

THE BIG THINK STRATEGY : NUTRITION PRESCRIPTION

Children have specific dietary needs based on their unique biochemistry, health history and genetics. The timing and contents of meals, as well as the consumption of certain individual nutrients, can have subtle and occasionally dramatic effects on mood and behaviour (Massachusetts Institute of Technology). 40% of infants and children with special health care needs are at nutritional risk. Bio individual diet is the science and clinical application of diet and nutrition intervention that is customized to the unique needs of an individual.

RUDE? BAD MOOD? IT IS THE FOOD...

RIGHT NUTRITION CAN....

- Support biochemistry and body systems for healing.
- Increase clinical effectiveness.
- Reduce dependence on certain medical and/or pharmaceutical interventions.
- Improve and restore nutrient status.
- Balance intestinal flora for gastrointestinal support.

BIO-INDIVIDUAL DIET STRATEGY!!

CUSTOMIZED THERAPEUTIC DIET AND NUTRITION

THE DOCTOR OF THE FUTURE WILL GIVE NO MEDICATION BUT CURE & PREVENT DISEASE WITH NUTRITION.....
