Congratulations for correctly identifying the *THE SUPER SALTO JET SAILPLANE***

Powered by the PBS TJ-100 jet engine, the highly modified *Super Salto* sailplane is the only sailplane on the airshow circuit capable of performing a low-level, jet-powered airshow performance. Utilizing its powerful jet engine, the *Super Salto* performs a high-speed aerobatic climb to altitude without a tow plane, followed by a spectacular exhibition of graceful sailplane aerobatics, choreographed to classical music, and featuring the world-famous Vertigo Airshows smoke. When the original altitude is spent, most sailplanes must land.
