

ALTA® Wireless Duct Temperature Sensors

General Description

The [ALTA Wireless Duct Temperature Sensor](#) uses an NTC thermistor with 2.67 meter (8') lead wires to accurately measure temperatures in duct work, while maintaining a sealed environment. It can be easily installed and mounted for long-term use.

Key Features

- Measurement Range: -40°C to 150°C (-40°F to 302°F)
- Resolution: 0.1°C (0.18°F)
- Standard Accuracy (at 25°C): $\pm 1^\circ\text{C}$ ($\pm 1.8^\circ\text{F}$)
- Calibrated Accuracy (at 25°C): $\pm 0.25^\circ\text{C}$ ($\pm 0.45^\circ\text{F}$)
- Accuracy over temperature range: see table below
- Configurable thresholds for critical condition monitoring

Principles of Operation

The ALTA Wireless Duct Temperature Sensor measures duct temperature based on a user-configurable time interval or Heartbeat. When performing a measurement, the sensor momentarily energizes a thermistor in series with a precision resistor. This produces a voltage directly proportional to the temperature of the thermistor. The sensor converts the analog voltage signal to a digital value and computes the temperature measurement. On every Heartbeat, the sensor reports its current measurement to the gateway, making the data available in iMonnit or other approved data services.

The ALTA Wireless Duct Temperature Sensor also can be calibrated for improved accuracy.

Example Applications

- Air duct temperature monitoring
- HVAC operation & testing

Commercial-Grade Sensors

Monnit commercial-grade sensors are designed for applications in ordinary environments (normal room temperature, humidity, and atmospheric pressure). Do not use these sensors under the following conditions, as these factors can deteriorate the product characteristics and cause failures and burnout.

- Corrosive gas or deoxidizing gas: chlorine gas, hydrogen sulfide gas, ammonia gas, sulfuric acid gas, nitric oxide gas, etc.
- Volatile or flammable gas
- Dusty conditions
- Low-pressure or high-pressure environments
- Wet or excessively humid locations
- Places with salt water, oils, chemical liquids, or organic solvents
- Where there are excessively strong vibrations
- Other places where similar hazardous conditions exist

Use these products within the specified temperature range. Higher temperatures may cause deterioration of the characteristics or the material quality.

Industrial-Grade Sensors | Type 1, 2, 4, 4X, 12, and 13 NEMA-Rated Enclosure

Monnit's industrial sensors are enclosed in reliable, weatherproof NEMA-rated enclosures. Our NEMA-rated enclosures are constructed for indoor and outdoor use and protect the sensor circuitry against the ingress of solid foreign objects like dust and the damaging effects of water.

- Safe from falling dirt
