COB (Chip-on-Board) lights are an advanced LED lighting solution known for their high brightness, energy efficiency, and uniform illumination. Unlike traditional LEDs, COB technology integrates multiple LED chips onto a single substrate, reducing glare and providing a smoother, more consistent light output. These lights offer excellent heat dissipation, ensuring a longer lifespan and stable performance. Available in various wattages, color temperatures, and beam angles.

Pop-up COB lights are a modern and versatile lighting solution designed for enhanced aesthetics and functionality. These lights feature a unique adjustable mechanism that allows the COB module to "pop up" from the fixture, providing focused illumination where needed. With high brightness, energy efficiency, and excellent heat dissipation, pop-up COB lights ensure long-lasting performance and superior light quality.
