XIV International Workshop on Nonlinear Elasticity in Materials

June 1-5, 2009

The conference is designed to stimulate interactions among researchers in nonlinear elasticity. The main themes to be addressed by con

- elastic nonlinearity
- geophysical applications of elastic nonlinearity
- nonlinear, nondestructive testing
- time reversal
- time reversal nonlinear elastic wave spectroscopy

Other themes within the wide scope of nonlinear elasticity will be considered (please contact the organizers)

Call for Papers

Contributions on the conference themes are welcome. Abstracts of at most 300 words should be sent before March 31, 2009 under any of the following topics (see the list of topics in the call for abstracts). The full paper must be submitted by May 15, 2009. Accepted contributions will be published in the Proceedings of Meetings of the Acoustical Society of America and must be presented at the event by one of the authors.

Hotels

LNEC has contracted, with several hotels, special prices for persons attending seminars and similar events that LNEC organizes. However, LNEC does not give any endorsement and LNEC has no financial interest in the contract between a person attending an event and any listed hotel. Likewise, LNEC does not guarantee that a hotel may not eventually be found through a travel agent.

June is the beginning of high-season in Lisbon and during this event another International congress will be taking place at LNEC / LISBOA (ICNEM 2009, June 28-30, 2009, 800. So, people attending ICNEM are very strongly encouraged to make reservations as soon as possible by contacting the hotel directly. The discount is granted to "LNEC- Laboratório Nacional de Engenharia Civil".

Hotels often check with LNEC on such reservations and so if you are not yet registered for the event, we kindly request that you make known your reservation made to your name at a listed hotel.

Organizing Committee

Carlos Pina (LNEC)- Chairman

Nuno Azevedo (LNEC)

Jan Carmeliet (ETH Zürich / EMPA)

Dominique Derome (EMPA)

Paul Johnson (LANL)

Michele Griffa (EMPA)

Miguel Abreu (LNEC)
