

PRODUCT DATA SHEET

**PRODUCT NAME/VISCOSITIES:****HI-MOL 20 GREASE**

DATA SHEET NO: 7666

LM: 17/01/14

DESCRIPTION:

Specialised competition grease based on lithium soap and 20% molybdenum disulphide.

APPLICATION:

Use as received.

Ideal for constant velocity joints and highly loaded sliding spline drive shafts.

USER BENEFITS:

- Very high molybdenum content versus normal black greases.
- Proven in competition over many seasons.
- Ideal for highly loaded constant velocity (CV) joints in motorsport applications.
- Eliminates sliding spline binding under high acceleration loads.
- The high molybdenum disulphide content provides a high load carrying capability making the product suitable for other high load applications.

TYPICAL CHARACTERISTICS:

NGLI Grade	2
Solids Content	20%

HEALTH AND SAFETY:

Health and Safety Data Sheet 7666 applies to this product. When used for the purpose recommended and with due regard to the appropriate Health and Safety Data, the product should cause no concern. If in doubt, consult with Millers Oils Technical Department.
