 5: Support the Project Team Performance	• Focus on leadership and team management throughout the project.
	• Topics include:
	  ◦ Managing conflicts.
	  ◦ Supporting team performance.
	  ◦ Leading a team through empowerment and decision-making.
	  ◦ Communicating effectively.
	  ◦ Building a collaborative project team environment.

Module 6: Close the Project/Phase	• Formal closure of a project or a project phase. • Activities include: • Confirming project deliverables. • Ensuring acceptance by stakeholders. • Conducting lessons learned sessions. • Releasing project resources. • Archiving project documents.
PMI Authorized PMP Exam Prep Student Workbook	• What it is: • The official workbook provided by PMI. • Contains exercises, case studies, practice questions, templates, and tools aligned with the course modules. • Follows PMI's authorized content — extremely helpful for exam readiness.
Notes Handouts for Each Module	• Purpose: • Condensed notes summarizing key points from each module. • Designed for quick revision and to help during classroom sessions or self-study. • Each handout covers critical definitions, formulas, concepts, and processes.

Glossary	- Purpose: - A complete collection of important PMP terms and definitions. - Helps ensure you use PMI's language correctly (important for the exam!)
Mastery Builder Questions	- Purpose: - Short quizzes and practice questions after every major topic. - Designed to reinforce understanding immediately. - Help in identifying weak areas before moving ahead.
PMP Exam Prep Course Outline	- Purpose: - High-level overview of the course structure. - Lists all modules, learning objectives, approximate time allocation, and methods (lectures, case studies, quizzes, etc.)
