

EFFICIENCY COST CALCULATOR

**TASK INVENTORY AND ESTIMATED DOLLAR COST
CALCULATIONS TO SEE IF IT'S TIME FOR AUTOMATION.**

EFFICIENCY COST CALCULATOR

Hello from **Foodist** powered by Dorian Solutions! We help businesses unlock their growth, and scale through process efficiency and strategic application of technology. And over the last two decades we've had the opportunity to help hundreds of businesses streamline and modernize their business processes.

The **Efficiency Cost Calculator** is one of our favorite tools. And we've used it to help our clients identify inefficient processes, recover the costs associated with them, and remove barriers to scalable growth through smart, targeted use of technology.

Without a calculated approach, many business owners come to accept a variety of manual processes as "necessary evils" without knowing the true cost. And then spend time wondering if there was a better, more efficient path.

But after you've created an inventory of these manual processes, you'll know how and where these inefficiencies are costing you money, causing you to miss growth opportunities, and impacting the health of your business.

Break through to the next level today!

MANUAL TASKS	HOURS PER DAY	COST PER HOUR	AVG COST PER DAY	AVG COST PER MONTH	AVG COST PER YEAR
Managing and updating inventory expiration dates and inventory prioritization due to spoilage.					
Hunting down account statuses and information for customer support.					
Collecting data, compiling reports & distributing data to make informed decisions (Data visibility).					
Managing / storing / securing hard-copy paperwork.					
Frequent inventory reconciliations.					
Documenting and tracking product processing issues.					
Addressing incomplete / inconsistent / erroneous information on order and inventory documentation.					
Entering the same data in multiple locations.					

Enter the time spent per day and cost per hour for the tasks above. Use the blank lines to add any additional tasks you want to evaluate.
