

# Is Your Dev Team High Performing?

## A 1-MINUTE DevOps DELIVERY CHECKLIST

- ✓ **Deployment Frequency**—Do you deploy code to production at least once per week?
- ✓ **Lead Time for Changes**—Does it take less than a week for code to go from commit to deploy?
- ✓ **Change Failure Rate**—Do fewer than 15% of your deployments result in bugs or rollbacks?
- ✓ **Time to Restore Service**—Can your team restore service within 1 hour after an incident?
- ✓ **CI/CD Maturity**—Do you use automated pipelines for build, test, and deploy?
- ✓ **Team Health**—Is engineering morale stable and burnout low?

If you answered "no" to any of these, your team could benefit from a performance tune-up. Book a free consult →
