“Rural Institute of Poultry Management & Technology” was established in the year of 2007 at Gudur as Poultry Training Centre. The major emphasis is to concentrate on training and extension activities in Poultry Farming. The main aim of this training programme is providing of self-employment opportunity as well as if industry needs such talented, skilled persons they may taken up by different companies to serve the poultry industry. It's an intensive practical oriented scientific Poultry Farming training programs in these programs we practically train the students in different fields like Anatomy, Nutrition, Management and Diseases.

Job Sources in Industry:

Poultry industry is an agro based linked industry with other industries. In this industry job sources are huge because of this industry contains a greater number of sub interrelated branches like

Indian poultry industry employs more than 300,000 poultry farmers and 15 million agrarian farmers who grown poultry ingredients for feed and contributes 26,000 cores to the national income. India is the 3rd largest producer of egg and 4th largest producer of meat. In India production cost is very cheaper when compared to other country.

Poultry is a labor intensive and has a potential to create 25,000 more jobs on the consumption of one more egg per capita and similarly 25,000 additional jobs on the consumption of 100gm more chicken meat. Poultry sector is estimated to employ around 1.6 million people due to increasing demand.
