

# BiWPT - Bidirectional Wireless Power Transfer for Next-Generation Electric Mobility

MSCA Doctoral Network

## Doctoral Candidate 7 (DC7)

*Development and validation of bidirectional converter and hybrid compensation topologies*

Funded by  
the European Union

**HOST INSTITUTION** University of Southern Denmark, Denmark

**CONTRACT**  
36 months

**START DATE**  
From 1 January 2027

**APPLICATION DEADLINE**  
1 October 2026

### ABOUT BIWPT

The BiWPT Doctoral Network on **Bidirectional Wireless Power Transfer for Next-Generation Electric Mobility** has a clear mission: to train a new generation of experts who possess the skills and fundamental knowledge required to effectively address the challenges of bidirectional WPT systems for electric mobility, enabling vehicle-grid integration in support of Europe's energy transition. The network will advance fundamental understanding and practical implementation of efficient, compact, and misalignment-tolerant bidirectional WPT technologies. Expected innovations include novel electromagnetic coupling and converter designs, integrated shielding concepts and real-world demonstrators that enable seamless, efficient, and high-power electric vehicle charging and discharging. The network delivers a training programme to 15 Doctoral Candidates (DC), providing capabilities to become leaders of tomorrow's R&I in Europe.

### ABOUT THE UNIVERSITY OF SOUTHERN DENMARK

The University of Southern Denmark (SDU) stands as a dynamic and innovative research institution, renowned for its commitment to excellence in education and interdisciplinary research. In 2024, SDU achieved a significant milestone by increasing its external research funding expenditure to 160M€, marking a 43% rise and reflecting its ambitious strategy to further boost research impact and collaboration by 2030. SDU's international outlook is strengthened by its active membership in both the EPICUR European University Alliance and the Young European Research Universities Network.

### SKILLS & OBJECTIVES

**Desirable skills/interests:** Simulation engineering and modelling; Electrical and electronic engineering; Embedded systems; Control engineering.

**Objectives:** Design innovative hybrid compensation and converter topologies that minimize magnetic material usage and component count while ensuring high efficiency and robustness. The DC will realize the development and experimental validation of a hybrid compensated, bidirectional wireless charging system capable of stable, load-independent current and voltage transfer in both charging and discharging modes. Experimental validation through hardware prototypes will demonstrate >95% efficiency and strong misalignment tolerance.

The DC will participate in two planned secondments as part of the doctoral training programme: an academic secondment at the co-supervising university abroad and an industrial secondment at the mentor's company.

The DC is expected to submit regular progress reports to the local and network supervisors. In addition, the DC will actively participate in BiWPT's training, dissemination, communication, and exploitation activities. The DC will prepare a doctoral thesis and publish scientific articles related to the research project.

## PROFILE & REQUIREMENTS

- Master's degree (or equivalent) in Electrical Engineering, Electronic Engineering, Communication Engineering, Mechatronics, Applied Physics, or equivalent. Master's students in their final year may apply. Transcripts of the master's degree should be obtained before signing the contract.
- Outstanding academic results. Moreover, applicants must have the necessary academic skills and background to make the success of a doctoral degree.
- Applicants must have the ability to understand and express themselves in both written and spoken English to a level that is sufficiently high for them to derive the full benefit from the network training.
- Motivation and commitment to interdisciplinary and intersectoral training.
- Ability to work both individually and in a team with adequate communication skills.
- Eligible to enrol in a PhD program at the host institution.

### MSCA Eligibility Criteria

**Mobility Rule:** Applicants must not have resided or carried out their main activity in the country of the recruiting host institution for more than 12 months in the 3 years prior to the recruitment date. Compulsory national service, short stays such as holidays and time spent by the researcher as part of a procedure for obtaining refugee status under the Geneva Convention are not taken into account.

**Doctoral Candidate Rule:** Applicants must not already hold a doctoral degree on the date of recruitment. Researchers who have successfully defended their doctoral thesis but have not yet formally been awarded the doctoral degree will not be considered eligible.

## BENEFITS

### Competitive MSCA Remuneration

The successful candidates will receive an attractive salary in accordance with the [MSCA WP 2023-2025](#). The **gross salary** includes a living allowance (+/- € 4000 per month, dependent on the applicable EU Country Coefficient), a mobility allowance of +/- € 700 per month and, if applicable, a family allowance of +/- € 495 per month. **These amounts are nominal (gross) amounts and certain deductions will apply for social security contributions and/or taxes according to the applicable national laws of the country where the recruiting beneficiary is located.** The exact (net) salary will be confirmed upon appointment and is dependent on local tax regulations and on the country correction factor (to allow for the difference in cost of living in different EU Member States).

### Contract Extension

PhD funding is guaranteed for 36 months. Depending on the local Supervisor and conform the regular PhD time in the country of origin, **additional funding might be available**. In countries where PhDs typically last longer than 36 months, beneficiaries may provide additional funding for the remaining period to finish the PhD if the DC fulfils all requirements at the end of month 36.

### Training & Development

Funding for technical and personal skills training and international research events.

### International Network

Secondments and training opportunities within the BiWPT consortium.

## HOW TO APPLY

Submit your application via the online application form at [www.biwpt.eu/apply](http://www.biwpt.eu/apply) **no later than 1 October 2026**. Candidates are encouraged to apply as early as possible, as online pre-interviews may be organized with candidates who meet the profile requirements and have expressed mutual interest for an exploratory conversation. **The selection interviews are planned to take place between 2 and 13 November 2026**. Before applying, candidates are required to carefully read the information on the application and selection process available at [www.biwpt.eu/recruitment](http://www.biwpt.eu/recruitment). The recruitment of Doctoral Candidates (DCs) within BiWPT is conducted in accordance with the principles of the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers.

## CONTACT & ADDITIONAL INFORMATION

### SUPERVISOR

A. Babaki - [amirbabaki@sdu.dk](mailto:amirbabaki@sdu.dk)

### CO-SUPERVISORS / MENTORS

R. Maheshwari (SDU, DK), A. Costanzo & V. Cirimele (UniBo, IT), C. Kjeldsen (CON,DK)

Questions on the application procedure can be directed to the project manager D. Ceulemans ([david.ceulemans@uantwerpen.be](mailto:david.ceulemans@uantwerpen.be)).

Disclaimer: This offer is subject to the signature of grant agreement nr° 101310414, expected by mid-July 2026.
