The World Government Movement

Human civilizations have seen innumerable confrontations. World has witnessed two global wars. Vulgar display of nuclear prowess caused unbelievable pain and misery. Desire to subjugate and conquer continues to this day. All this necessitates formation of a democratic governance model at global level. Another attempt was made in 1945, as earlier attempts had miserably failed. This was in the form of “San Francisco Conference” which resulted in the formation of the United Nations (UN). The UN was believed to be a precursor to emerging World Federation leading to a World Government. The world today, is a global village. Needs of countries have devolved absolute-independence into democratic-interdependence while retaining their sovereign identities. A democratic global governance system or precisely a democratic world government has become absolutely necessary now.

A substantive history of the world government movement is more than one hundred years old and history of the Provisional World Parliament, which goes back to 1960s.

World Constitution and Parliament Association, formed a Constituent Assembly in 1968 Sponsored the process of drafting and revising the Earth Constitution, resulted in a historic document and holistic solution for the progress of humanity. The Constitution for the Federation of Earth was written through the combined effort and input of hundreds of world citizens, including many international legal experts

over a period of 23 years (from 1968 to 1991). At the first Constituent Assembly in Interlaken, Switzerland in 1968, the delegates elected a drafting committee of 25 persons, which included a prominent

Indian Mr. Godey Murahari, former Deputy Chairperson of Rajya Sabha. In 1972, this committee completed the first draft and was circulated worldwide several times for comments and amendments. It was reviewed paragraph-by-paragraph and adopted at the Second Constituent Assembly in Innsbruck, Austria in 1977. Small changes were made at the Third assembly and at the Fourth Constituent Assembly in Troia, Portugal in 1991 declared the Earth Constitution “completed” and ready for by the people and nations of Earth.
