MINDCORE

ENTERPRISE

# The Command Center for your company

About Us

MindCore Enterprise is an AI-driven enterprise operating system built for leadership teams who need clarity, control, and execution discipline.
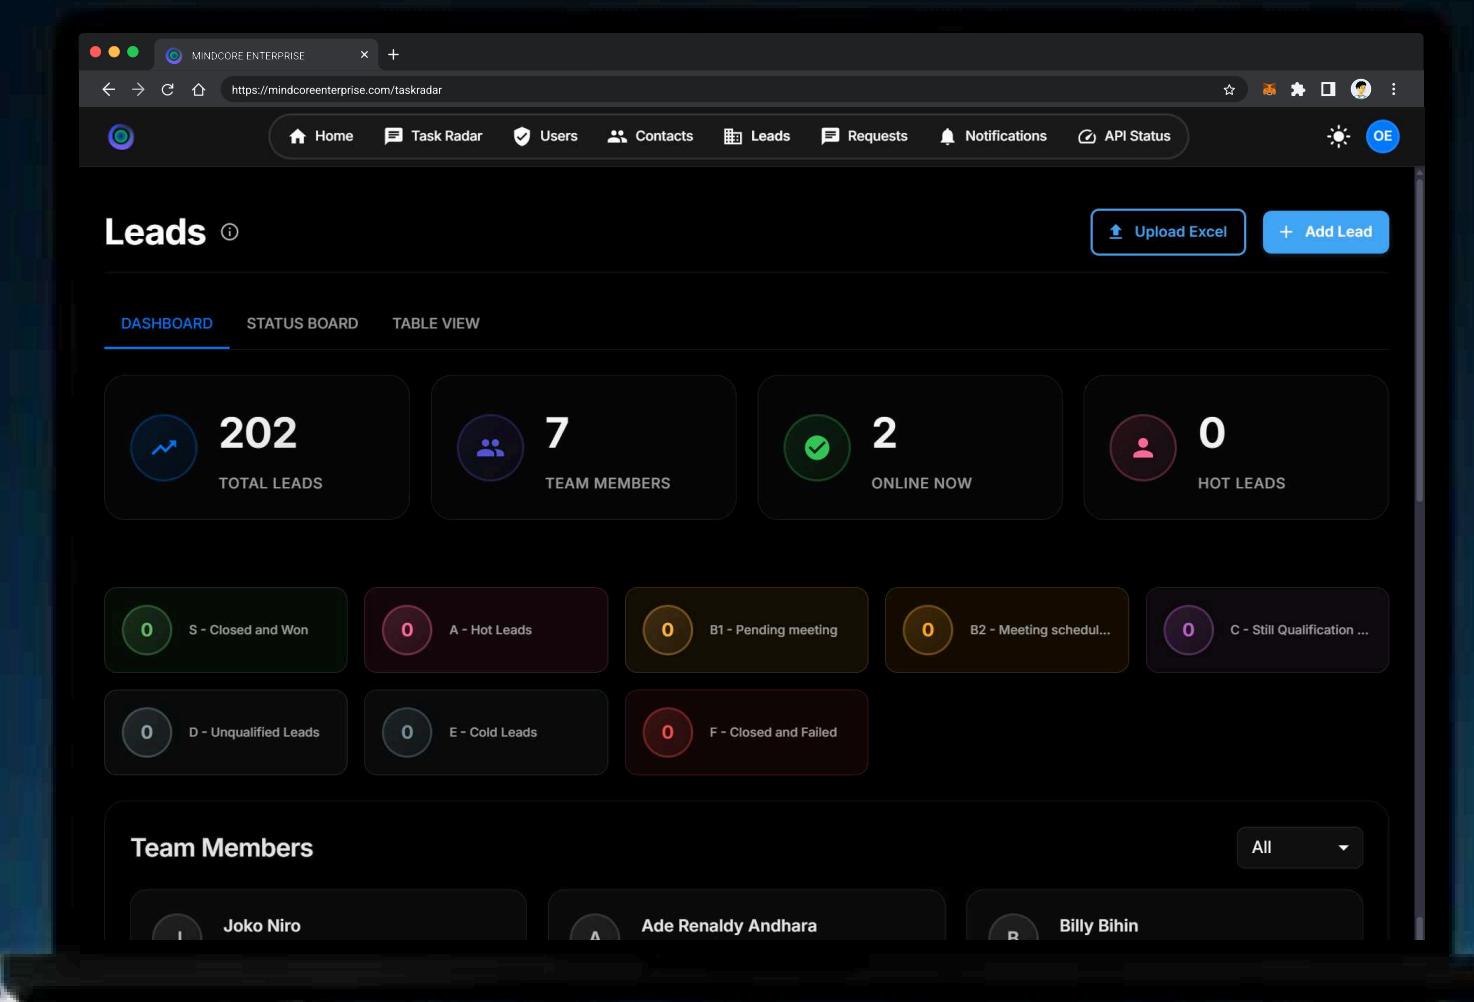

At its surface, MindCore looks like a simple chat interface. Underneath, it functions as a centralized command center connected to a company's tasks, people, approvals, and revenue pipelines.

Unlike standalone AI tools, MindCore orchestrates multiple leading AI models inside a governed system. It doesn't just generate answers. It enforces accountability, escalates risk, and turns decisions into action.

MindCore is designed for modern enterprises that value reliability over hype, execution over noise, and visibility over fragmented tools.

30% EFFORT WITH MORE THINGS DONE
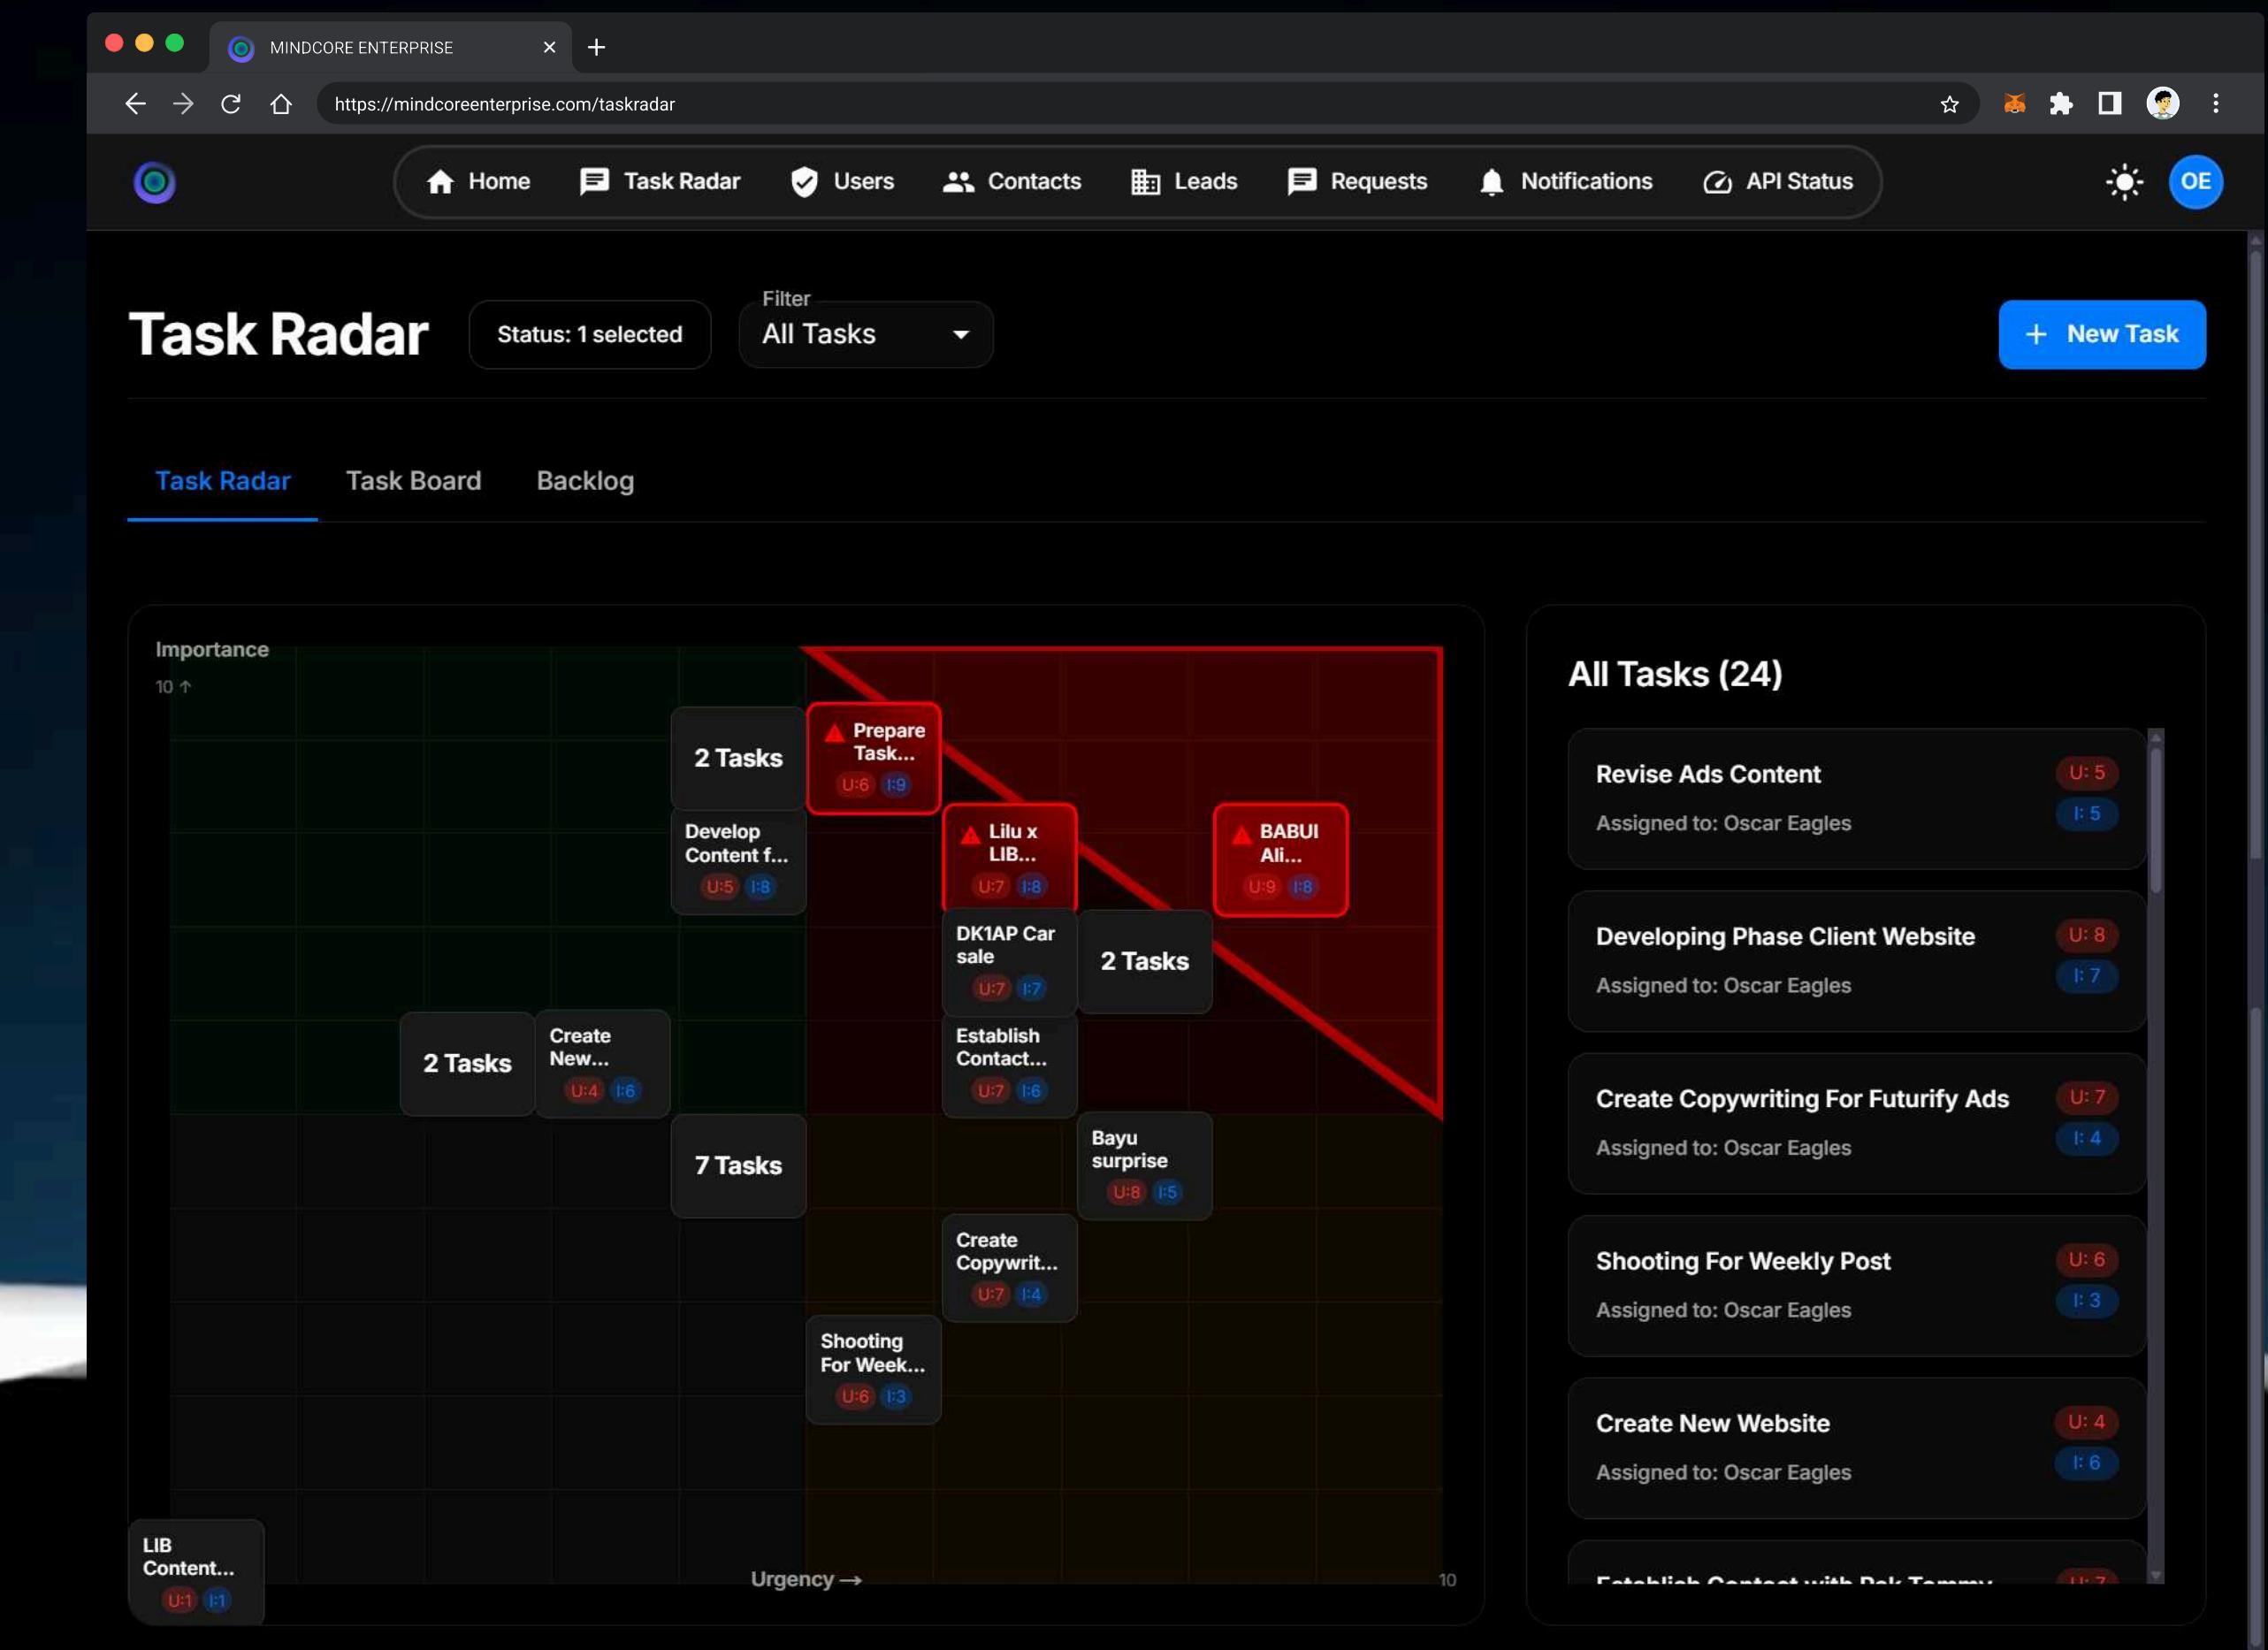

Why We Exist

Most companies don't fail because of bad ideas. *They fail because execution breaks silently.*

**Tasks
Stall**

**Leads Go
Cold**
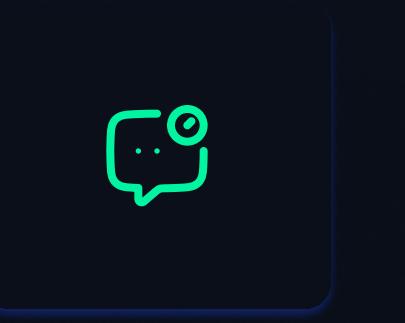

**Approvals
Get Delayed**

**Leadership
Loses Visibility**

At the same time, AI adoption has exploded but most AI tools live outside real workflows, creating more tabs, more uncertainty, and more risk.

MindCore exists to fix this gap.
- See what's happening across the organization in one click
- Trust AI outputs through multi-model validation
- Enforce execution rules without micromanagement
- Protect revenue through disciplined follow-up and escalation
- Maintain governance, auditability, and control

This is AI designed for operations, not experimentation.

Core Features

MindCore combines a centralized command interface, multi-model AI orchestration, execution discipline, revenue control, and governed approvals into one enterprise operating system giving leadership real-time visibility, enforced accountability, and trusted AI-driven execution.

Central Command Interface

A chat-like interface that instantly shows what's urgent, late, blocked, and risky—no dashboards needed.

Multi-Model AI Orchestration

MindCore runs multiple AI models in parallel, using internal voting to select the strongest output and reduce blind spots.

Execution Discipline System

Tasks follow enforced rules with deadlines, escalation, and non-deletable backlogs— ensuring full accountability.

Revenue Control Engine

MindCore controls sales pipelines with timers and auto-reassignment to prevent silent lead loss and protect revenue.

Governance & Approvals

Sensitive actions require approval with clear ownership, keeping AI under human control.

How We Think

MindCore is built on a simple belief: execution must be visible, disciplined, and governed. We design systems where nothing important fails silently, decisions turn into action, and AI is trusted because it is controlled.
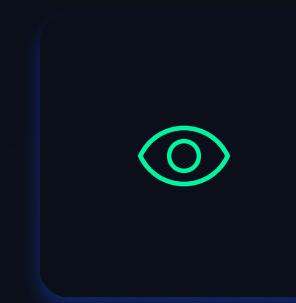

VISIBILITY BEATS INTUITION

AI MUST BE GOVERNED TO BE TRUSTED.

EXECUTION IS A SYSTEM, NOT A PERSONALITY.

NOTHING IMPORTANT SHOULD FAIL SILENTLY.
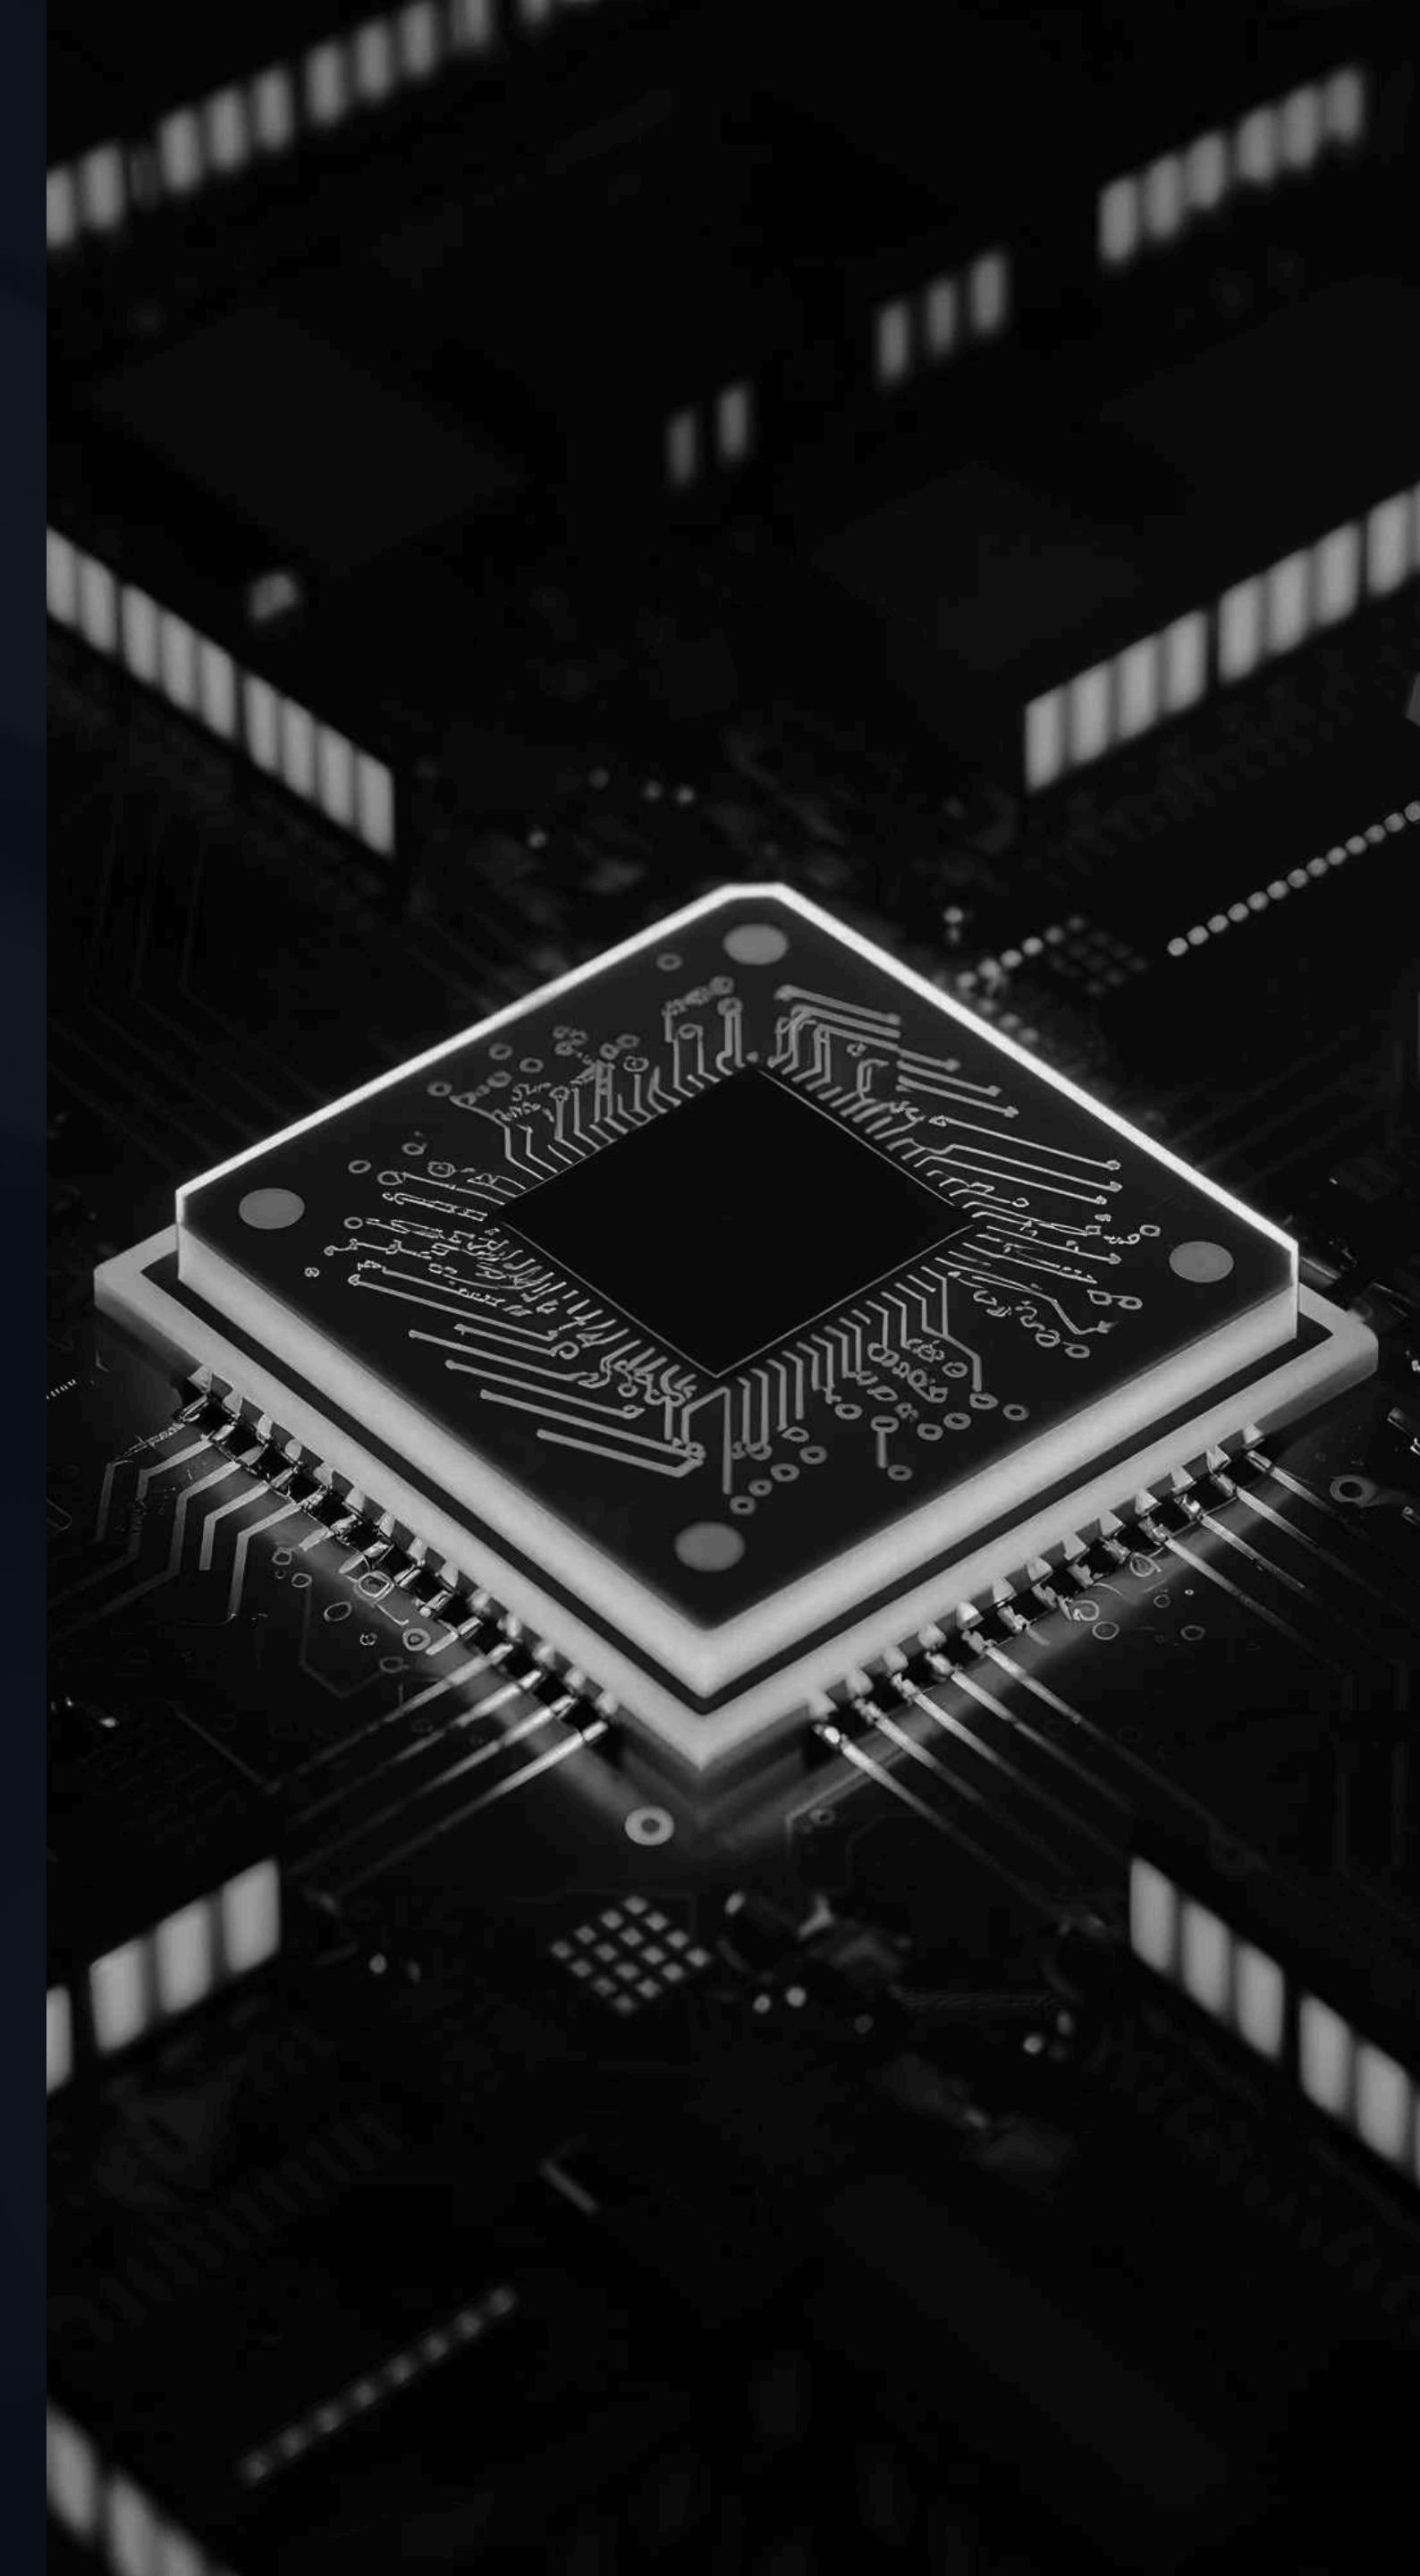

Who It's For

MindCore is built for leadership teams running complex, operations-heavy organizations who demand visibility, accountability, and execution without friction. It's for enterprises that value control over chaos and discipline over guesswork.

OPERATIONS-HEAVY ENTERPRISES

DISTRIBUTED TEAMS

SALES-LED ORGANIZATIONS

LEADERSHIP THAT DEMANDS ACCOUNTABILITY AND CLARITY

Pricing Plan

SOLO

$12/
user / month

Good for freelancers, founders, micro-teams

Max users
Up to 5 people (hard cap)

Apps included (only):
