PARTNER™

It's our job to think about energy.
Not yours.

ENERGY AUDITS – GRANTS – ENERGY EFFICIENCY – RENEWABLE PROJECTS

**ZERO EMISSIONS
NORTHWEST**
PROJECTS THAT CHANGE COMMUNITIES

zeroemissionsnorthwest.com

DATA DRIVEN APPROACH:

- Irrigation Improvements
- Software Efficiency Improvements
- Kiln/Dryer Improvements
- Drone Applications
- Fleet Electrification & Fleet Efficiency
- Building Envelope Improvements
- Frost Protection Improvements
- Renewable Energy (Wind, Geothermal, Solar, Hydro)

ZENergy Partner™ finds savings opportunities that would otherwise go undetected.

We are partnered with local conservation districts and serve as an official USDA contractor for Energy Audits and Renewable Energy Development Assistance.

01 Conduct Energy Audits, Assessments & Feasibility Studies

It's crucial to know how much energy your business uses in order to make improvements and achieve money-saving gains. The cost is 75% covered by the USDA, as ZEN is an official USDA partner.

02 Invest in Solutions That Save

Technology is rapidly expanding within the ag market. A long-term investment in new equipment or renewables like solar could be the right solution, but before you spend, let's determine what's truly best.

03 ZENergy Partner Dashboard™

All of your usage will be analyzed within our ZENergy Partner™ Dashboard. We will alert you to any changes, good or bad – and provide annual reviews.

04 Put Money Back Into Your Pocket

In today's world, data is king. Regular energy reporting can tell you if you're best-in-class or need to make adjustments. With the energy savings you'll achieve, you can re-invest that money into your business any way you'd like.
