LIGHT COMMERCIAL
AIR CONDITIONER
INDONESIA

BRIEF INTRODUCTION

Established in 2003, AUX ELECTRIC CO., LTD is a professional central Air-Conditioner enterprise which is integrated the R&D, equipment manufacturing and sales service in business scope. After several years business developing, it has been awarded many honors like international development advanced enterprise, innovative demonstration enterprise, most popular market brand, best product quality, most competitive brand in top 10 air-conditioner supplier. The sales volume of air conditioner from 2018 to 2021 ranks top3 in the world, and AUX has successfully been exclusive supplier of official air conditioning of the 19th Asian 2022 Hangzhou Games.

Aux product is cover unit air-conditioner, VRF and modular unit with 50 series and more than 1000 product type, its product are widely applied in government, public construction, education, medical service, decorative residential, business office and industrial project, etc, and exported to more than 100 countries and regions.

In the future, AUX Group will be intelligently upgraded with the industrial intelligence, integrating home, business smart system, continue to adhere to the mission of "health, energy saving, green, environmental protection" to be a worldwide brand which symbolizes healthy life!

MILESTONE

STARTUP & DEVELOPMENT (1986-2022)

1986

Established AUX Group

2003

Entered The CAC Field

2007

Launched Digital
Scroll ARV System

2004

Got CNAS Certification

2011

Launched DC Inverter
VRF System Globally

2016

Launched All DC
Inverter ARV 5X
Globally

2019

Launched All DC
Inverter ARV 6
Globally

2021

Became the official
air-conditioned supplier
of the 19th Asian Games
in Hangzhou in 2022

2022

Launched All DC
Inverter ARV 7 & R32
Air to Water Heat
Pump Globally

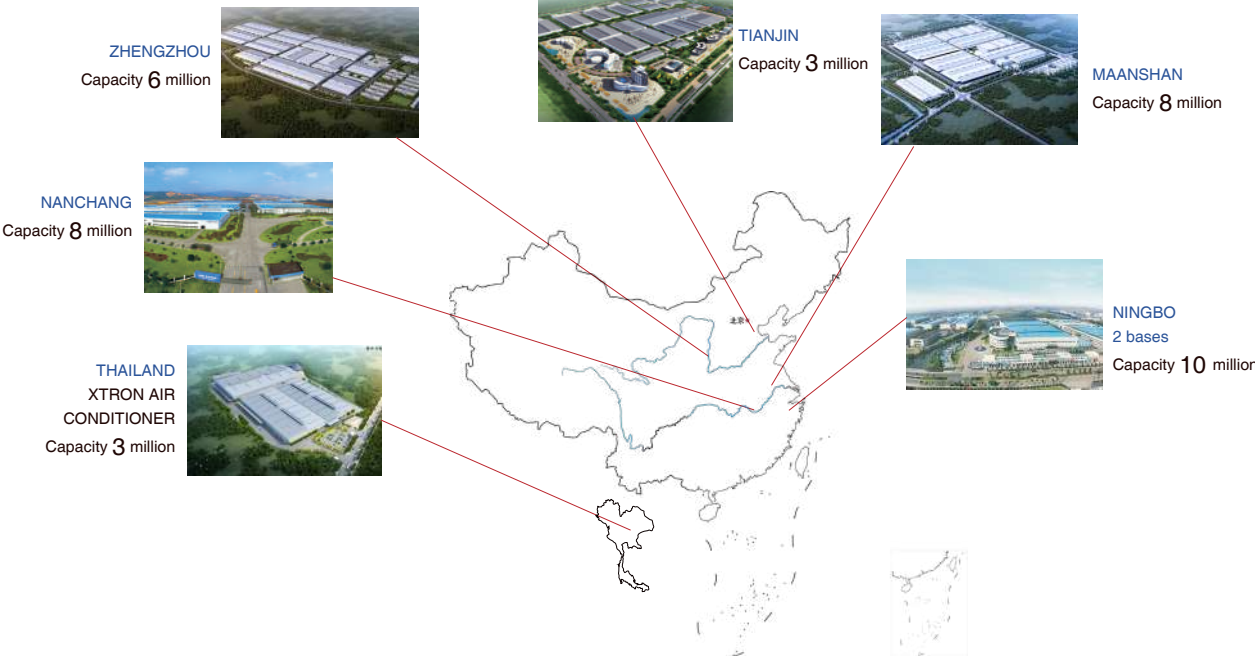

2023

Launched All DC
Inverter R290 Air To
Water Heat Pump
globally

Intelligent Manufacturing

■ 7 production bases

■ 37+ million sets/year

Exported to 123 countries and regions , over 400 cooperative customers

Health

Fresh Air Intake

Air outside can be led into the room via a connection pipe, which keeps the indoor air fresh and healthy.

Long-term Filter

The latest long-term filter ensures better air quality. Meanwhile, the cleaning frequency has been decreased, and maintenance is also much easier.

Comfort

Anti-Cold-Air

When starting the heating operation, the fan speed is regulated automatically from the lowest speed to the preset level. This function can prevent cold air from blowing out at the beginning of the operation, which avoids the discomfort to the user.

Follow Me

Temperature sensor built in the remote control will sense its surrounding temperature, so the unit can achieve accurate and comfortable temperature control just like the air conditioner is following you.

Fast Cooling /Heating

Startup at high frequency increases cooling/heating capacity and reduces time to reach set temperature, thus you can enjoy cooling and heating in seconds.

Auto swing

Distributes cool/warm air to maximum area by moving horizontal and vertical fags automatically.

Independent Dehumidification

With the independent dehumidification function, the unit can efficiently dehumidify the room and give you more comfort.

3D Air Flow

Combine vertical and horizontal auto swing to ensure an even distribution of air flow throughout the room.

Dimmer

Press this button to shut off the display light on the front panel.

Silent

Indoor fan will run at super breeze speed and indoor noise level can be extremely low when the unit enters silent mode operation.

Reliability

Self-diagnosis Function

Once abnormal operation or parts failure happen, the unit will monitor the failures, the microcomputer of air conditioner will switch off and protect the system automatically when it happens. Meanwhile, the error or protection code will be displayed on the indoor unit.

Low Ambient Cooling

With special designed PCB, outdoor fan speed can be changed automatically according to condensation temperature. The air conditioner can run cooling operation even when the outdoor ambient temperature down to -15°C.

Intelligent Defrosting

Normal defrost function can only be operated in certain time, but AUX commercial air conditioner's intelligent defrost can start automatically according to the surrounding condition.

Compressor Heating Belt

Auxiliary heating belt can increase compressor oil temperature in winter and prevent defrosting water accumulated, which improves heat transfer efficiency.

No Frosting Chassis

The unique pipeline design makes the temperature on chassis higher than normal units, and it prevents defrosting water accumulated, which improves heat transfer efficiency and solves the drainage problem.

Golden Fin

Effectively prevent bacteria breeding and improve heat transfer efficiency. The unique anti-corrosive golden coating on the condenser can withstand the rain, salty air and other corrosive elements.

Fire-proof Electric Box

Electrical control box adopts new design, which can meet the higher fire safety requirement to prevent the internal fire due to the electric spark accident.

Energy Saving

180° Sine Wave Control

With considerable advantages, DC Inverter 180° sine wave driving technology has much wider range of frequency and voltage, higher energy efficiency, more smooth running and lower noise.

Sleep Mode

The function enables the air conditioner to automatically increase cooling or decrease heating 1°C per hour for the first 2 hours, then holds steady for the next 5 hours, after that it will switch off. This function maintains both energy saving and comfort in night.

Full Process By DC Drive

DC control, DC Compressor, DC indoor motor, DC outdoor motor, and DC Electronic expansion valve make low noise and high efficiency.

Hydrophilic aluminum fin

The louvered hydrophilic aluminum foil has improved by more than 10%. There refrigerant inlet and outlet are separated, to ensure the sub-cooling and enhance the cooling capacity.

Convenience

24-hour Timer

Users can turn on or turn off the air conditioner at any time in 24 hours with remote controller or wireless controller.

Built-in Drain Pump

The built-in pump can lift the condensing water 1200 mm upmost from the drainage pan.

Digital Tube Display

Easily for the running parameters checking and more convenient for troubleshooting, digital tube displays work status such as indoor temperature, setting temperature, the mode of operation, etc.

Remote Control

Help users to control the air conditioner easily, you can design your most comfortable settings with this controller.

Dual side Drainage

Both left and right sides of the indoor unit are possible for drainage hose connection, and it's easy for installation with this function.

Wired Control

Help users to control the air conditioner easily, the wired controller can be fixed on the wall and avoid mislaying. It's mainly used for commercial zone and makes air conditioner control more convenient.

Central Control

With the control function of weekly timer, zone (or group) setting etc., the centralized controller can control 64 units with RS 485 wire connection and the central control adapter.

WIFI Control

With the WIFI control, you can easily turn off the air conditioner outside your house via smart device. Furthermore, you can turn it on before you come back. The indoor unit filter can be taken off to wash easily and it keeps cleaning air all the time.

Washable Filter

The indoor unit filter can be taken off to wash easily and it keeps cleaning air all the time.

Auto Restart Function

If the air conditioner breaks off unexpectedly due to the power cut, it will restart with the previous setting mode automatically when the power resume.

Non-inverter Cooling Only Series

► Feature

Easy
control

Easy
maintenance

Non-Inverter Cooling Only Series

Feature

► Wide operation and voltage range

Cooling ambient temperature range 18-43°C .
Wide power supply voltage range $\pm 15\%$.

► Auto restart function

The AC can automatically memorize the operation setting when power is cut off accidentally. It can return to previous setting when power resumes.

► Flexible Installation

Long piping / high drop between IDU and ODU, flexible installation.

Piping Length (m)		
Capacity (K btu/h)	Max. Piping Length L1	Max. Piping High H1
18K	20 m	15 m
24/30/36K	30 m	20 m
48/60K	50 m	30 m

► Multi Protection

System protection
Discharge temperature too high protection
Condenser temperature too high protection
High and low pressure protection
Temperature sensor protection
Compressor overloading protection
Phase sequence protection
Communication failure protection
Anti-freezing protection

CASSETTE

Feature

► 5-fold exchanger

The evaporator adopts a 5-fold evaporator, which has a larger heat exchange area and a 12% increase in heat exchange efficiency compared to traditional 4-fold evaporators.

► Round-way air supply

Round flow panel make the air diffuse from 360°direction, and the temperature distribution is more uniform.

► long distance air supply

The air supply distance reaches 4m, meeting the air supply requirements for tall spaces.

► Big air volume

Adopting a large-diameter spiral wind wheel for larger air volume and lower noise.

► Sleeping mode

Turn on sleep mode at night, no need to worry about being too cold or too hot, and sleep comfortably all night long.

Feature

► Screen display function

When the unit is running, the light panel icon can be set to display or not to display to meet the needs of different customers.

► Fresh air

And long-term use will not cause dizziness, healthy and comfortable.

Fresh air intake

► Anti-leakage water pan

Using 1.5mm thick plastic drain pan, with high waterproof performance and effective prevention of water seepage.

► Built-in Drain Pump

Built in drainage pump with a lift of up to 1200mm, suitable for more installation occasions and more efficient drainage.

► Fire-proof cover

The fireproof electric control box made of metal materials has higher safety, ensuring the safe operation of the unit.

► Reliable control board

Hot melt adhesive is applied around the electronic components to keep the components stable.

► Compact body size

The thickness of the body is 246mm, occupying less ceiling space and making installation more convenient.

► Removable grille

No need for tools, just press lightly to open the grille, making installation more convenient.

► Wifi & Room card

Optional WiFi, room card functions to meet intelligent needs.

► Weekly timer

Set the operating time of the unit in one week , without having to manually turn it on every time, and no need to worry about forget to turn off the unit after getting off work.

CEILING&FLOOR

Feature

► Long Air Supply Distance

Up to 14m, meet large room requirement.

► Anti-condensation

Industry-leading anti-condensation insulation design of the air outlet.

► Fresh air intake

Fresh air intake hole design can introduce fresh air to ensure high air quality in the room.

► Easy drainage

Left and right water outlet design of water connection plate, flexible for installation site.

► Beautiful Design of Display Board

The display board is beautiful built in design, with good sealing, moisture-proof and long reliable life.

► Safe and Reliable

Separate design of power and communication terminal to ensure safety.

► Optional filter

A variety of health filters can be selected to improve room air quality.

► Easy Maintenance

Enough space to maintenance, no need to take out the whole electrical control box.

MID ESP DUCT

Feature

► Fresh air inlet

Fresh air inlet design, fresh air can be introduced to ensure fresh air in the room.

► Silent water pump

Select silent water pump to ensure different customer installation requirements.

► Two return air modes are selected

Two return air modes are selected (back return air and down return air), Easy to change.

► W Type High efficiency filter screen

Easy disassembly (0 Screws)
Convenient to wash
High efficiency (W type)

► Electronic control is easy to maintain

Quickly remove 1 screw from the left and right end cover.
Change the direction of output line, maintenance without shielding, increase the maintenance space.

► Double drain holes

Double drainage design on the left and right side of the water plate, flexible to adapt to the installation site.

Outdoor Unit

maintenance

Commercial High ESP Duct

Feature

► Three Speeds Fan Motor

Outdoor unit 3 fan speeds with better low temp. cooling

► Long Distance Air Supply

High ESP design makes the air supply the longest distance(50m), and the air supplied is distributed well.

► Wide Operation Range

Advanced system design, strict system matching and test, the unit could operate perfectly between 52°C in hot summer and -15°C in cold winter making you feel like spring all year around.

FLOOR&STANDING

Feature

► Touch Screen Design

Elegant touch screen design, longer lifetime than traditional button design.

► Innovative Diversion Design

The special design at air inlet side makes strong air flow more even and more efficient.

► Ultra-Slim Design

The indoor unit is only 36cm in width, save installation space.

► Muti application

Strong cooling capacity, large air volume, and long air supply distances, making it suitable for large spaces such as waiting room, exhibition halls, restaurants and factories.

► Fast cooling

Use advanced inverter technology to get fast cooling in 1min.

► Wide temperature range

Use refrigerant cooling technology to reduce the main controller temperature to realize cooling under 50°C ambient temperature.

FEATURES

- Remote Control
- Auto Restart Function
- Fast Cooling/Heating
- Compressor Heating belt
- Hydrophilic Aluminum Fin
- Auto swing
- Low Ambient Cooling
- Long-term Filter
- Anti-Cold-Air
- Self-diagnosis Function
- Intelligent Defrosting
- Central Control
- WIFI Control

High ESP Duct

Inverter Cooling Only Series

Feature

► Inverter Compressor

The compressor adopts the latest DC inverter technology, which greatly improves the working performance and saves up to 30% energy compared with ON/OFF type.

► Golden Anti-corrosion Fin

Better anti-corrosion compared with blue one, which is especially suitable for the coastal areas.

► Coated Circuit Board

The circuit board is coated with protective coating to avoid the impact of humid air on the PCB and prolong its service life.

► Refrigerant-cooling PCB

The latest refrigerant cooling technology is adopted to improve the heat dissipation efficiency of the PCB, ensure the safe and stable operation of the PCB, and prolong the service life.

► New inverter technology(patent)

The new patented inverter technology without Electrolytic capacitor solves the after-sales problems such as capacitor bulge and leakage in the traditional Electrolytic capacitor drive scheme.

capacitor bulge and leakage

Fast Cooling

Wide Temp. Range

Wide Voltage Range

Long Piping

High/Low Voltage Protection

Discharge Temp. Protection

Refrigerant Pressure Protection

CASSETTE

Feature

► 5-fold exchanger

The evaporator adopts a 5-fold evaporator, which has a larger heat exchange area and a 12% increase in heat exchange efficiency compared to traditional 4-fold evaporators.

► Round-way air supply

Round flow panel make the air diffuse from 360°direction, and the temperature distribution is more uniform.

► long distance air supply

The air supply distance reaches 4m, meeting the air supply requirements for tall spaces.

► Big air volume

Adopting a large-diameter spiral wind wheel for larger air volume and lower noise.

► Sleeping mode

Turn on sleep mode at night, no need to worry about being too cold or too hot, and sleep comfortably all night long.

Feature

► Screen display function

When the unit is running, the light panel icon can be set to display or not to display to meet the needs of different customers.

► Fresh air

And long-term use will not cause dizziness, healthy and comfortable.

Fresh air intake

► Auto clean

Automatic cleaning of evaporator, cleaning of dust and dirt, healthy and comfortable.

► Built-in Drain Pump

Built in drainage pump with a lift of up to 1200mm, suitable for more installation occasions and more efficient drainage.

► Anti-leakage water pan

Using 1.5mm thick plastic drain pan, with high waterproof performance and effective prevention of water seepage.

Feature

► Fire-proof cover

The fireproof electric control box made of metal materials has higher safety, ensuring the safe operation of the unit.

► Reliable control board

Hot melt adhesive is applied around the electronic components to keep the components stable.

► Compact body size

The thickness of the body is 246mm, occupying less ceiling space and making installation more convenient.

► Removable grille

No need for tools, just press lightly to open the grille, making installation more convenient.

► Wifi & Room card

Optional WiFi, room card functions to meet intelligent needs.

► Weekly timer

Set the operating time of the unit in one week, without having to manually turn it on every time, and no need to worry about forget to turn off the unit after getting off work.

CEILING&FLOOR

Feature

► Long Air Supply Distance

Up to 14m, meet large room requirement.

► Anti-condensation

Industry-leading anti-condensation insulation design of the air outlet.

► Fresh air intake

Fresh air intake hole design can introduce fresh air to ensure high air quality in the room.

► Easy drainage

Left and right water outlet design of water connection plate, flexible for installation site.

► Beautiful Design of Display Board

The display board is beautiful built in design, with good sealing, moisture-proof and long reliable life.

► Safe and Reliable

Separate design of power and communication terminal to ensure safety.

► Optional filter

A variety of health filters can be selected to improve room air quality.

► Easy Maintenance

Enough space to maintenance, no need to take out the whole electrical control box.

MID ESP DUCT

Feature

► Fresh air inlet

Fresh air inlet design, fresh air can be introduced to ensure fresh air in the room.

► Silent water pump

Select silent water pump to ensure different customer installation requirements.

► Two return air modes are selected

Two return air modes are selected (back return air and down return air), Easy to change.

► W Type High efficiency filter screen

Easy disassembly (0 Screws)
Convenient to wash
High efficiency (W type)

► Electronic control is easy to maintain

Quickly remove 1 screw from the left and right end cover.
Change the direction of output line, maintenance without shielding, increase the maintenance space.

► Double drain holes

Double drainage design on the left and right side of the water plate, flexible to adapt to the installation site.
