COME, PARTICIPATE AND BUILD SCHOOL CLASSROOMS FOR KINDERGARTEN LEVEL CHILDREN

In Cajamarca there are many kindergarten level schools for children ranging from 3 to 5 years, which infrastructure is on a deplorable conservation state. Making so children study in classrooms with walls affected by humidity, endangering their health. The poor lighting in some classrooms make them an environment that is not suitable for proper education. Schools do not have recreational games, there is also a lack of educational furniture and recreational materials for their classes.

The International Volunteering Program of The International Center for Sustainable Development and the Rotary Club of Cajamarca have joined forces so that, with your help and solidarity, we can bring better educational quality to these children

You will participate in the construction of classrooms with prefabricated Drywall material, over a period of three weeks, this will allow us to improve their conditions for studying.

This three-week work will be carried out with the technical assistance of Drywall professionals for the construction stages: formwork of the area perimeter, wall structuring, plates installation, thermoacoustic fiber installation, internal plasterboards installation, mesh, putting joints, installing trusses, sealing and painting.

Likewise, we will receive support from agronomic technicians for the installation of a biogarden so that children have vegetables for their daily consumption, develop a space for practical learning, development of skills and connecting with nature.

The goal is for the classroom to be inaugurated by the volunteers before returning to their country, leaving it completed and with a plaque commemorating the project carried out.

Registration process:

- 1** Fill out a Pre-Registration Form and email it to: ssosa@cideso.org
- 2** Zoom meetings will be held Mondays, Wednesdays and Fridays at 11:00 a.m (Peru time) for candidates interested in participating in the International Program.
