PART 1

ABOUT US

Company Profile

EterniBlossom is a specialized preserved & dried flower manufacturer based in Kunming - Asia's floral hub. We focus on custom production, adapting formulas to regional climates for extended durability.

Our strategic location ensures premium floral resources and efficient global distribution, providing one-stop procurement solutions for florists & wholesalers. With climate-specific processing expertise, we supply retailers across the Americas, Europe, and Southeast Asia.

Established partnerships reflect our commitment to balancing aesthetics with science-backed, long-lasting floral solutions.

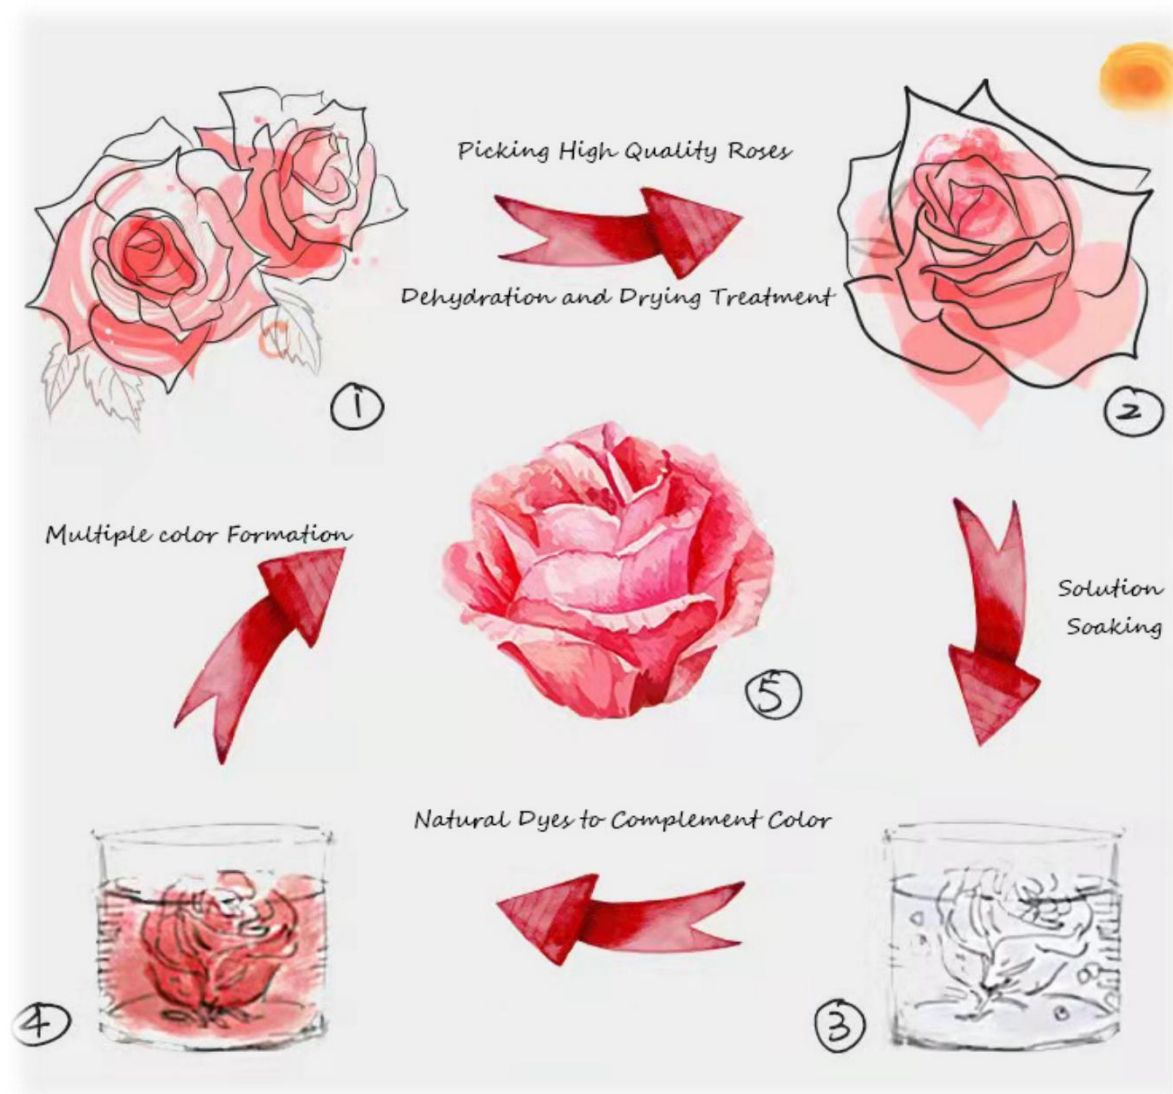

What is Preserved Flower

Captured at their radiant peak, blooms are suspended in time using plant-based biodegradable formulas, retaining natural softness and hues for 3-5+ years. Beyond mere preservation, this artisanal process reimagines florals: petals are revitalized with luminous custom tones, infused with subtle fragrances, and sculpted into enduring botanical sculptures. A zero-maintenance ode to sustainability, these creations transform fleeting beauty into heirloom-worthy art—where ecological innovation dances with nature's impermanent grace.

The Birth of Preserved Flower

Preserved Flower not Dried Flower
