

## Constant Aircraft Noise

To Lori Tolland; J. Brower County Manager; Joyce Shanahan City of O.B. Manager;  
jason.leslie@ormondbeach.org

Wed 6/25

Good Morning, My name is J B , 35+ year Ormond Beach resident and local business owner.

I'm sure you are all well aware of the Continuous noise issue with flight school aircraft over our neighborhood From before 7:00am to well into the evening, Including weekends and holidays!

It seems after 3:00 in the afternoon it gets much worse with aircraft flying directly over our homes with no regard for the disturbance they are creating, The CONSTANT noise is Violating county noise ordinances. and also our Right to Quiet Enjoyment (law)

Sunrise aviation seems to be the ones to continually ignore the noise abatement program followed by Phoenix aviation and Embry Riddle.

When the instructors fly in a clockwise pattern the noise is tolerable.

I realize wind and sun are an issue and cannot be avoided.

As the population is growing in this area as is the need for pilots there has to be a solution.

\*Can the flight pattern be changed to fly over a less populated area? With FAA approval?

\*Can the flight times be limited to business hours including weekends?

\*Can landing fees be increased to make this airport less busy?

\* Change to a Mandatory Noise Abatement Program with oversight and penalties?

\* Why do other schools have to fly here instead of their own airport?

Please consider addressing changes to control this constant and very annoying noise issue over our community.

Thank you for your time.

J B
