

“Teaching the Instagram Generation” Creating AI-Powered Micro-Teaching Content

by Dr. Ümit Yakar
Lecturer / Educational Technologist

@THELAWBREAKINGPRO

Everything about Micro-Teaching

1. Introduction to Micro-Teaching

- **Definition:** A teacher training technique where educators deliver short, focused lessons to practice teaching strategies, receive feedback, and refine their skills.
- **Origin:** Developed in the 1960s by Dwight Allen and others to improve teacher education.
- **Purpose:**
 - Develop teaching skills in a controlled environment.
 - Allow for focused feedback and reflection.
 - Enhance confidence and effectiveness in the classroom.

2. Why Micro-Teaching is Effective for Today's Classrooms

- **Fast-Paced Learning Needs:** Students, especially the "Millennial Generation," prefer quick, engaging, and visually stimulating content.
- **Active Learning:** Micro-teaching breaks lessons into short, interactive segments, increasing retention.
- **Immediate Feedback:** Teachers and students can quickly evaluate and refine their approaches quickly.

Phases of a Micro-Teaching Session

• 5-10 minutes long.

• Focus on a specific teaching skill (e.g., questioning techniques, classroom management drills).

• Conducted by teachers, mentors, or students in a controlled setting.

• Immediate feedback is given, followed by reflection and planning.

• **Rehearsal:** Teachers repeat the lesson, integrating feedback.

Micro-Teaching Cycle

1. **Planning:** Identify a skill to practice (e.g., giving instructions clearly).

2. **Teaching:** Deliver a lesson with a specific objective (e.g., teaching past tense verbs).

3. **Observation:** Observe a small group (peers or students).

4. **Feedback:** Receive feedback on skill (e.g., using realia and visuals for vocabulary).

5. **Reflection:** Self-reflection provide constructive criticism.

6. **Improvement:** Plan to be analyzed for improvement.

Doomscrolling

Memory Retention Loss

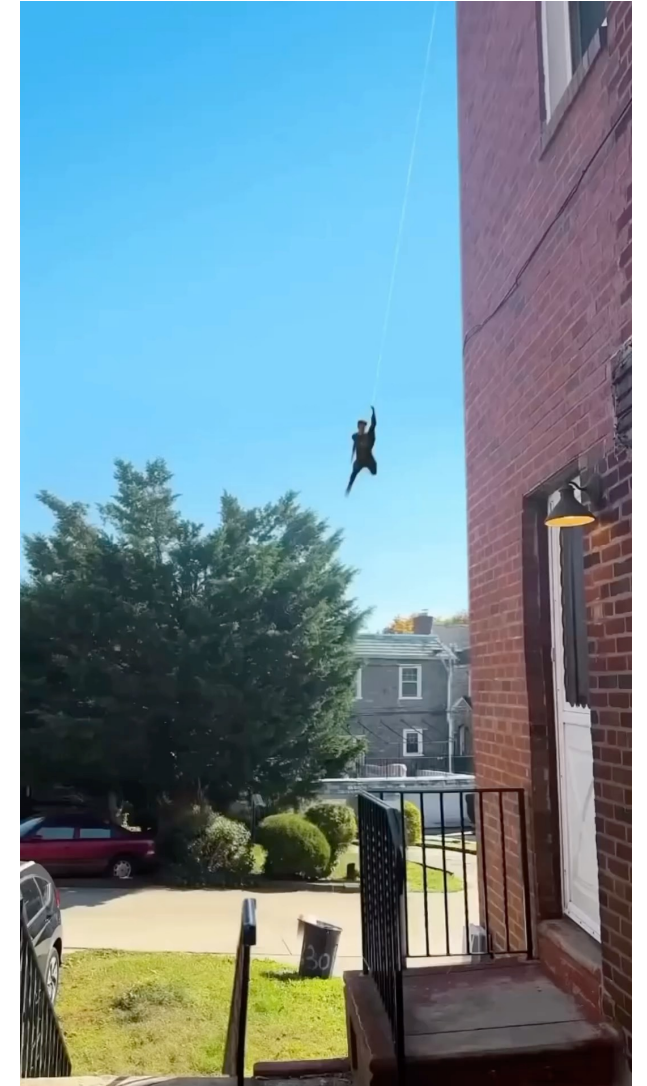

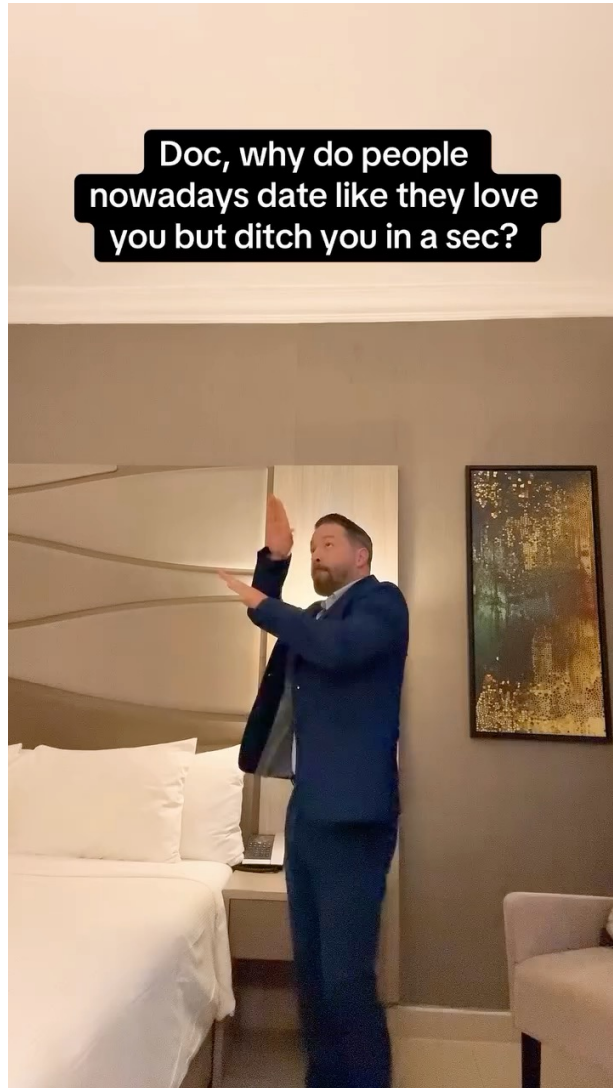

- The rapid intake of information overloads the brain, making it difficult to process, store, and recall information effectively.

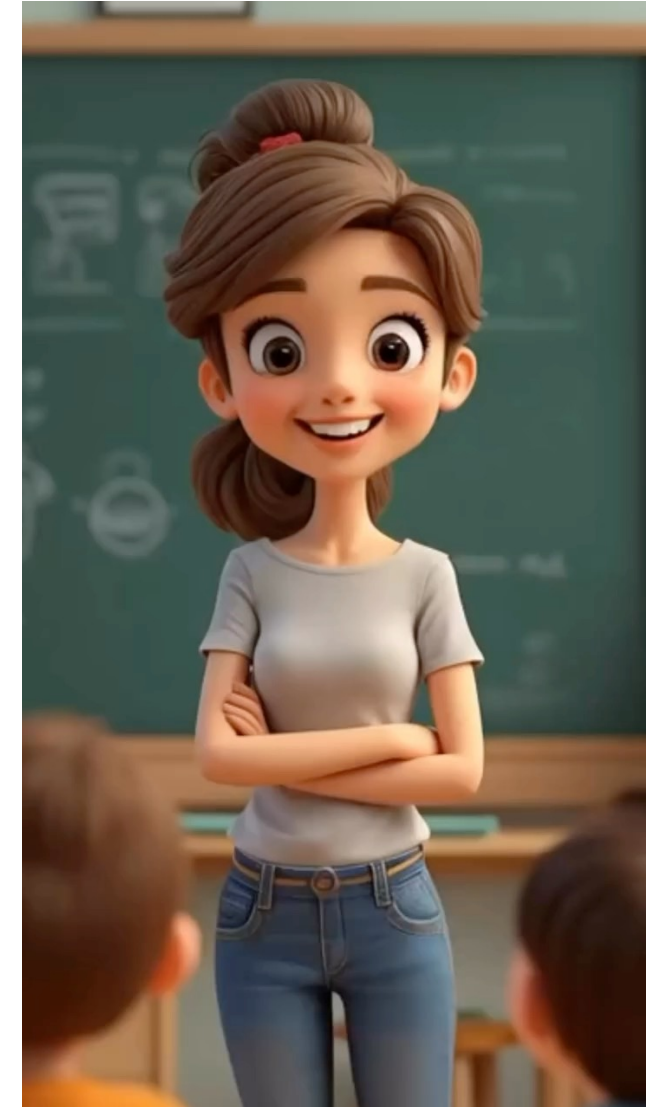

Attention Span Decline

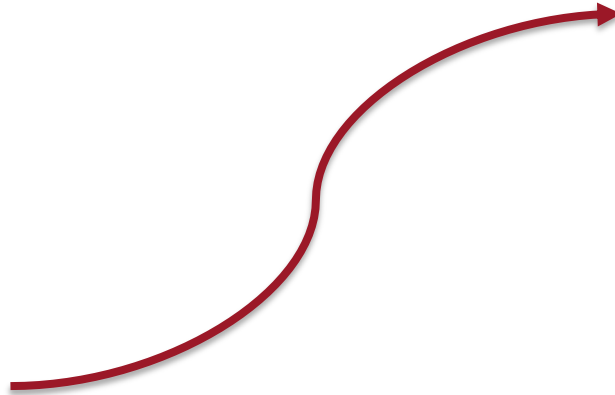

- Constant scrolling conditions the brain to expect quick bursts of information, making it harder to focus on deep learning or long-form content.

Shallow Engagement

- Scrolling encourages passive consumption rather than active engagement, reducing critical thinking and meaningful interaction with content.

Tongue Twisters

**Targeted**

Lessons are designed for a specific skill or concept

Concise

Brief, to-the-point, time-efficient

Engaging

Captures attention through short and active delivery

Interactive

Involves learners actively, even in a short time

Sharable

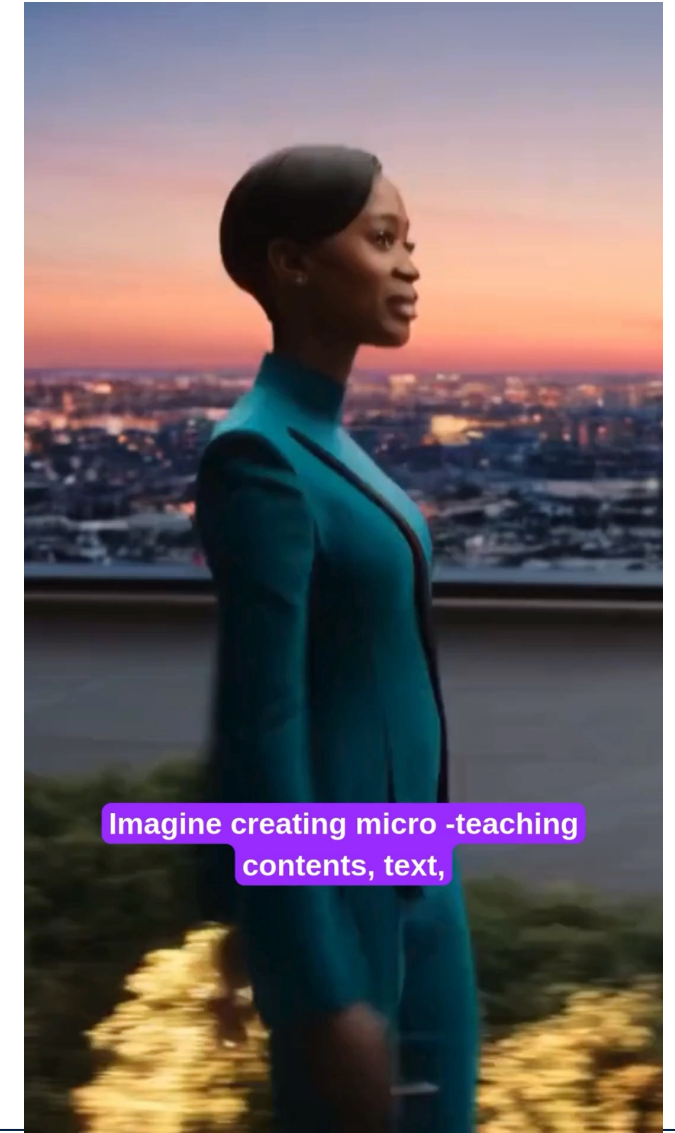

Easily reusable, adaptable content

Adaptive

Can be modified for different learner levels and needs

Repetitive (in a good way)

Allows for practice, trial, and refinement

Chat GPT

Functions

- Topic/Vocab/Level Based Texts
- Modify authentic text as smaller texts
- Prompt production for Image/Video
- Voice/Video Scripts
- Tongue twisters
- Repetition exercises
- Tests/Quizzes
- Grading/Feedback

Alternatives

- Deep Seek
- Gemini
- CoPilot

Hedra

KREA.ai

Elevenlabs

Hailuo.ai

Canva

KREA.ai

Functions

- Make images for a set of vocabulary
- Discussion starter images
- Create images for a short story
- Illustrate real-life situations
- Generate scenes from different cultures
- Create characters

Alternatives

- OpenArt
- Leonardo.ai
- Midjourney
- ChatGPT
- Runway

Hands on!

1. Go to chatGPT (login with gmail or other email services)
2. Write this prompt:
»Give me an image creation prompt for my avatar. My character is a _____ (animal/character e.g. pikachu). My style is _____ (outdoor/elegant/robotic/futuristic). I feel _____ (a feeling). Eating my favourite food which is _____ , in my favourite place, _____»

For example:

»Give me an image creation prompt for my avatar. My character is a Zebra (animal/character e.g. pikachu). My style is Professional, casual smart. I feel energetic. Eating my favourite food which is Cotton Candy , in my favourite place, under the noterhn lights»

Hands on!

Prompt created by ChatGPT

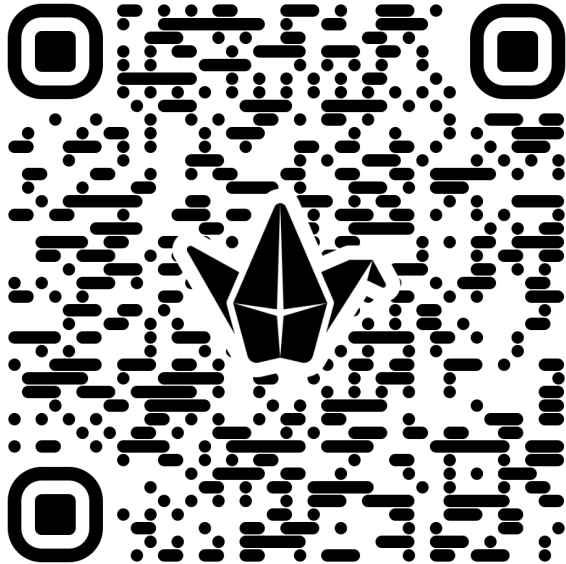

A stylized, cartoon-style zebra character with expressive eyes and a friendly smile, dressed in a smart-casual outfit (blazer over a t-shirt, relaxed trousers, and sneakers), sitting relaxed on a rock under the glowing Northern Lights. The zebra is joyfully eating pink cotton candy, with one hoof holding the candy and the other resting casually. The background features a scenic arctic landscape with pine trees, snow-dusted ground, and the vibrant aurora lighting up the sky in green and purple waves. The mood is playful, energetic, and serene—capturing the character's unique charm and favorite moment.

Image

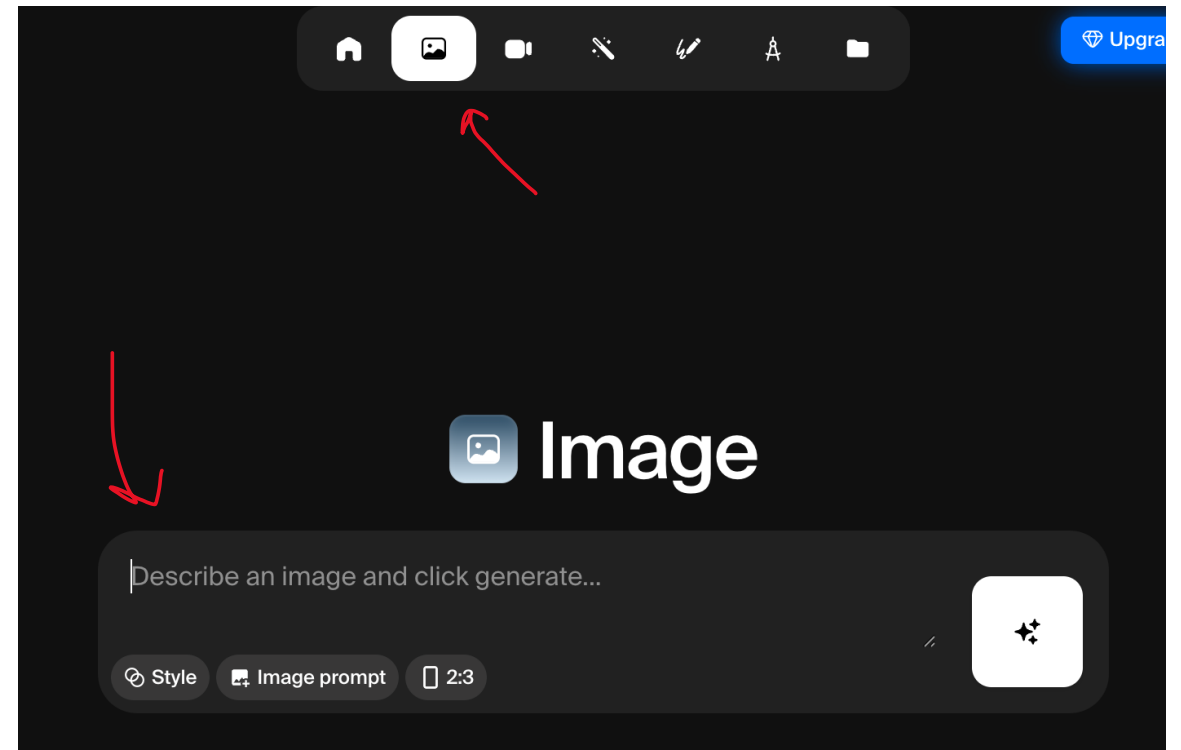

Let's try it!

- Copy the prompt from ChatGPT and Go to Krea.ai
- Log in with Google or other email services.
- Paste your prompt.
- Download the image you liked most.
- Post it on Padlet

Hedra

Alternatives

- Sora
- Kling
- LumaLabs
- Krea.ai
- Runway

Hailuo.ai

Functions

- Trigger mini discussions
- Deliver micro video instructions
- Repetition & practice drills
- Create dialogue clips with characters
- Simulate real-world scenarios
- Animated grammar or concept explainers
- Student-created storytelling videos

Elevenlabs

Chat GPT

Canva

Elevenlabs

Alternatives

You don't need alternatives 😊

Functions

- Create listening tasks with clear AI voices
- Generate dialogues in various situations
- Model pronunciation and phonics
- Read texts aloud for accessibility & instruction
- Give audio instructions
- Create tongue twisters

Chat GPT

Canva

KREA.ai

Hailuo.ai

Hedra

Functions

- Put everything together
- Merge/split videos/voices
- Edit images/videos
- Add subtitles automatically
- Slow/speed voices

Canva
