

Career Paths

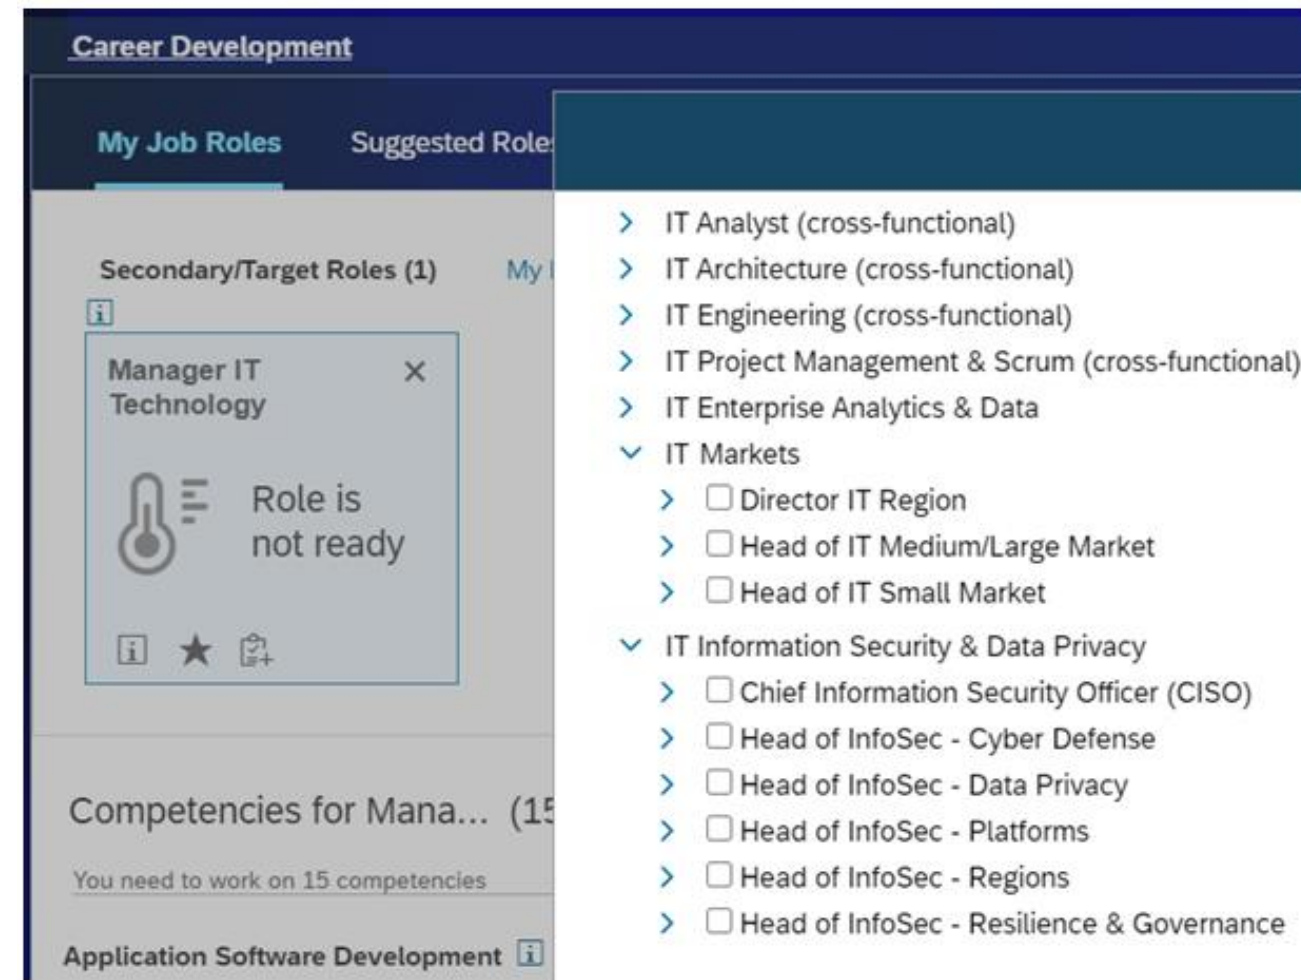

Business Case

The Client's organisational climate data revealed that employees do not consider that career development and career growth are an organisational priority. This had significant negative impact in talent attraction and retention, with constraints reaching from weak EVP perception, high turnover rates, low 'intention to stay' from top talent, and potential reputational damage.

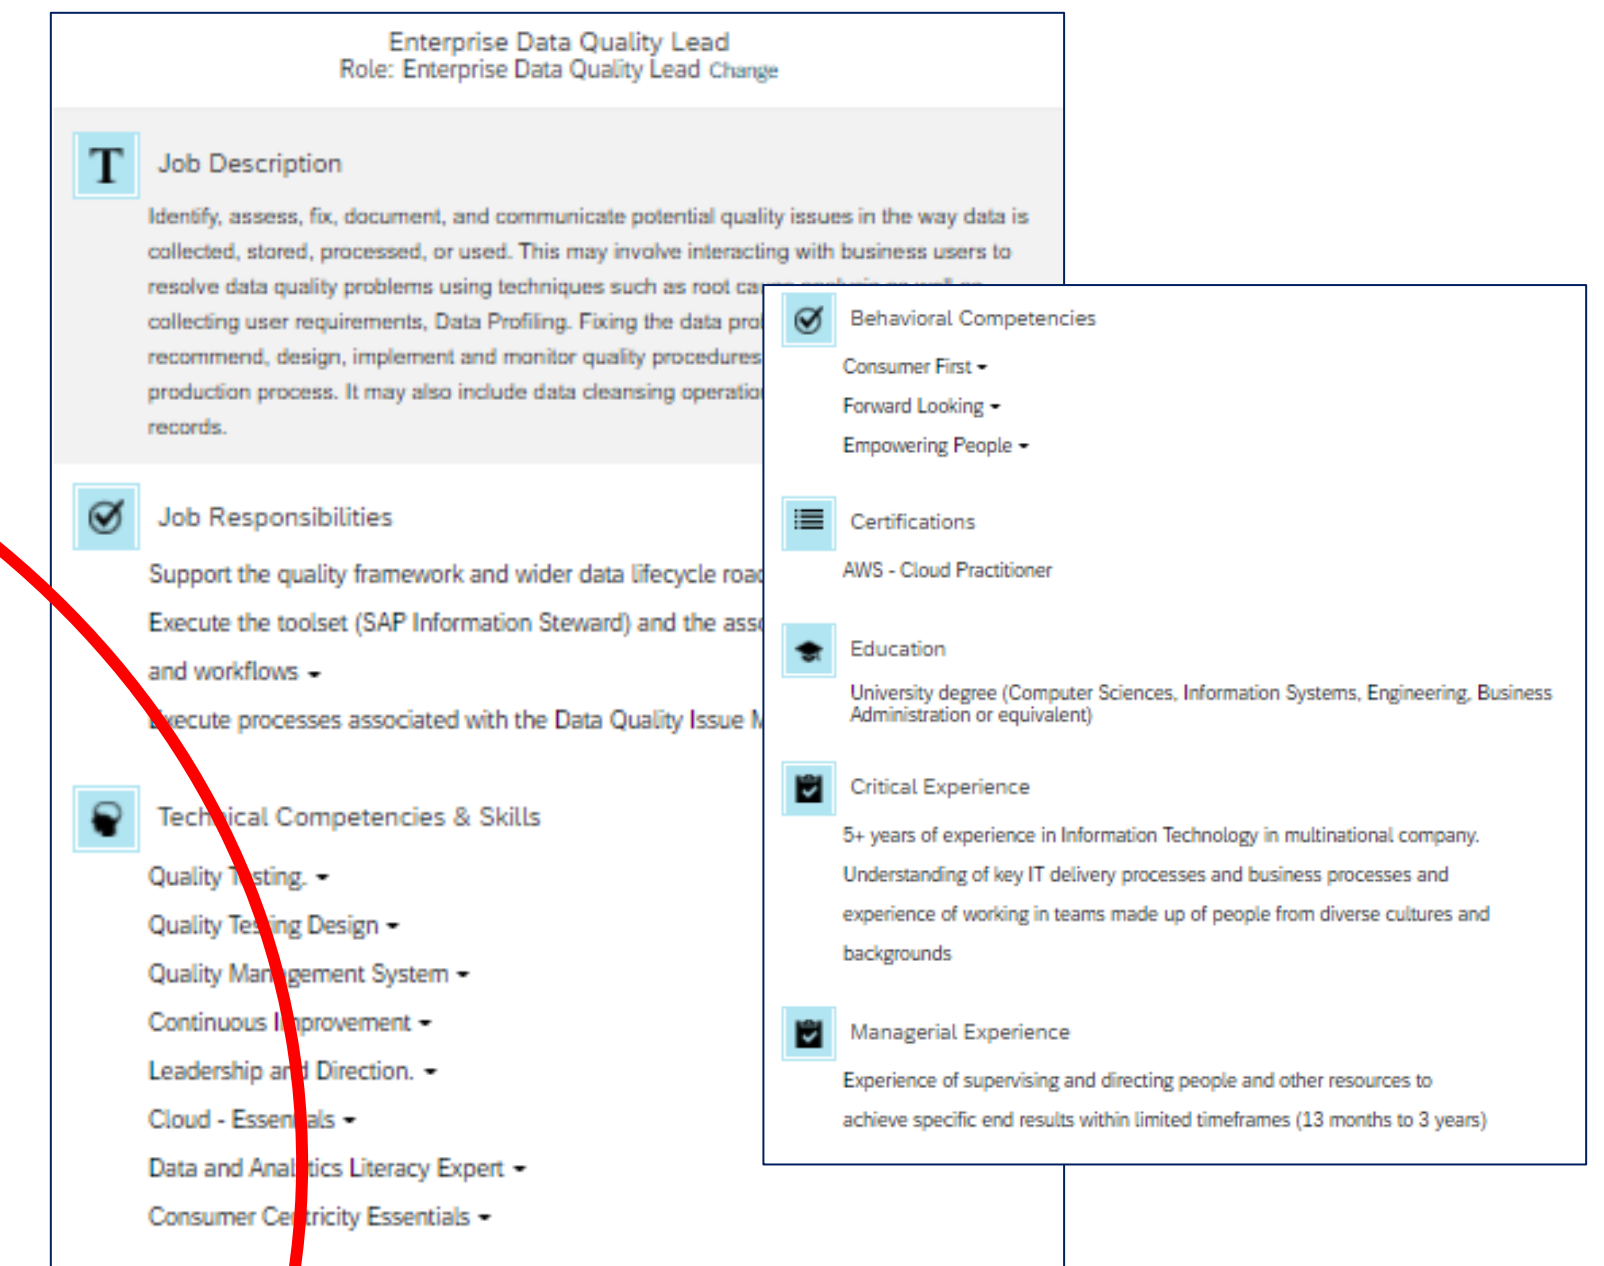

Deliverables / Outcomes

- Job catalogue optimisation (an upstream requirement)
- Job Profiles update (an upstream requirement)
- Organisation-wide portfolio of career paths
- Retention rate at 6-18months increased from 65% to 87%
- Top talent intention to stay increased 10pt., to 82%
- 'Perceived employability' increased from 2.7 to 4 out of 5

Creating an up-to-date Job Catalogue for each Function

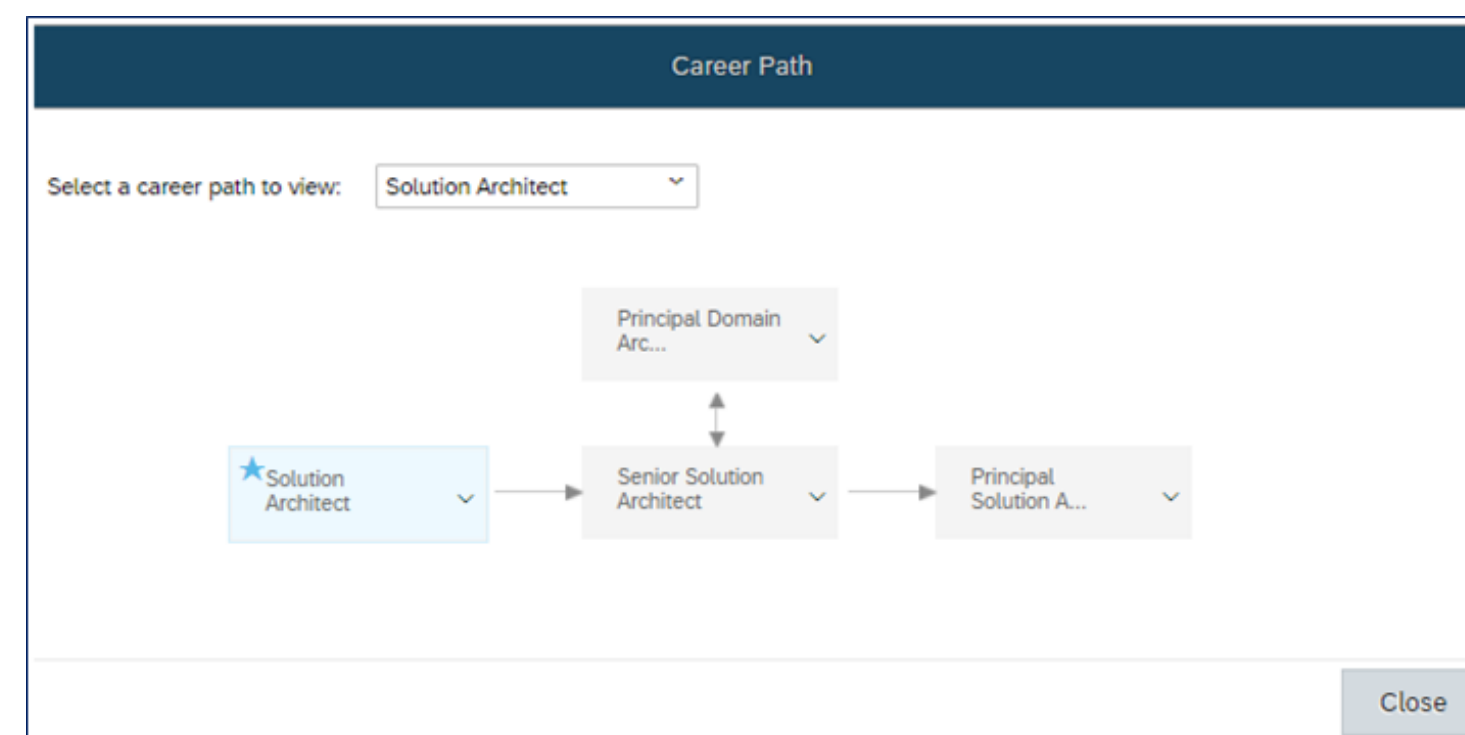

Updating Job Profiles, for an accurate view of role requirements

Career Paths Design Process

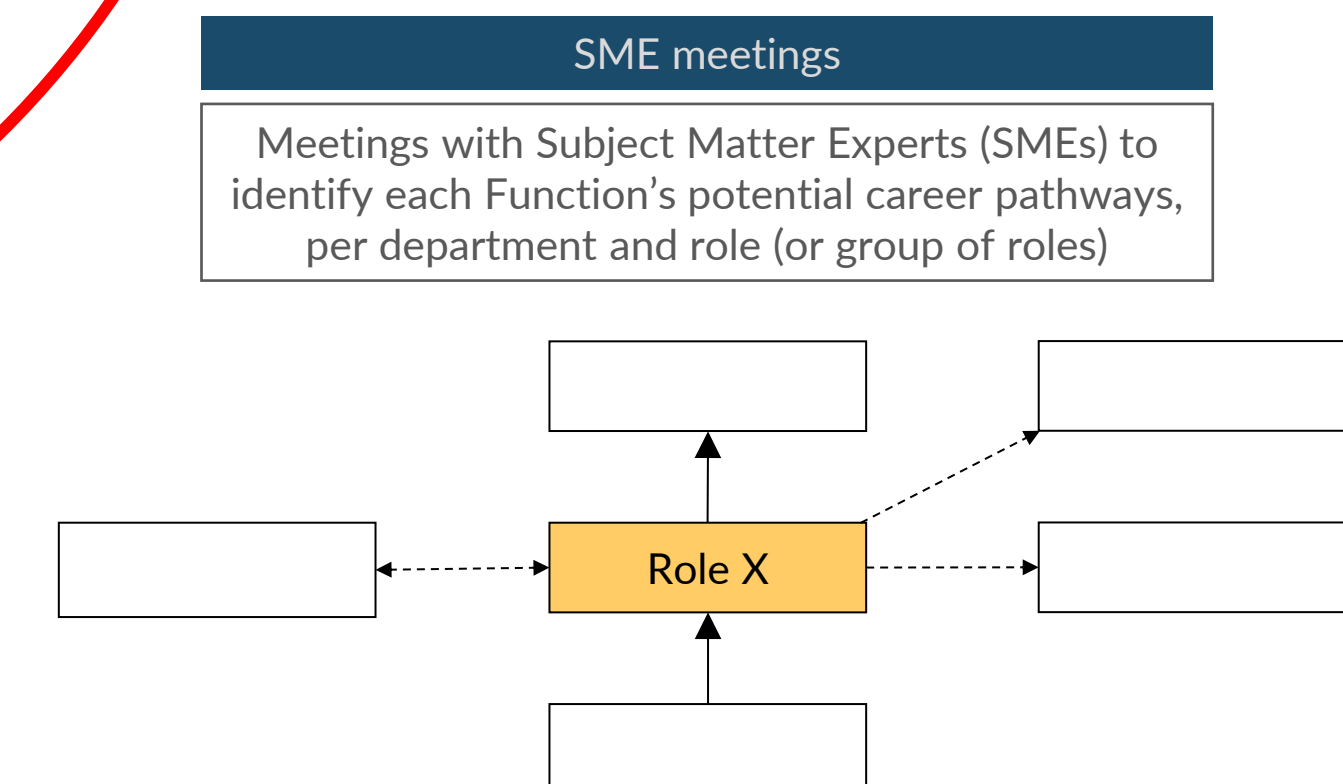

“What good looks like”: the competencies, skills and qualifications

Career Paths integration & HRIS uploading

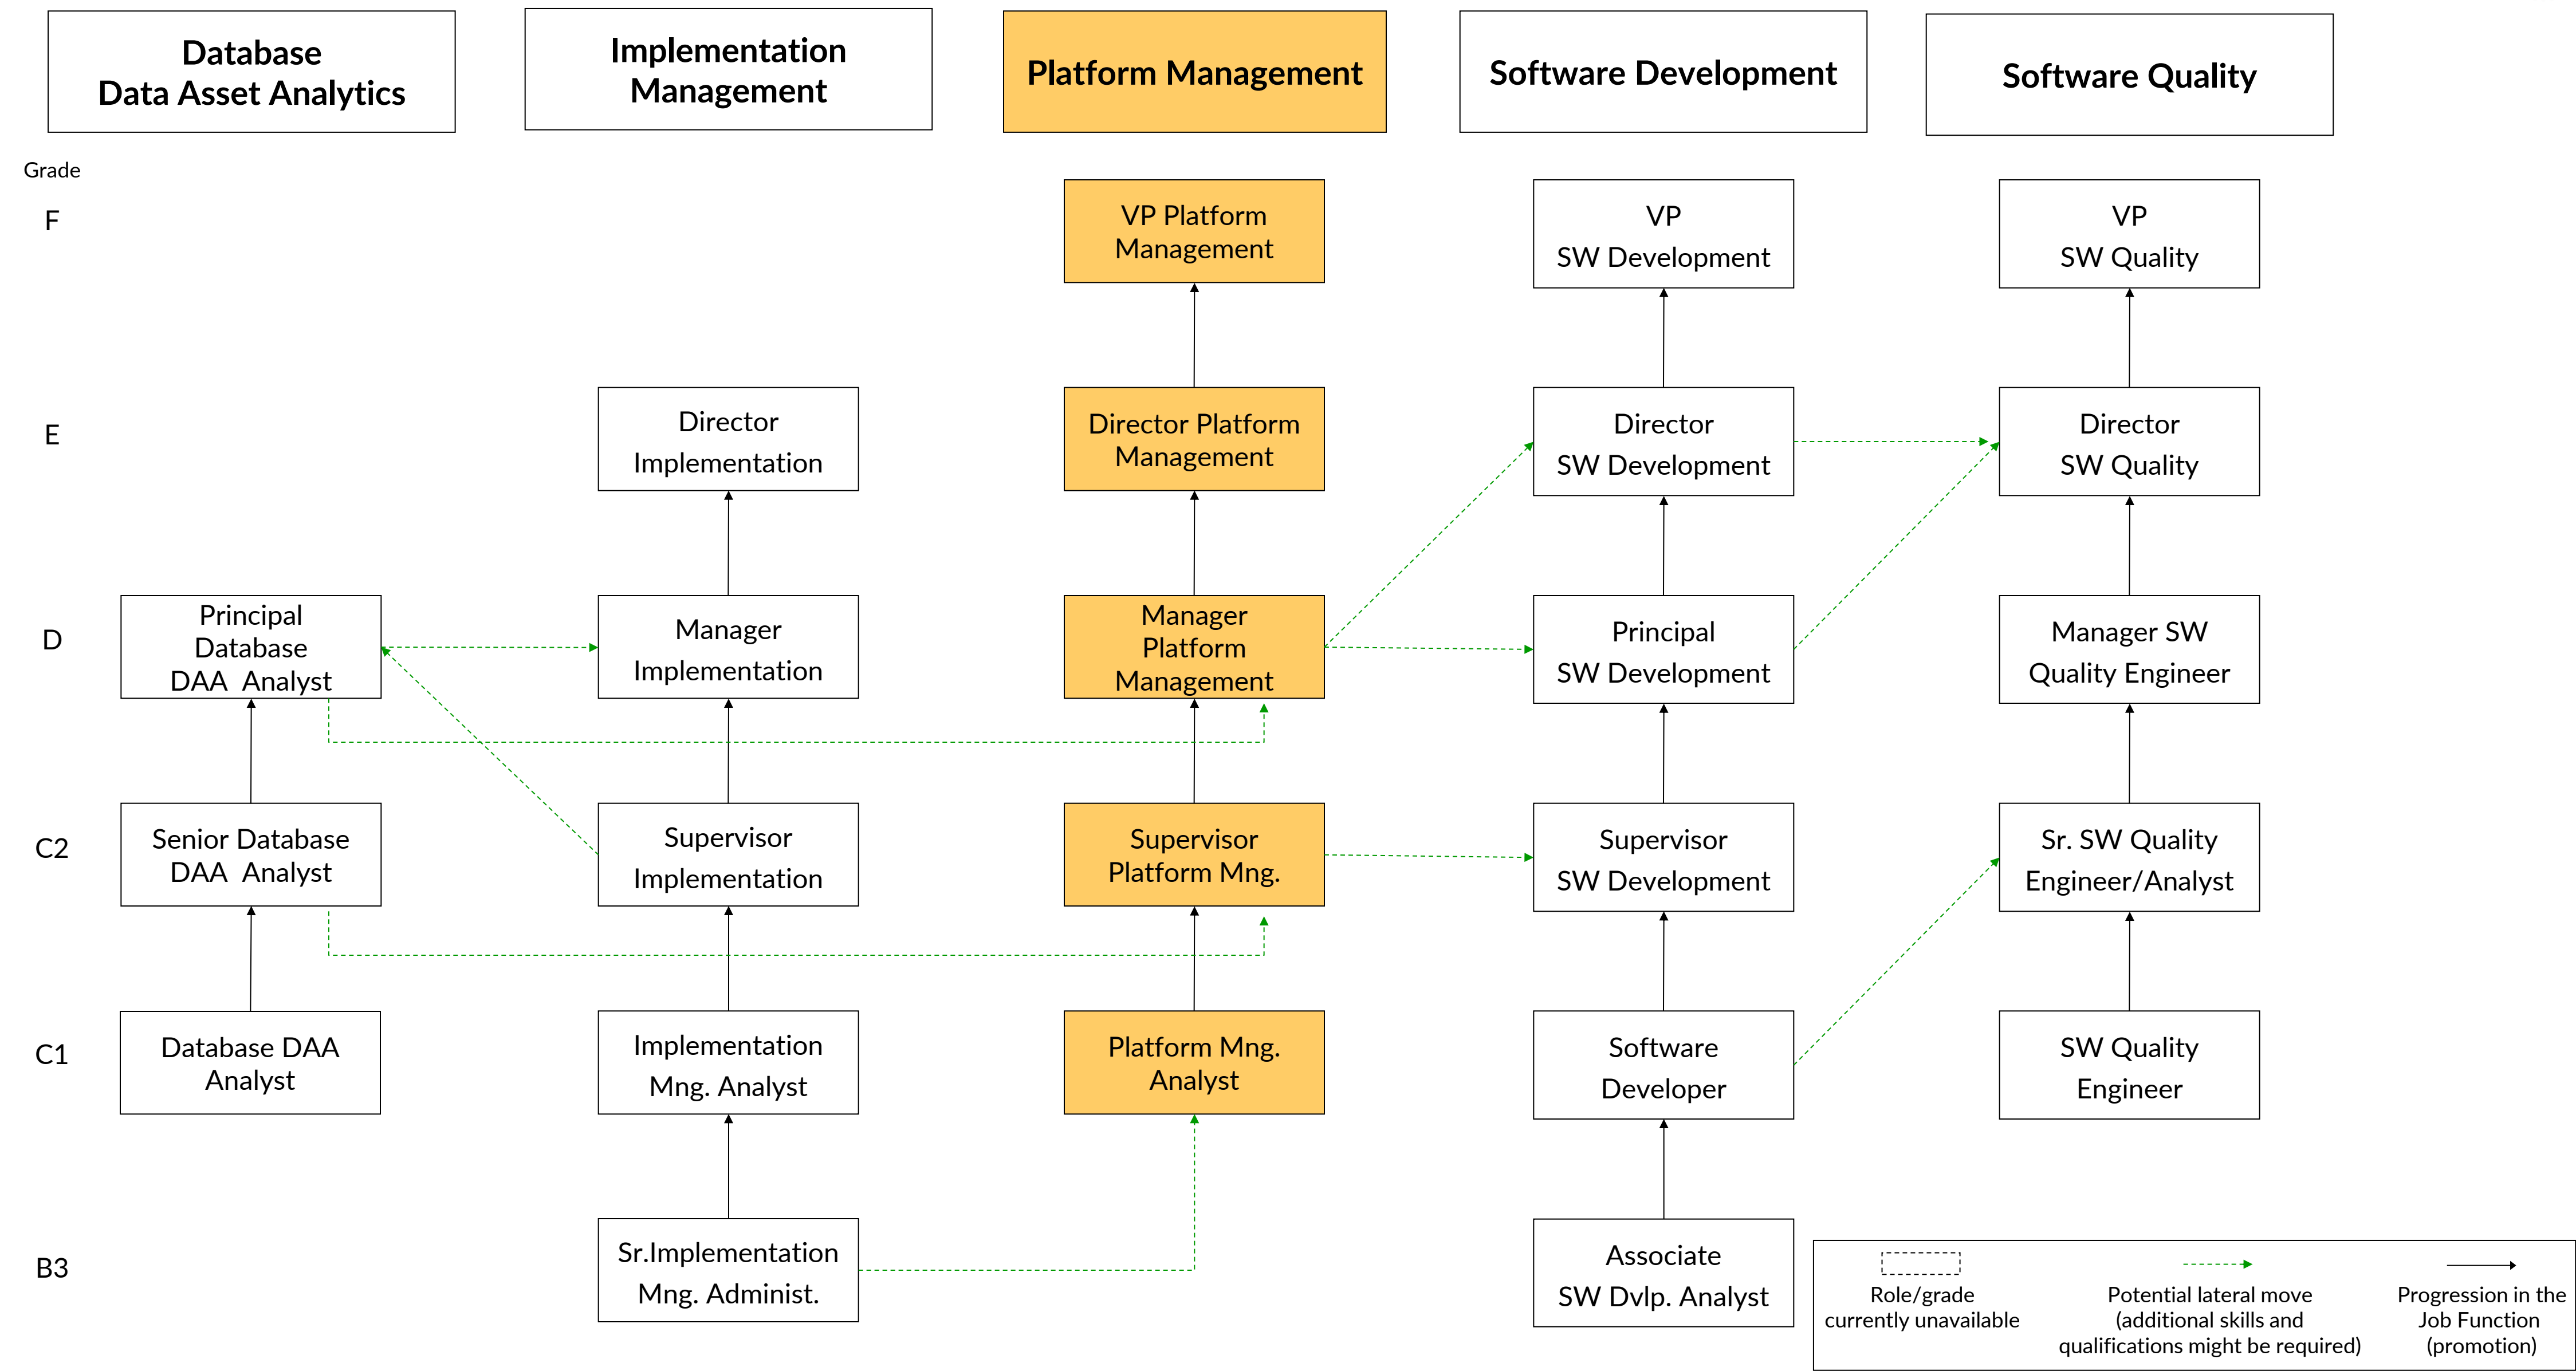

The career paths become multi-Function thus employees can visualise potential movements across the full organisational structure (examples on pages 3-5)

Co-creation with Function's SMEs

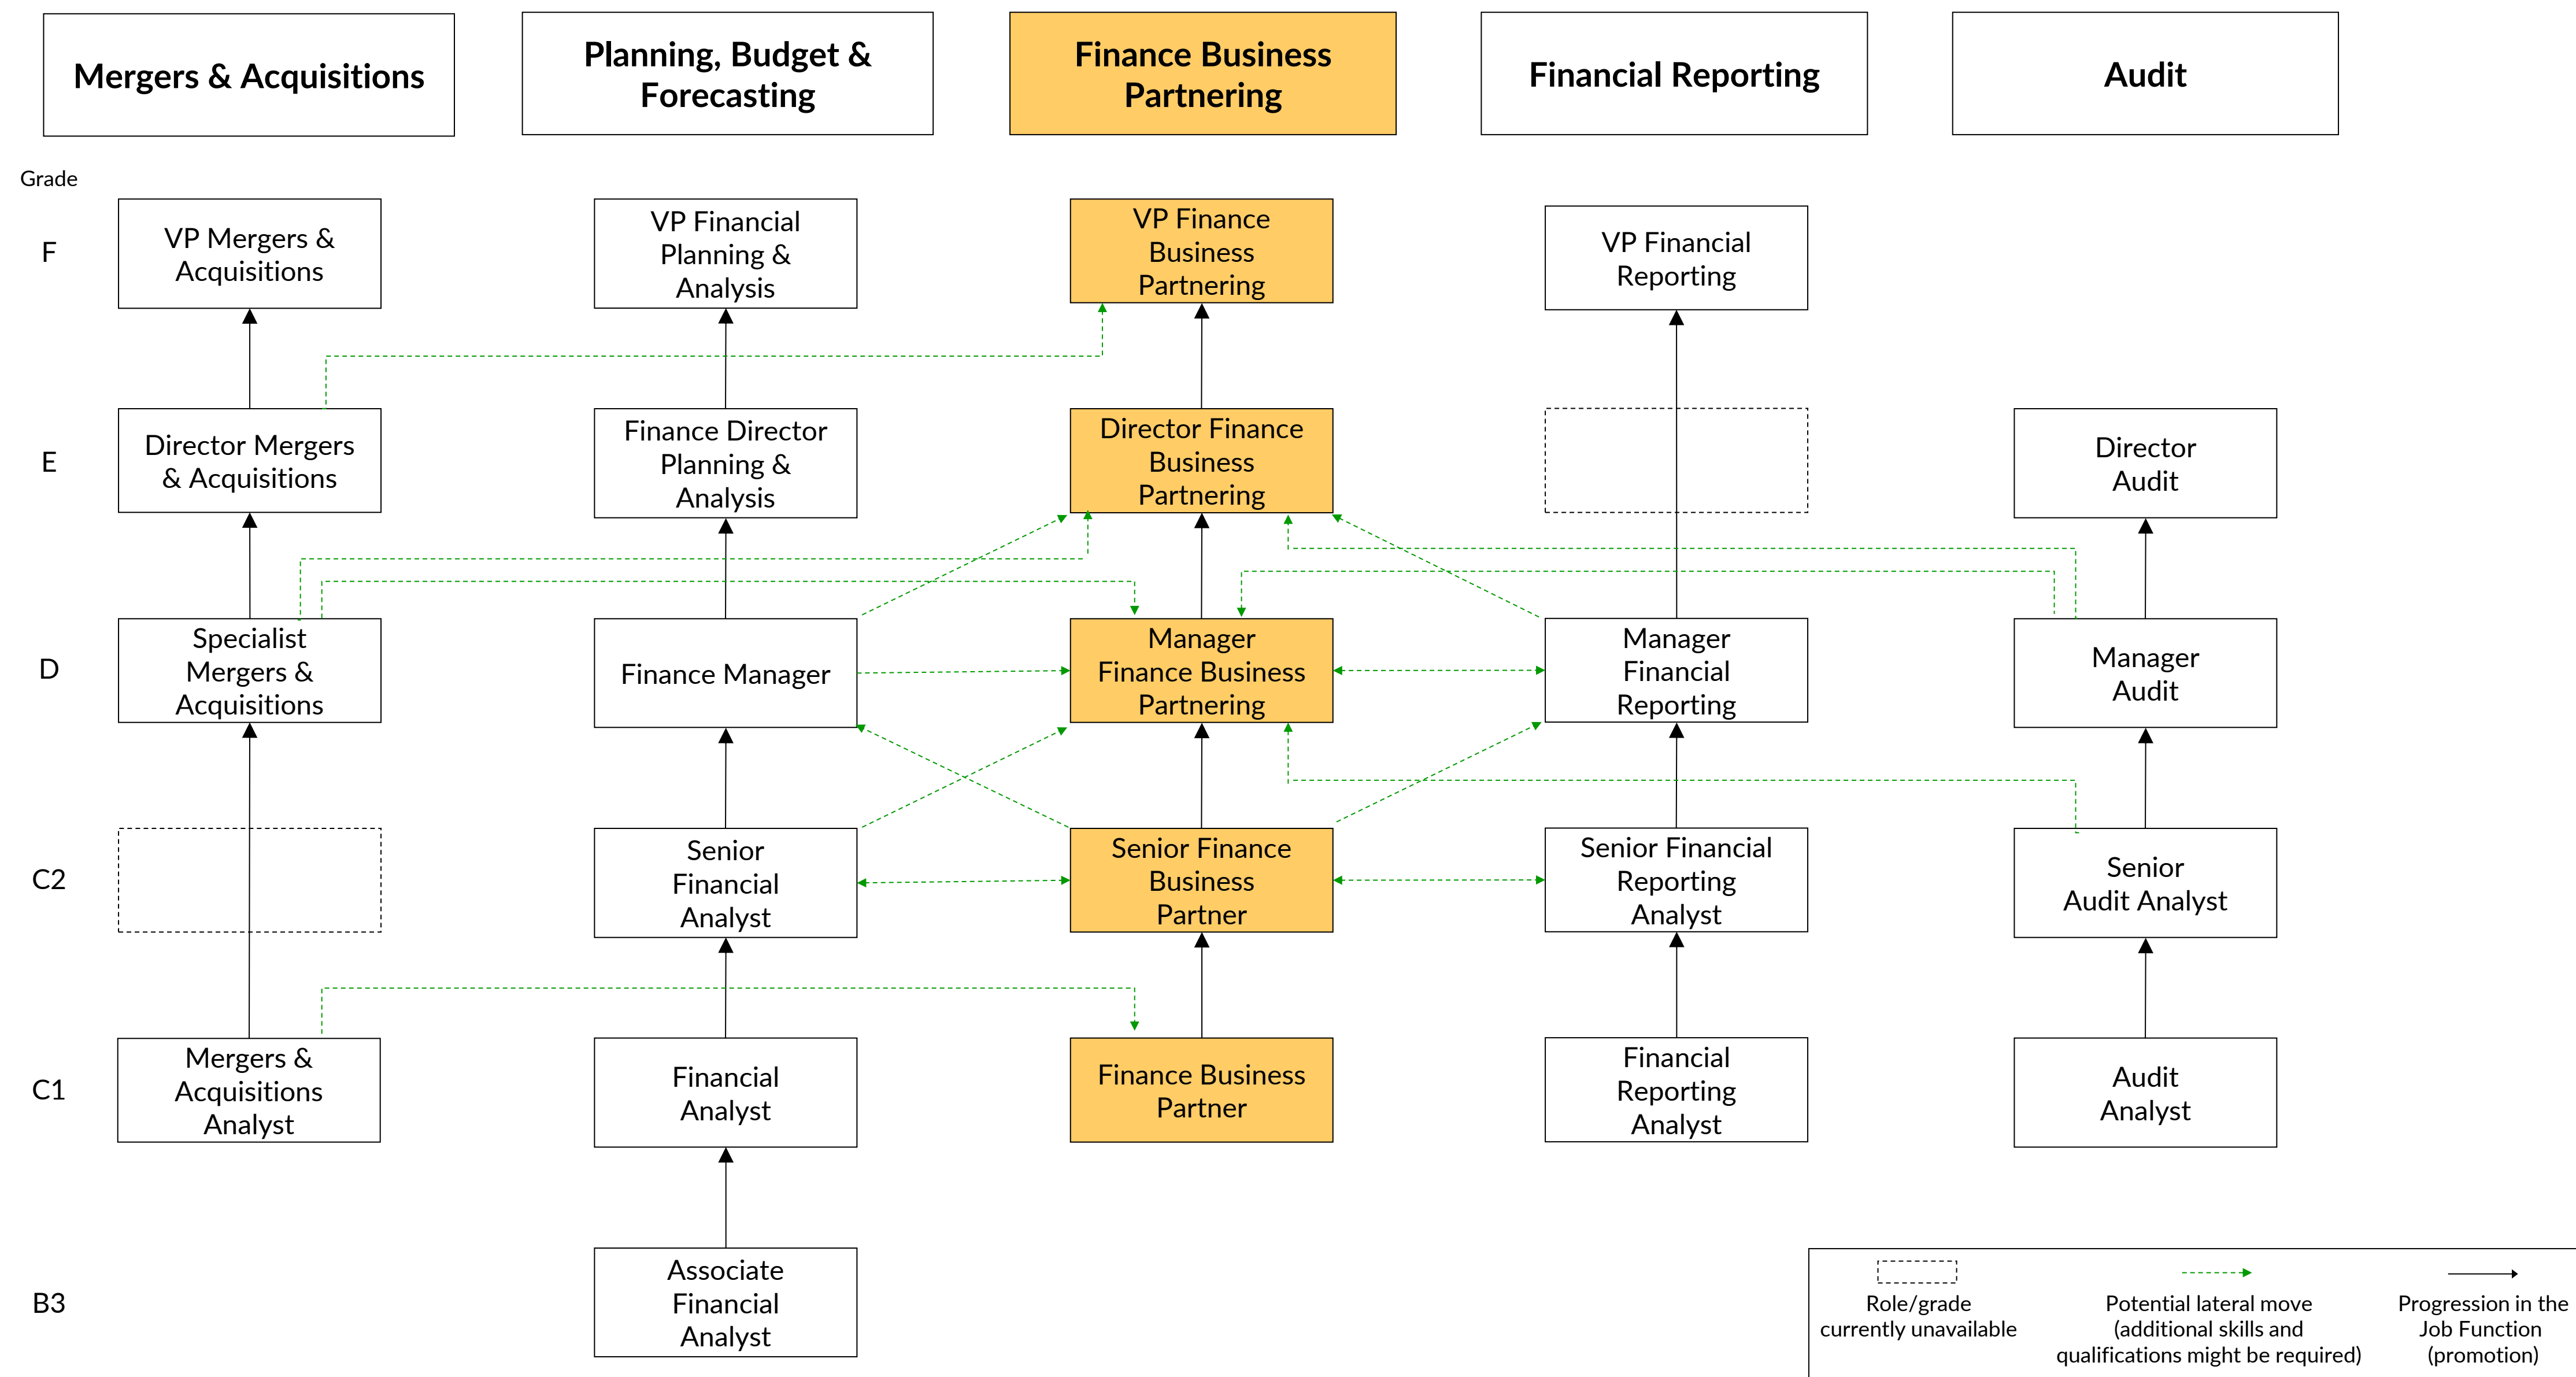

The career paths display information about potential vertical or lateral moves
