

The Starter Trial (7 Days)

Understand what your pup receives in their bowl in 7 days

What you recieve with the pack ?

- **Goal:** Taste & Digestion Check.
- **Price :** ₹910– ₹999.
- **Inclusions:** 7 Individual Meals + 1 "Transition Guide".
- **Instruction:**
Add 50% Dorea Bites to 50% home-cooked/kibble food.

A week to wake up the bowl.

This isn't just a food sample; it is a metabolic introduction. We are moving the dog away from processed "burnt" brown pellets (kibble) or simple plain rice/chicken to a nutrient-dense, bio-available diet.

Why 7 Days? It is the exact window needed for the canine digestive tract to replace old enzymes with fresh ones without causing gastric shock.

By the end of this week, you won't just see a dog who is full; you'll see a dog who is satisfied.

What's Inside the Bowl?

- **Veggie Noodles with Fruits:** A light, antioxidant-rich start to cleanse the system.
- **Prawn & Rice with Sardine Paste:** High in Omega-3 fatty acids for brain health and skin glow (served as a smooth paste for maximum absorption).
- **Soya-Veggie Platter:** A lean, plant-based protein boost rich in isoflavones.
- **Paneer-Veggie & Sunny-Side Up Poach:** Nature's multivitamin (the egg yolk) paired with fresh fiber.
- **Chicken Pulao with boiled egg and gizzard soup:** This meal provides a high-protein energy boost through lean chicken and eggs, while the collagen-rich gizzard soup acts as a natural "liquid gold" for joint lubrication and deep hydration.
- **Paneer & Bok Choy Soup:** High calcium for bone strength with the Vitamin K benefits of Bok Choy.
- **Mackerel with Banana Stem:** A powerhouse meal for kidney health and natural detoxification.

Dorea Bites

Benefits for the Pet & the Parent

For the Pet: "The Biological Reset"

- **Bio-Availability:** Unlike kibble, which is cooked at high heat, our gentle cooking preserves enzymes. The dog absorbs 90% of the nutrition instead of pooping it out.
- **Stable Energy:** High-quality proteins mean no more "sugar spikes" and "crashes" that lead to hyper-reactivity.

For the Parent: "The Gift of Time & Trust"

- **Zero-Effort Nutrition:** No more 6 AM chicken boiling sessions. We handle the research, the sourcing, the cooking, and the cleanup.
- **Transparency:** You can see every ingredient in the bowl. If it's not good enough for you, it's not in their bowl.

Health Benefits & Challenges Eliminated

The "Quick Wins" in 7 Days:

- Eliminating the "Picky Eater" Cycle: Many dogs "refuse" food because their current diet makes them feel bloated. Our fresh food is naturally aromatic and easy on the gut.
- Reducing "Hunger-Reactivity": Many hyperactive dogs are actually frustrated by a lack of real protein. Proper satiety leads to a calmer, more focused dog.
- The Itch-Fix: By removing chemical preservatives and artificial colors found in store-bought food, we often see a reduction in "paw-licking" and "hot spots" within the first week.

Dorea Bites

The "50-50 Transition"

The Safe Path to Fresh Food:

- The Strategy: We don't replace; we enhance.
 - Day 1–2: 25% Dorea Bites / 75% Old Food.
 - Day 3–5: 50% Dorea Bites / 50% Old Food.
 - Day 6–7: 75% Dorea Bites / 25% Old Food.

Dorea Bites

From 7 Days to 15 Days (The Deep Healing)

Moving Beyond the Trial:

- The 7-Day Milestone: At Day 7, we do a "Gut-Check Consultation." We look at the stools, energy, and excitement levels.
- The 15-Day Goal (The Habit): * Cellular Repair: By Day 15, the Omega fats from our seed powders start reflecting in the coat's texture—it becomes softer and less "brittle."
 - Joint Lubrication: The natural glucosamine from gizzards begins to ease joint stiffness.
 - Personalization: Based on the 7-day trial, we customize the next 15 days (e.g., more fish for skin issues, or more pumpkin for obesity).
- **The Loyalty Gift: Transitioning to the 15-day plan unlocks a Personalized monthly treats packs and Birthday Letter & Gift for your pet, making them a permanent part of the Dorea Bites family.**

The Dorea Bites "Poop Chart"

While it might seem humorous, monitoring your dog's stool is vital because the consistency and color serve as a direct window into their internal health and digestive efficiency. Smaller, firmer stools are a sign of superior health because they prove the body is successfully absorbing nutrient-dense ingredients rather than simply passing undigested "filler" waste through the system.

Dorea Bites

The Dorea Bites "Poop Chart"
What to Expect on Their Journey to...

THE GOAL: THE PERFECT LOG
(Firm, moist, easy to pick up)

PHASE 1: DAY 1-3
Slightly Softer Stools

Detoxing from processed fillers
This is Normal!

PHASE 2: DAY 4-7
Smaller, Darker Stools

WHY?
Smaller stools mean the dog is absorbing the food rather than passing it through as waste.

THE WIN!

- Less cleanup for you &
- A Healthier Colon for Them!

THANK YOU
