Profile

I am a dedicated QA professional with expertise in both automation and manual testing, ensuring software quality and seamless user experiences across web and mobile platforms. I have solid experience testing mobile applications on **Android and iOS**, validating functionality, usability, performance, and compatibility across multiple devices. Proficient in creating detailed test plans, executing test cases, and leveraging automation tools such as **Selenium, Cypress, and Playwright** to optimize testing processes. My strong attention to detail and problem-solving skills have consistently driven the delivery of reliable, robust, and user-focused software solutions.

Work Experience

QA Lead, QA-BIT

09/2022 | Madrid, Spain

QA Automation & Mobile Testing Engineer

- Led the planning, design, and execution of **automated testing strategies** for **web, API, and mobile applications (Android and iOS)**
- Developed and maintained **automation frameworks and test suites** using **Playwright and Cypress** for web testing
- Implemented **mobile test automation** using **Appium** for native Android and iOS applications
- Designed and executed **API automation tests** using **Postman**, ensuring data integrity and backend reliability
- Performed **performance, load, and stress testing** using **JMeter** to validate system scalability and stability
- Streamlined testing processes through automation, **reducing test execution time by 30%**
- Improved defect detection by **identifying 15% more critical bugs** before production releases
- Executed **functional, regression, smoke, exploratory, and end-to-end testing** across platforms
- Collaborated with developers, product owners, and QA teams in **Agile/Scrum environments**
- Integrated automated tests into **CI/CD pipelines** to support continuous testing and faster releases
- Ensured compliance with **quality, performance, and security standards** throughout the SDLC
- Actively contributed to the **continuous improvement of QA automation frameworks and processes**

QA Engineer – Manual & Automation Testing, Soaint

12/2024 – 07/2025

As a **QA Engineer specializing in manual and automated testing for web and mobile applications**, I am responsible for ensuring the quality, reliability, and usability of software products across **Android and iOS platforms**. My work includes comprehensive **test planning, execution, and automation**, creating detailed test cases, identifying and documenting defects, and developing robust automated test scripts using tools such as **Cypress, Selenium, and Playwright**. I collaborate closely with developers, product managers, and other stakeholders to ensure each release meets the highest standards of **performance, functionality, usability, and stability**.

Key Responsibilities:

- Design and execute **manual test cases** based on functional, technical, and business requirements
- Perform **mobile application testing on Android and iOS**, including functionality, usability, compatibility, installation, updates, and device-specific validations
- Develop and maintain **automated test suites for web and API testing**, improving test coverage and regression efficiency
- Execute **regression, smoke, exploratory, sanity, and end-to-end testing** across web and mobile platforms
- Identify, document, prioritize, and track **defects** using tools such as **Jira** or similar issue-tracking systems
- Validate **mobile performance and user experience** across multiple devices, OS versions, and screen sizes
- Collaborate within **Agile/Scrum environments**, participating in sprint planning, reviews, and defect triage
- Contribute to the **continuous improvement of QA processes, test strategies, and automation frameworks**

QA automated, Genius Referrals

2023 – 2024 | EEUU

Developed, implemented, and maintained **robust automated testing frameworks for web and mobile applications**, using **Cypress for web automation** and **Appium for native mobile testing on Android and iOS**. Ensured compliance with high-quality standards across the entire software development lifecycle by designing scalable, reusable, and maintainable automation solutions.

Implemented **automated functional, regression, and end-to-end test suites** for both platforms, increasing test coverage and improving release reliability. Integrated automated tests into **CI/CD pipelines**, enabling continuous testing and significantly **reducing overall testing execution time by 40%**, which accelerated delivery cycles and improved team productivity.

This automation strategy contributed to a **20% reduction in production defects**, enhancing application stability, performance, and user experience across web, Android, and iOS environments. Collaborated closely with developers, product owners, and QA teams to align automation efforts with business requirements, proactively identify quality risks, and continuously improve testing processes and automation frameworks.

QA Automation & Mobile Specialist, Guajiritos

09/2017 – present | Habana, Cuba

QA Automation & Mobile Specialist | Experience since 2017

- QA Automation and Mobile Testing specialist with experience in **manual and automated testing** across **web and mobile applications (Android and iOS)**
- Design, creation, and execution of **test strategies, test plans, and test cases** aligned with business and technical requirements

- Strong experience in **mobile application testing**, including installation, upgrades, permissions, notifications, network conditions, and cross-device compatibility
- Execution of **functional, regression, smoke, sanity, exploratory, usability, and end-to-end testing**
- Development and maintenance of **automated test scripts** to increase test coverage and reduce regression testing time
- Hands-on experience with **test automation tools**: Selenium, Cypress, Playwright
- Application of **automation best practices**, including reusable test frameworks, test data management, and modular test design
- Collaboration with **cross-functional teams** (developers, product owners, QA teams) throughout the **Software Development Life Cycle (SDLC)**
- Active participation in **Agile/Scrum ceremonies**, including sprint planning, daily stand-ups, reviews, and retrospectives
- Identification, documentation, prioritization, and tracking of **defects** using bug-tracking and test management tools
- Experience validating **mobile performance, usability, stability, and user experience** on real devices and emulators
- Knowledge of **cross-browser and cross-platform testing** strategies
- Support of **CI/CD pipelines** through automated test execution and continuous testing practices
- Strong analytical, problem-solving, and attention-to-detail skills with a **quality-first mindset**

Web Positioning Consultant (SEO), ACL

05/2024 – present | florida, EEUU

AI Process Automation & SEO Specialist

- Automated business and digital workflows using **AI-powered tools** to reduce manual tasks and improve operational efficiency
- Designed and implemented **end-to-end process automation** using **Make (Integromat)** to orchestrate workflows between multiple platforms and services
- Developed and deployed **web applications and websites** to trigger, manage, and monitor automated processes
- Integrated **APIs, databases, and AI services** to enable seamless data flow and intelligent automation
- Applied **AI-assisted automation** to tasks such as data processing, content generation, performance tracking, and reporting
- Collaborated with cross-functional teams to analyze processes, identify automation opportunities, and implement scalable solutions
- Improved workflow efficiency, accuracy, and reliability through **automation-first strategies**
- Ensured automation solutions aligned with business goals, scalability, and performance requirements
- Combined technical automation skills with SEO knowledge to optimize digital processes and system integrations

Projects

Cuban Software Developers, Empowering Cuban Tech Talent [↗](#) 07/2024
Cuban Software Developers is an initiative dedicated to nurturing and showcasing the exceptional talent of software developers in Cuba. We provide a platform where Cuban developers can connect with international clients, access valuable resources, and participate in cutting-edge projects. Our goal is to bridge the gap between Cuban tech professionals and the global market, fostering growth, innovation, and collaboration.
Key Features:

- Networking opportunities with global tech leaders
- Access to international projects and job opportunities

Nestor Alonso, Professional QA, SEO, and Digital Marketing Specialist [↗](#) 06/2024
As part of my professional portfolio, I launched **Nestor Alonso** to provide a comprehensive range of digital services. My expertise spans across QA automation and manual testing, SEO, digital marketing, sales, social media management, and customer support. I am committed to delivering high-quality work, customized strategies, and integrated services to enhance digital presence and drive measurable growth.
