Petrol Injector Cleaner 250ml

A one-shot cleaning agent developed to remove deposits from petrol fuel injection systems.

Description

A fuel treatment that contains a cleaning agent developed to remove deposits from unleaded fuel injection systems. When added to the fuel it will remove carbon build-up that can reduce the performance of the vehicle. Ideal for use as a pre-MOT test clean-up treatment.

Application

For use in all petrol passenger car and light commercial vehicles (LCV), including Euro 6, Euro 5 and Euro 4 compliant engines with or without a Petrol Particulate Filter (PPF)/ (GPF)/ (OPF). Also can be used in motorcycles, scooters, ATVs, small plant and garden machinery.

Dosage Rate

1 x 250ml bottle treats:
50 Litres (1 x 50L tank) of unleaded fuel.

Directions for use

Add to fuel tank prior to refuelling.

Typical Characteristics

Density @ 15°C, g/ml	0.823
Kinematic Viscosity @ 40°C, cSt	2.10
Flashpoint, °C	>65

Features & Benefits

- Provides one-shot treatment enabling a one-time treatment resolution.
- The cleaning agents will restore the injector spray pattern, which will help get back any lost power or acceleration resulting in an improved driving experience.
- Reduces exhaust gases, which aid in MOT emissions testing.
- Cleaning the fuel injection system will enhance the efficiency of the engine, which in turn will increase MPG.
- Emission control equipment (catalytic converters, petrol particulate filters) are unaffected by the treatment.
- Fully compatible with all types of petrol fuel including both leaded and unleaded.

Storage Instructions

Store at ambient temperature.
Avoid direct sunlight.
Product efficacy within 24 months of date on bottle if stored according to the manufacturer's instructions.
