

# Nakamoto (NBC) Whitepaper

## Introduction

Nakamoto (NBC) is a BEP-20 token on the BNB Smart Chain, designed to provide simple, secure, and low-cost digital transactions. Starting with payments and staking, NBC aims to gradually expand into a broader decentralized financial ecosystem.

## Problem & Solution

**Problem:** Many existing blockchain-based payment systems suffer from high fees, slow transactions, and lack of trust.

**Solution:** NBC provides a fast, low-cost, and transparent digital currency with built-in mechanisms such as automated burning, liquidity growth, and development support.

## Key Features

- Automated Burn: 0.2% of every transaction is permanently removed from supply.
- Liquidity Growth: 0.6% of each transaction is added to liquidity, ensuring long-term market stability.
- Development Support: 0.2% of each transaction is allocated to innovation and project growth.
- Low Fees: With only 1% transaction fee, NBC remains competitive and sustainable.

## Tokenomics

- Max Supply: 100B
- Total Supply: 1B
- Circulating Supply: 10M
- Transaction Fee: 1% (0.2% Burn, 0.6% Liquidity, 0.2% Development)

## Roadmap

- Q3 2025: Token Launch, Official Website Release, Social Media Setup (Twitter / Telegram).
- Q4 2025: PancakeSwap Listing, Liquidity Lock, Apply for CoinGecko Listing.
- Q1 2026: Apply for CoinMarketCap Listing, Initial Marketing Campaigns, Website Transparency Updates.
- Q2 2026: Partnerships with DeFi tools, NBC Staking & Rewards.
- Q3–Q4 2026: Gradual expansion to medium-tier CEX exchanges, Larger marketing campaigns, Prepare roadmap for 2027 and beyond.
