Infrastructure

Plastic Recycling Plant

Automatic high speed printing machines

Large storage capacity

Fully automatic high-speed cutting machines

Extruders

Our Products

BOPP

Bio-Compostable

Zip-Lock

PP

LDPE

HDPE

Who Are We

BRIEF HISTORY

Ashwin Polyplast was established in the year 1993 by trading poly bags for some time and after gaining experience out of it, by the year 1995 extruders, printing and cutting machines were installed. Production capacities were doubled by the year 2006.

Being an addition one more unit were established in 2011 to increase the production capacity further. The present production capacity is about 3 Metric Ton / 3 lakh pieces per day.

By the year 2022 we took initiative towards sustainable future and started to manufacture bio-compostable poly bags. In the year 2023 we installed many new machines to recycle the plastic wastes, by which we became an GRS certified company.

Since 1993, for the past 30 years we provide our customers with the highest satisfaction, by serving with high quality products in short time.

TOWARDS SUSTAINABILITY

As a manufacturer, ASHWIN POLYPLAST is committed to provide only the highest quality products to our customers, but we also recognise the reality of the threats emerging to our mother nature, which spurs us towards the highest Global Recyclable Standards & Compostable materials with our team doing research & quality control using the advanced production facilities.

We ensure that even though our products are made out of recycled or compostable materials, the quality is not compromised & is at par or even better than products of virgin or conventional qualities.

We have joined the global initiative of supporting sustainable future, you can contribute your part too, by choosing our GRS certified & Compostable bags instead of the traditional polybags & coming under global family of the LiFE (Live For Environment) movement launched by our Hon'ble Prime Minister.

OUR MISSION

- To provide with the variety of products as per the need.
- To adapt the advanced technology available in the market.
- To deliver the fine product as per the commitments.
- To keep on expanding our services.

OUR VISION

Our vision is to become a leading solution finder for all types of packaging in an efficient and eco-friendly manner. To be a customer-centric company by mastering this field in all the possible ways.
