Ceramic Coating \$400

What is a Ceramic Coating?

Ceramic coating is a semi-permanent coating that is applied to the exterior of your vehicle to protect against external paint damage. It is a nanoscopic paint treatment that's applied in liquid form, but cures to form a hard layer over your vehicle's paint. Ceramic coating provides a strong, protective surface on your car's body that works to block all foreign matter from causing damage to your car. It can withstand a significant amount of damage without showing any visible effects on your car, such as fading, oxidation, and chemical staining.

- **Clay Bar Decontamination**
- **Paint Polish (Maximizing the shine/Gloss preparing for Ceramic Coating)**
- **Ceramic coating**
- Thorough Exterior Hand Wash
- Wash & Wax

3 Step Paint Correction \$400

What is a Paint Correction?

Paint correction is an auto detailing procedure that removes hazing, minor scratches, marring, swirl marks, and other blemishes on the vehicle's clear coat. It does this by using specialized machines and polishing compounds to slowly remove microscopic layers of clear coat until the surface is smooth again.

- **3 Step Paint Correction**
- **Clay Bar Decontaminate**
- **CUTTING/BUFFING/POLISHING (Maximizing the shine/Gloss)**
- **Plastic Trim Restoration**
