A close-up photograph of a person's hand holding a thick, gnarled, light-brown root of an Ashwagandha plant. The root has many smaller, thinner roots branching off from it. The background is a blurred, dry, brownish ground.

ASHWAGANDHA

Introduction of Company

A circular logo featuring a stylized lotus flower with five petals in shades of brown, orange, and green, with a small sprig of wheat to the right.

At Satvic Trading Company, we proudly stand as a global force in the export of premium-quality health products. Rooted in the rich agricultural heritage of India and backed by deep knowledge of Ayurvedic traditions, we have established ourselves as a trusted name in delivering nature's finest ingredients to the world. With a relentless focus on quality, authenticity, and global health needs, we specialize in sourcing, processing, and exporting natural wellness products that cater to the rising demand for clean, sustainable, and effective health solutions.

80+
farmers

Our strength lies in our deep grassroots connection — partnering directly with over 80 dedicated farmers across India, who follow sustainable and chemical-free farming practices.

AMLA

Products and Services

We specialize in exporting a premium range of natural health products including Ashwagandha Powder, Shatavari Powder, Ginger Powder, Amla Powder, Moringa Powder, Chia Seeds, and Jaggery (Powder & Cubes).

Beyond supplying quality products, Satvic Trading Company offers end-to-end export solutions tailored for international buyers. Our services include:

Products

premium-quality Ashwagandha Powder, Shatavari Powder, Ginger Powder, Amla Powder, Moringa Powder, Chia Seeds, and Jaggery (Powder & Cubes) — all 100% natural and health-focused.

Services

We offer complete export solutions including custom packaging, private labeling, international logistics, customs clearance, documentation, and client support to ensure smooth global delivery.

Support

We ensure every buyer receives complete export readiness including COA-certified products, shelf-life & storage guidelines, flexible MOQs for sampling, fast air freight options and customized export documentation as per destination requirements.

Sustainable Farming Practices and Initiatives

Sustainability isn't a choice — it's our responsibility.

We source our raw materials from certified organic farms using regenerative agriculture and chemical-free practices. Our farming partners are supported through training in soil health, water conservation, and ethical harvesting techniques.

We promote:

- **Fair trade practices**
- **Women-led farming cooperatives**
- **Zero-waste production models**
- **Plastic-free and compostable packaging initiatives (on request)**

A tall moringa tree with green leaves and small yellow flowers against a blue sky.

MORINGA

A single green moringa leaf with a prominent vein structure.

Research and Development

Innovation drives us. At Satvic, we invest consistently in product testing, research, and documentation to meet international safety standards and consumer preferences.

Our R&D team works on:

- Nutrient profiling
- Shelf-life optimization
- Herbal blend formulations
- Certification support (USDA Organic, FSSAI, ISO, etc.)

We ensure each product is lab-tested, traceable, and globally compliant.

Soil Health Improvement

We use organic compost, crop rotation, and natural inputs to restore soil fertility and maintain long-term productivity.

Agroecology Practices

- Our farms follow eco-friendly methods like multi-cropping and natural pest control to promote biodiversity and reduce chemical use.

JAGGERY

Future Plans and Goals

As we look ahead, our mission is clear —
To become the world's most trusted and largest exporter of health-focused natural products by 2030.

**Setting up a
dedicated
herbal
extraction unit**

**Develop On-Site
Eco-Lodging**

**Enhance Soil
Health Research**

SHATAVARI

- We source directly from our own network of over 80+ verified farmers.
- All our batches come with COA, lab tests, and full traceability from farm to pack.
- We follow strict non-negotiable quality standards — we don't mix, we don't compromise.
- Our products are FSSAI-approved, and we also assist in Organic, USDA, or EU certification if required.
- MOQ is flexible for serious buyers. We prefer long-term relationships over one-time business.
- We believe in ethical pricing, fair trade, and building mutual growth — not undercutting the market.
- You'll get timely updates, real photos/videos of packing, and transparency at every step.
- We are open to video audits, third-party inspections, or even real-time farm visits.
- We don't just export products — we deliver trust with every shipment.
