

Talent Development Ecosystem

- design & gap assessment -

Business Case

The company faces relevant challenges including technological advancements, new business lines, change resistance, upskilling needs, and inability to track current and future capabilities. A new talent development ecosystem is required, to foster internal employability, retention, performance and build the foundations to strategic workforce planning.

Deliverables / Outcomes

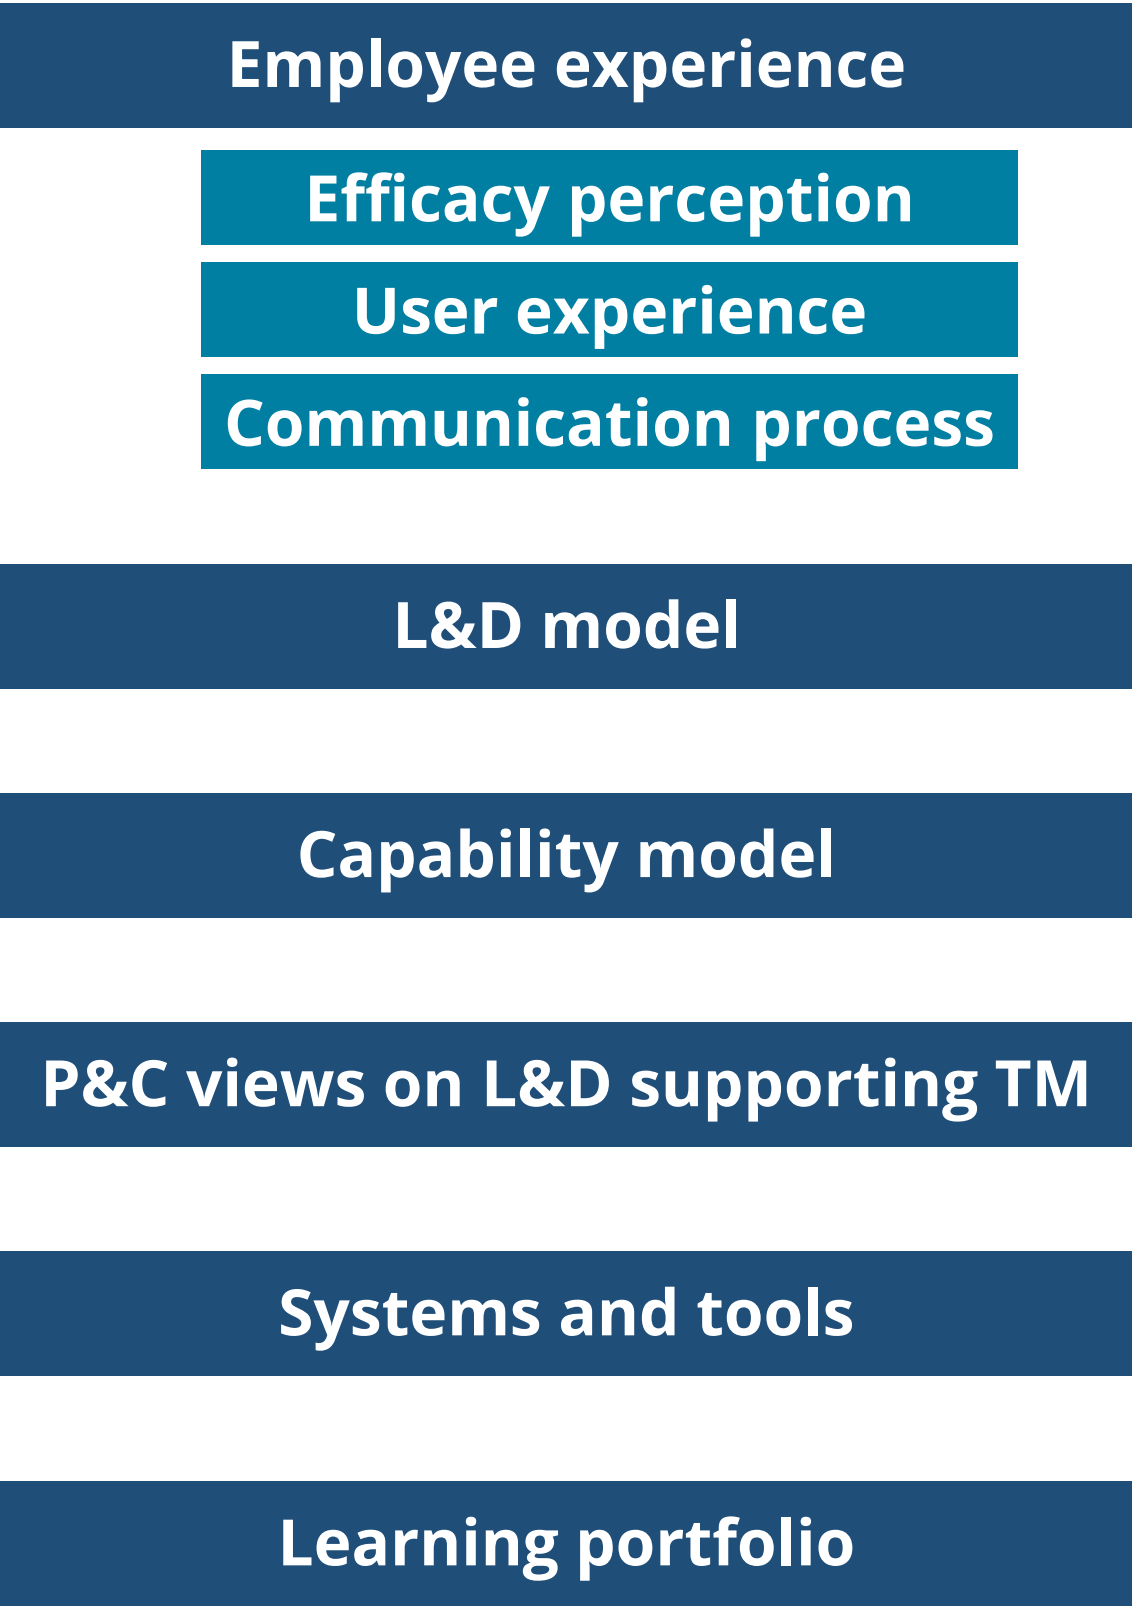

- Bespoke personal development ecosystem
- Process for identification of future-facing capabilities
- Capabilities 'criticality' and gap assessment
- Clarity on capability development priorities per Function
- Increased employee ownership of personal development
- Optimised, business-focused L&D investment

Design foundations for a bespoke L&D model and development ecosystem

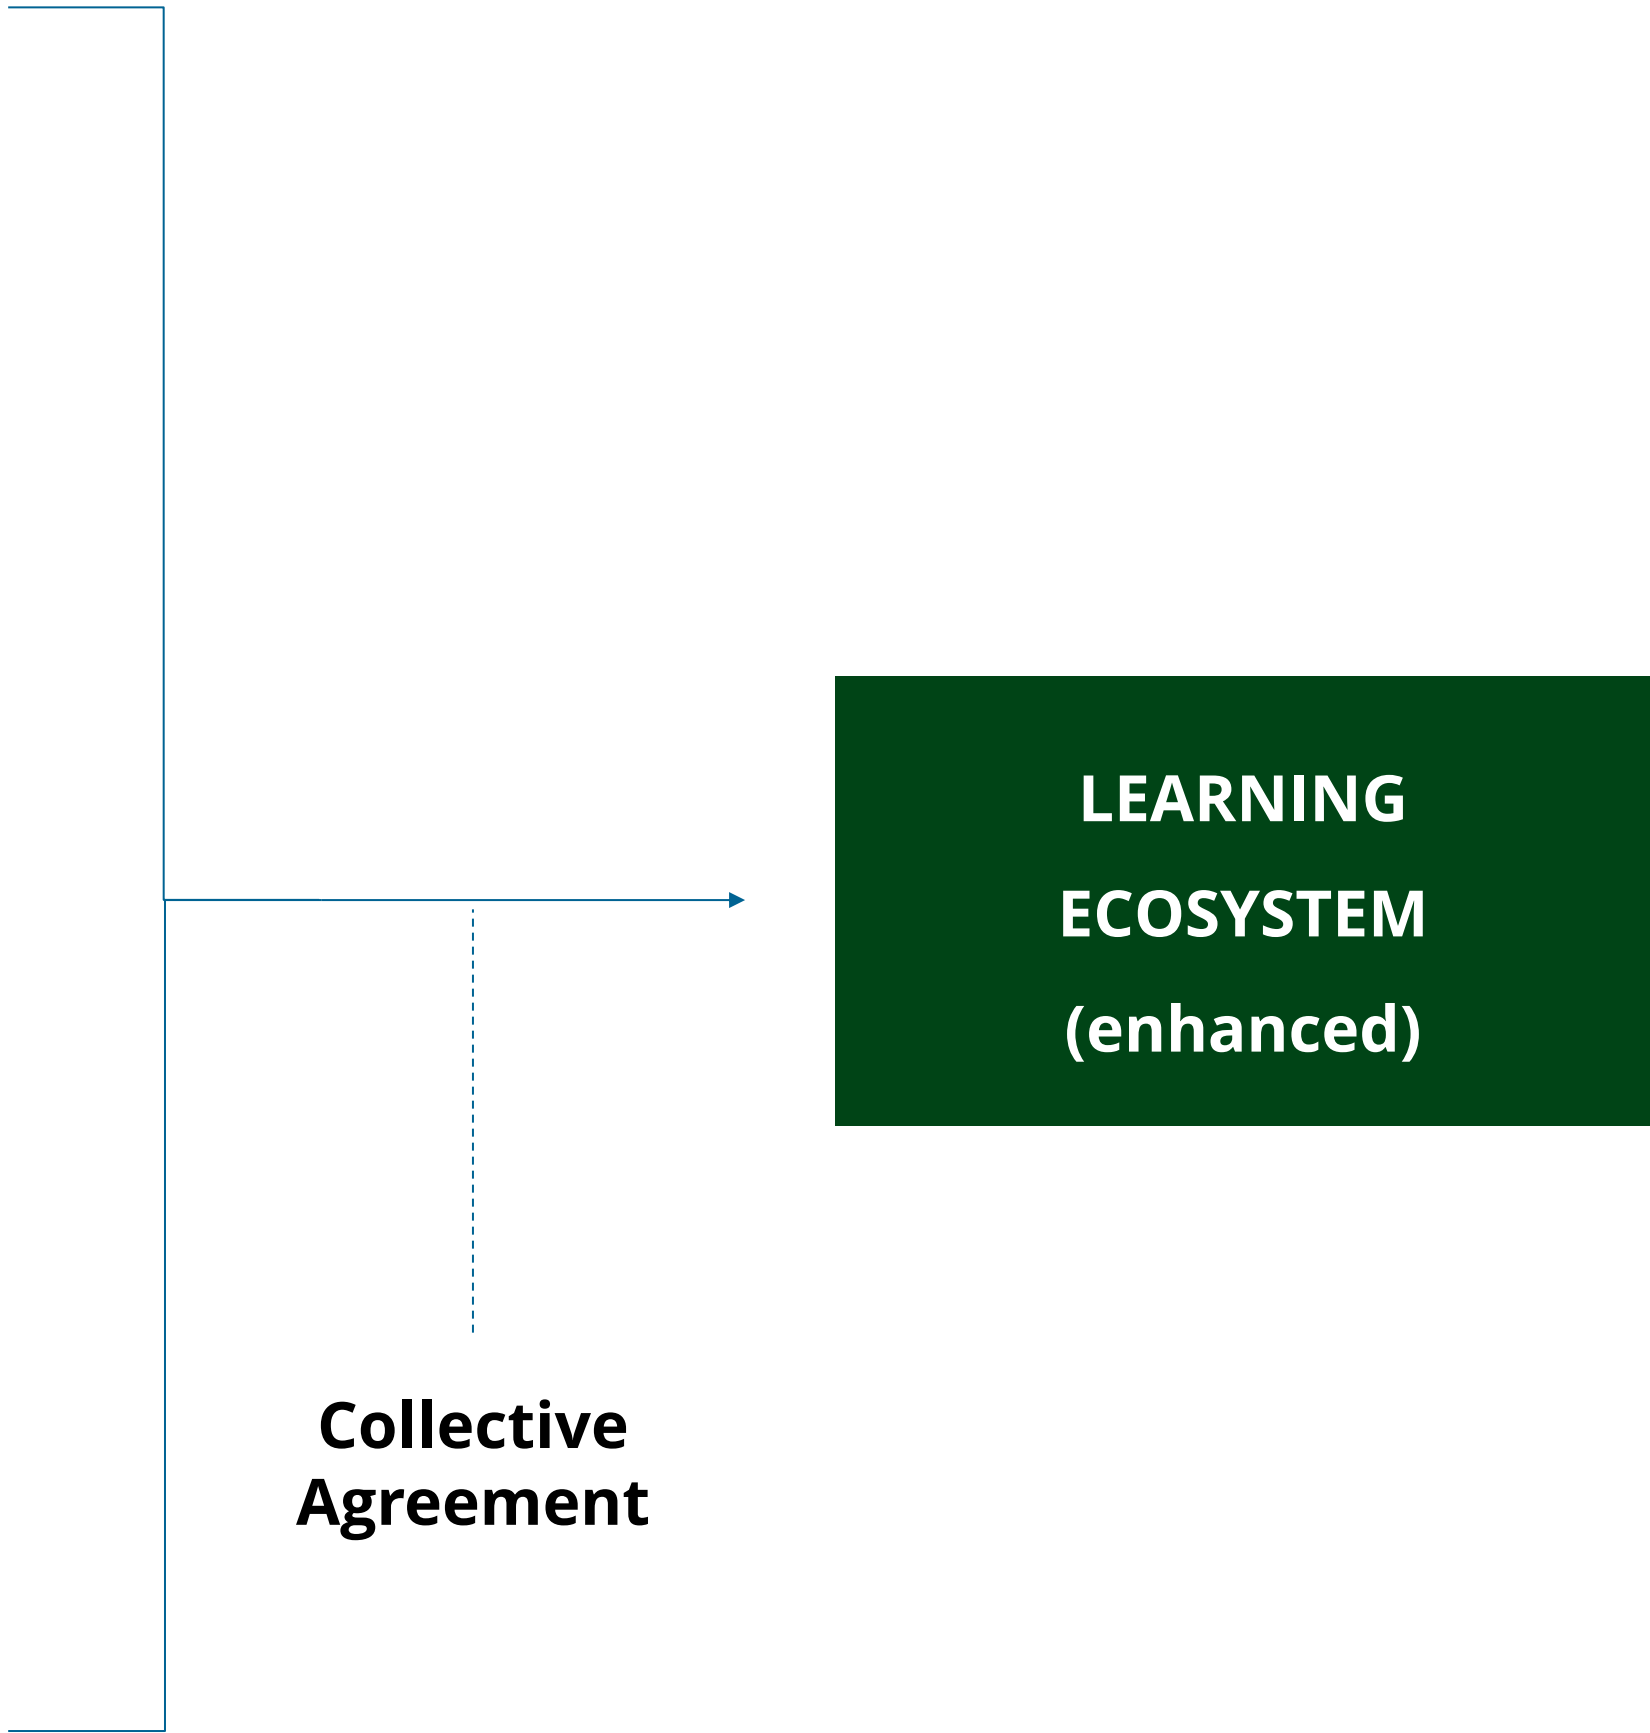

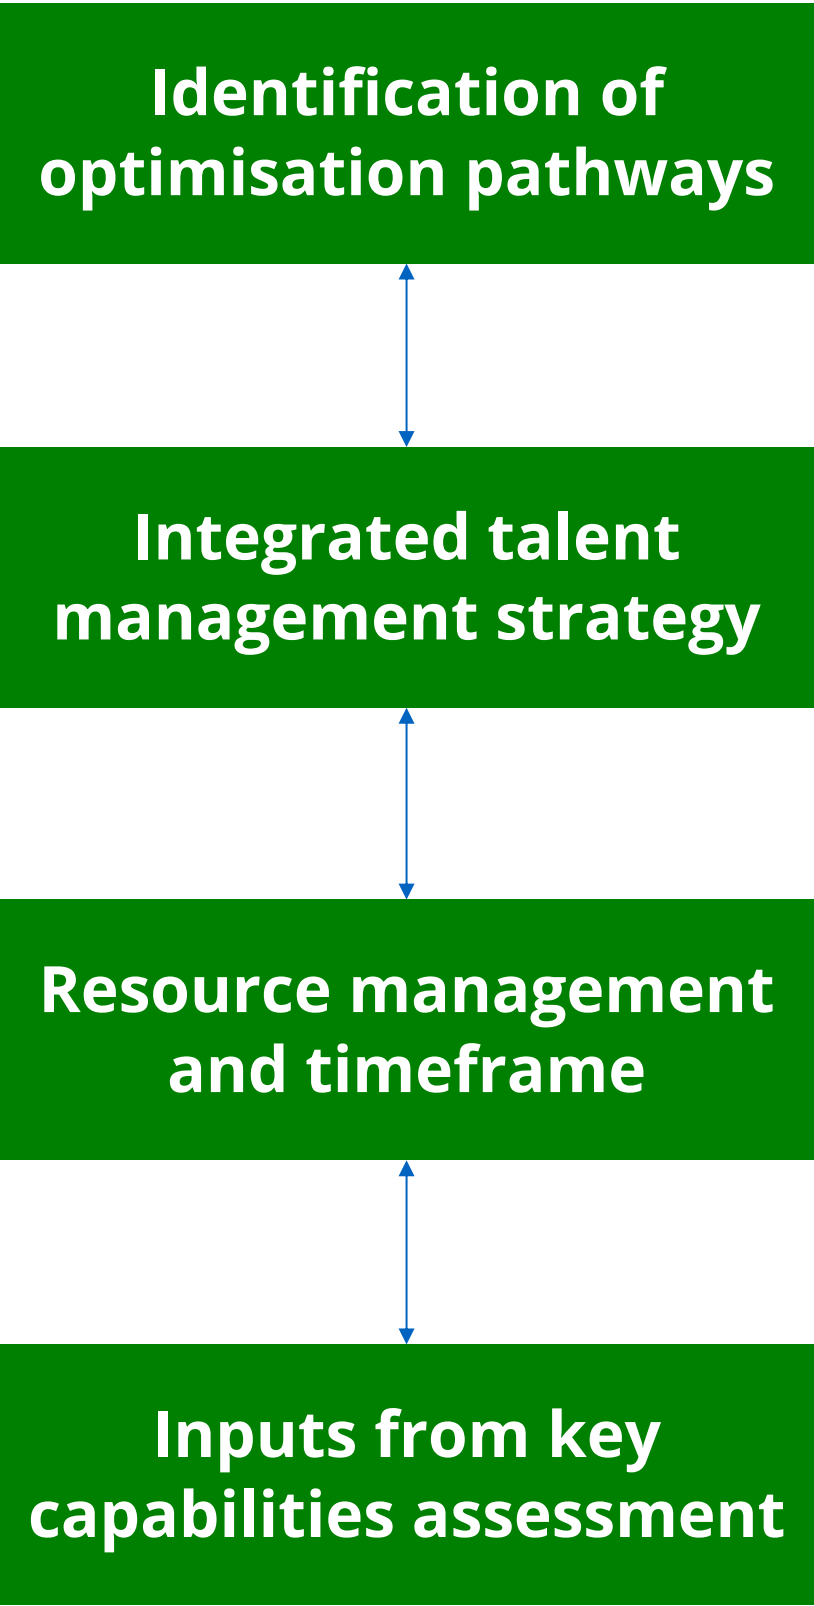

1 Clarity on the capabilities we need to deliver our strategy	2 An engaging development experience for all	3 Building an effective Learning Organisation
<p>A team with the right behaviours, skills, and values, today and tomorrow</p> <p>This requires:</p> <div>(a) Predicting future-facing capabilities globally (businesses/markets & regions)</div> <div>(b) Systematic identification of Function-level capability gaps</div> <div>(c) Co-creation with and for the business</div>	<p>Implementing a capability system that enables lifetime employability</p> <p>An experience that focus on:</p> <div>(a) Flexible and holistic development and career pathways</div> <div>(b) Learning platforms that are effective and user-friendly</div> <div>(c) A portfolio allowing prescribed and employee-led learning</div>	<p>Building an Always Learning mindset as a talent management foundation</p> <p>A L&D model that:</p> <div>(a) Fosters motivation towards self-development and continued growth</div> <div>(b) Leverages learning innovation and knowledge insights, globally</div> <div>(c) Focus L&D investment on critical capabilities and user experience</div>
