Regular	Price Starts \$2,000. Price may increase depending on the complexity of the project.		
Certain cities and municipalities will require in-person deliverance of the permit documentation. In such situations, paperwork will be prepared by the service provider (Esko Records), and coordination of deliverance of physical permit deliverance will be required. If service provider must deliver the permit, an additional cost of \$250.00 will be added to the original permit price.			

## Process, Terms, & Conditions

### Process

1. Permit documentation is received from client after payment is received.
2. Client is asked if registered with the city, town, or municipality (CToM).
3. If not registered with the municipality, client is registered to the CToM for an additional flat fee of \$ 75.
4. Once registered with the CToM or registration with the CToM is confirmed, all paperwork is analyzed to ensure completeness of data required for the permit process, identify documents that must signed by the contractor client and the contractor himself/ herself, identify if an engineer is needed for calculations or other functions.
5. Once initial analysis of all documentation is conducted, contractor will be made aware if an engineer will be required for services regarding the permit process.
6. All initial signatures will be collected for required forms and documents. First, Esko Records representative will reach out to the customer and after Esko Records representative will reach out to the contractor.
7. Once all forms, documents, signatures, and engineering associated forms or documents (if necessary) are gathered, permit documentation will be submitted to the portal.

### ***Terms & Conditions***

1. In order to avoid any unnecessary delays, the contractor is expected to share with us basic information related to the permit project. Some of the basic information includes but is not limited to client complete name, client email address and phone number, signed contract, related Florida Approval information or NOA(s). In addition, the portal username and password of the CToM is required, unless contractor adds Esko Records representative as a team member for the associated permit project.
2. Esko Records will be contacting customers on behalf of the contractor to gather signatures.
3. Esko Records is not responsible for any additional fees (for example: engineering fees) that may be incurred as a result of the permitting process.
4. Contractor understands that any delays in data submittal when requested by Esko Records may cause a delay in the overall permitting process.
5. If contractor is not satisfied with the services of Esko Records because of delays in the permitting process not of their making or creation, Esko Records will grant a replacement permit free of charge or a full refund of the permit – no questions asked!
