

What is **VERMEAUX**? The New Era of Fine Jewelry

Vermeaux is the future of fine jewelry — pure **24K gold** electroformed onto **pure silver**, giving you the brilliance, prestige, and durability of solid gold without the heavy price tag. Unlike traditional vermeil, Vermeaux delivers pure 24K gold over 999 silver for unmatched quality and value. Our **Cyanide-Free** process ensures it's *safe, sustainable, and eco-friendly*. This new category of fine jewelry is already a **Multi-Billion-Dollar market** — and it's only just beginning.

Why **VERMEAUX** is a Game Changer

- 💎 **Same Effect as Solid Gold** – Feels, wears, and shines like pure gold jewelry.
- 🌱 **Cyanide-Free Production** – Safe, eco-friendly, and regulation-compliant.
- 💰 **Luxury Without the Price Tag** – Affordable alternative to high gold prices.
- 🗑️ **True Asset Value** – Still made of pure gold and pure silver — can be sold, pawned, or resold like other precious metals.
- 🌐 **Global Demand** – Hugely popular across Asia, now gaining traction worldwide.
- 📈 **Fine Jewelry Upgrade** – Surpasses traditional vermeil with thicker plating (can exceed 2.5µm for premium wear resistance).
- 💡 **Billion-Dollar Industry** – Already booming in China alone, with massive global growth potential.
