ABOUT US

Always moving forward with purpose, creating impactful experiences and delivering exceptional event production services that make a lasting difference.

At ITS, we believe that every event is an opportunity to tell a story, spark emotions, and create unforgettable moments. As a premier event production company, we specialize in transforming visions into reality through innovative design, meticulous planning, and seamless execution.

With a team of seasoned professionals, state-of-the-art technology, and a passion for excellence, we deliver events that captivate audiences and exceed expectations. From corporate conferences and product launches to grand celebrations and live performances, we handle every detail with precision, creativity, and dedication.

What sets us apart is our commitment to understanding your unique needs and bringing your ideas to life in ways that inspire and engage. Whether it's crafting immersive audiovisual experiences, managing large-scale logistics, or designing bespoke decor, we are your trusted partners in making every event a masterpiece.

Driven by innovation and a client-centric approach, ITS is here to elevate your event to the extraordinary. Let's create something remarkable together.

OUR KEY MOTIVES

Looking towards the Future, our vision is to set new benchmarks in the event management industry, crafting experiences that inspire, engage, and endure

01

Inspiration behind the Company

ITS was established to transform ordinary events into extraordinary memories. Our journey began with a small team of visionaries eager to redefine the standards of event planning

02

Founder's Experience

With over a decade of collective experience in hospitality, entertainment, and logistics, our founders identified a need for a more personalized and innovative approach to event management.

03

Our Commitment to Excellence

Our unwavering commitment to excellence drives every detail, ensuring that each event is executed with precision and flair

04

Client-Centric Approach

At the heart of our company is a client-first philosophy, where every detail is tailored to reflect the unique story and objectives of each client

Smart Value

We recognize the importance of adhering to our clients' budgets and are committed to delivering exceptional results within the specified financial parameters.

Expertise

Our team brings over a decade of hands-on experience across diverse event formats, ensuring precision, reliability, and innovation in every project.

Client Satisfaction

Quality and precision from start to finish. Your success defines ours.

OUR SERVICE

Planning an event is only the beginning;
its true success lies in flawless execution.

We provide a one-stop service for you.
Reducing difficulty and saving your time
is our goal.

Consultation

A professional consultation ensures that your goals are not just met but executed seamlessly, tailoring the event to align with your brand, theme, or personal preferences.

In-House A/V Production

Delivering seamless and immersive event experiences begins with exceptional Audio/Visual (A/V) production.

Complete Execution

We specialize in delivering end-to-end event production services that turn your vision into reality, ensuring every detail is handled with precision, creativity, and professionalism.

WHAT
WE
DELIVER

BUSINESS EVENTS

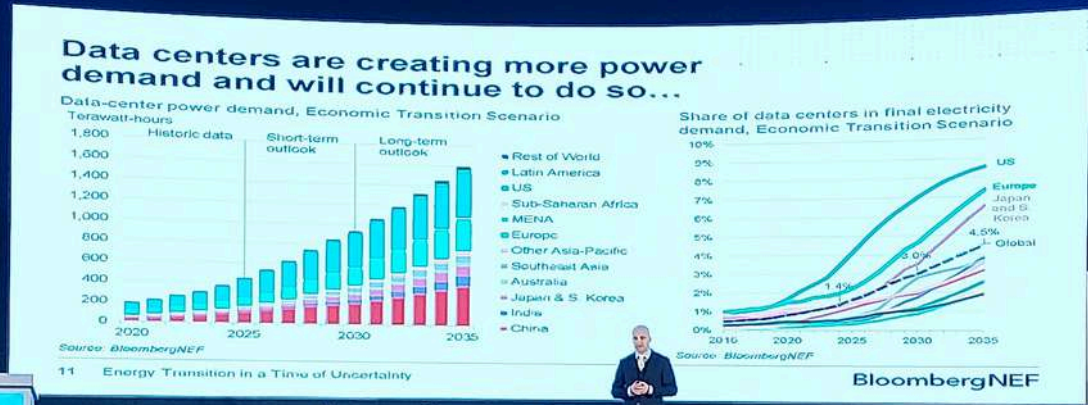

Key takeaways

- Prime location on key shipping lanes to Europe
- World-class solar and strong coastal wind potential
- Huge land areas for giga-scale H₂ projects
- Deep experience in energy exports and logistics
- Modern ports (Duaq, Sohar, Salalah) as H₂ hubs
- Political stability and long-term investment horizon
- Oil & gas revenues financing green hydrogen build-out
- Clear national strategy and targets for green H₂ and e-fuels
- Ideal supplier of green molecules for EU industry and shipping
- Strengthens Europe's energy security and diversification beyond LNG/OPEC

HMC 200 Centrifugal Mud Cleaner
Replacement for the traditional hydrocyclone desander/desiller

YES

NO

The existing desander, desiller or mud cleaner uses hydrocyclones as the core part for solid-liquid separation. This conventional equipment represent multiple disadvantages such as:

- High energy consumption (the cyclone driven by a 55KW or 75 kW sand pump).
- Unstable de-sanding effect (clogging, vibration, pressure instability, etc.) affecting the separation performance.
- Difficulties to control the liquid loss in the discharge flow causing high surface mud losses and high mud cost.

HMC 200 mud cleaner is designed to eliminate the above problems, since launched into market in 2019, more than 50 units are already implemented in China oilfield.

5 Significant Advantages

- Save cost: reduce equipment purchase cost, save parts, convenient maintenance & easy to use & down time.
- Speed up ROP: removing solids bigger than 45 microns avoid further break into small particles and thus cause viscosity increase.
- Stable performance: testing performance will not be affected by hydrocyclones wear, out, misalign, adjustment, mud viscosity change and centrifugal pump pressure loss etc.
- Simply process: flexible, portable and easy to use on the land/sea and etc.
- Larger separation equipment: speed and capacity can be adjusted by control panel to get different treating performance, avoid change of shaker screens and nozzles by hydrocyclones.

Technical introduction & specifications

The HMC 200 is similar to a large-diameter low speed centrifugal separator of its specially designed drum structure. It is suitable for large volume mud processing and it can remove sand/solids without reducing the mud weight when processing heavy mud.

- Drum Diameter: 650mm
- Motor Power: 55kw
- Driver: VFD or Hydraulic
- Speed: 350-1350 rpm
- G Force: 64-819G
- Capacity: 200m³/h (mud weight 1.1,800 rpm)
- Dimensions: 2330*1436*1800
- Weight: 3850 KG
